

# The Complete Technology Book on Biofertilizer and Organic Farming (2nd Revised Edition)

**Author:** NIIR Board

**Format:** Paperback

**ISBN:** 9789381039076

**Code:** NI115

**Pages:** 608

**Price:** Rs. 1,400.00 **US\$** 150.00

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

Biofertilizers are seen as an important alternative technology, since the negative externalities of chemical fertilizers have become well known. The use of the latter has led to considerable environmental cost. Biofertilizers do not pollute the soil and do not disrupt the ecological balance, and hence are environment friendly. An increasing number of farmers are using biofertilizers, and the numbers of biofertilizer manufacturing units have also grown considerably. Organic farming system in India is not new and is being followed from ancient time. It is a method of farming system which primarily aimed at cultivating the land and raising crops in such a way, as to keep the soil alive and in good health by use of organic wastes (crop, animal and farm wastes, aquatic wastes) and other biological materials along with beneficial microbes (biofertilizers) to release nutrients to crops for increased sustainable production in an eco friendly pollution free environment. Organic farming has emerged as an important priority area globally in view of the growing demand for safe and healthy food and long term sustainability and concerns on environmental pollution associated with indiscriminate use of agrochemicals.

Going organic may be a clear way of getting back to basics and getting away from the havoc chemicals can wreak on our health and our environment but the basics themselves may not be so clear. This book provides the view of immense potential of biofertilizers as a supplementary nutrient source for the crops and covers all major types of bacterial fertilizers.

The major contents of this book is crop response to biofertilizers, nitrogen fixation, phosphate solubilising microorganisms, application and evaluation techniques, Bio Gas production, pest and disease management system in agriculture, production, promotion, quality control, marketing, future research planning, photographs and details of machineries, list of manufacturers and suppliers of biofertilizers and organic farming in directory section.

This book will be of use and interest to consultants, researchers, libraries, entrepreneurs, manufacturers of biofertilizer and for those who wants to venture in to this field.

## Contents

### 1. INTRODUCTION TO BIOFERTILIZERS

Concept of IPNM

Integrated Plant Nutrient Management (IPNM)

Biofertilizer Development

Materials of Biological Origin  
Biofertilizers  
Classification  
Potential of Biofertilizers in Crop Production in Indian  
Agriculture  
Chemically fixed Nitrogen versus Biologically fixed Nitrogen  
Synergistic interaction between Biofertilizing Agents  
Biofertilizing agents and Plant Disease Control  
Brief account of beneficial Microorganisms  
Rhizobium  
Azotobacter and Azospirillum  
Phosphate Solubilizing Microorganisms  
Vesicular Arbuscular Mycorrhizae (VAM)  
Azolla  
Blue Green Algae  
Plant Growth Promoting Rhizobacteria (PGPR)  
Status of Biofertilizer in India  
Thrust in Research and Development

## 2. NITROGEN FIXATION

Biochemistry  
Historical Review  
Molecular Properties of Nitrogenase  
Dinitrogenase  
FeMo cofactor  
Dinitrogenase Reductase  
Substrates  
Energy Requirements  
Electron Donors  
Catalytic Mechanism  
Inhibitors  
Classical Inhibitors  
Regulatory Inhibitors  
Ammonia Assimilation  
Genetics  
Introduction  
Approaches and Techniques Available  
nif Genes in *Klebsiella pneumoniae*  
Regulation of nif  
Azotobacter Species  
Cyanobacteria  
Photosynthetic Bacteria  
Rhizobium Species  
Fast growing Species  
Slow growing Species  
Regulation  
Applications  
Physiology of Organisms  
Aerobes  
Facultative anaerobes  
Anaerobes  
Symbionts  
Agronomic Applications

Rhizobium  
Azospirillum  
Cyanobacteria  
Cyanobacterial Associations  
Photosynthetic Bacteria  
New Associations  
Industrial Applications  
Chemical Catalysts  
Ammonia Production  
Hydrogen Production  
Biomass Conversion  
Timber Production  
Phytochemical Production

### 3. NITROGEN FIXING MICRO-ORGANISMS : SYMBIOTIC

Biological Nitrogen Fixation  
Types of Biological Nitrogen Fixation  
Factors Affecting Nitrogen Fixation  
Genus : Rhizobium  
Rhizobia  
Rhizobium/legume Symbiosis  
Methods for study of legume root nodulation  
Isolation  
Differentiation of Rhizobium from its common associate  
Agrobacterium  
Tests for nodulation  
Infection test  
Tissue and cell cultures  
Acetylene reduction assays  
Use of  $^{15}\text{N}$  to measure Biological Nitrogen Fixation  
Multiplication of rhizobia : Root hair curling  
Formation of infection threads  
Nodule formation  
Cross Inoculation Group  
Fungicide Enhancement of Nitrogen Fixation  
Stem Nodules  
Genus : Frankia  
Biofertiliser Role  
Genus - Azolla  
Introduction  
Morphology and taxonomy  
Role of Azolla  
Inoculum Production of Azolla  
Factors Affecting Successful Azolla Production  
Azolla Nursery  
Constraints  
Conclusions and Future Outlook  
Integrated Approach for Increasing Microbial Inputs  
Economics of Biofertiliser Use

### 4. NITROGEN FIXING MICRO-ORGANISMS : ASYMBIOTIC

Genus : Azospirillum  
Introduction

Taxonomy  
Isolation, Maintenance and Cultivation  
Physiology  
Genus Azotobacter  
Introduction  
Distribution  
Classification  
Morphology and Taxonomy  
Isolation  
Crop Responses  
Blue Green Algae  
Introduction  
Morphology  
Constraints

#### 5. PHOSPHATE SOLUBILIZING MICROORGANISMS : FUNGI AND BACTERIA

Problems in Phosphorus Uptake  
Phosphate Fixation in Different Soils  
Historical Developments  
Phosphate Solubilization  
Factors Affecting Phosphate Solubilization  
Isolation  
Mechanisms of Action  
Role of acids  
Other Mechanisms  
Effect on Crop Yield

#### 6. PHOSPHATE SOLUBILIZING MICRO-ORGANISM : MYCORRHIZAE

Comparison of Ectotrophic and Vesicular-Arbuscular Mycorrhizae  
Ectomycorrhizae  
Systematics of Ectomycorrhizal Fungi and their Hosts  
Morphology and Development of Ectomycorrhizae  
Sources of Ectomycorrhizal Inoculum  
Natural airborne spore inoculum  
Soil already colonized by an EM fungus or fungi  
The introduction of seedling with established mycorrhizae  
The deliberate introduction of spores, sporocarps or sclerotia  
Mycelial inoculum derived from pure cultures of known mycobionts  
Evaluation and Selection of Ectomycorrhizal Fungi  
Rapidly and extent of mycorrhization  
Host response  
Inorganic nutrient uptake  
Water relations  
Temperature tolerance  
pH tolerance  
Tolerance to soil toxicity  
Stability of the partnership  
Disease resistance  
Strand formation  
Ease of pure culture formation  
Ease and rapidity of production  
Edibility of the fruit bodies

Natural inoculum: airborne spores  
Soil colonized by EM fungi  
Seedlings colonized by EM fungi  
Fungal sporomata or sclerotia  
Mycelial inoculum  
Endomycorrhizae (Vesicular-Arbuscular Mycorrhizae)  
Systematics of Vesicular-Arbuscular Mycorrhizal Fungi and their Host  
Morphology and Development of Vesicular-Arbuscular Mycorrhizae  
Sources of VAM Inoculum  
Evaluation and Selection of VAM fungi  
Laboratory experiments  
Greenhouse crops  
Field-sown crops  
Prospects

## 7. APPLICATION AND EVALUATION TECHNIQUES

Different Methods for Biofertilizer Inoculation  
Seed inoculation  
Top dressing of Biofertilizers  
Granular biofertilizers:  
Solarisation of FYM/Compost  
Granular biofertilizer mixed with seed  
Broadcasting of granular biofertilizers  
Frequency of inoculation  
Liquid inoculation of Biofertilizers  
Methods of application of liquid inoculation  
Drenching by Sprayers  
Application in root zone  
Culture pellet  
Methods of Application of Other Biofertilizers  
Blue Green Algae  
Azolla  
As green manuring  
Azolla dual cropping  
Azotobacter  
Preparation and use of Azotobacter inoculant  
Application  
Azospirillum  
Mycorrhizae  
Endomycorrhizae  
Ectomycorrhizae  
Techniques for Isolation of Vesicular Arbuscular Mycorrhizal  
Fungi (VAMF) from soil in Laboratory :  
Method for examination of mycorrhizal infection in root samples :  
Foliar Biofertilizer  
Humic  
Humic Acid  
Introduction  
Application  
Soil  
Foliar  
Seed treatment  
Soil Benefit

Root  
Seeds  
Plants  
Precautions  
Different Media Used to Study Biofertilizer  
I. Growth Media for Rhizobium  
1. Yeast Extract Mannitol Agar  
2. Congo-red Medium  
3. Hofer's Alkaline Medium  
4. Glucose peptone Agar  
5. Bergersen's Synthetic Medium  
Media for Testing Nodulating Ability of Rhizobium  
II. Isolation of Frankia  
Media Used  
III. Selective Media for Blue Green Algae  
IV. Selective Media for Azotobacter  
V. Selective Media for Azospirillum  
VI Selective Media for Phosphate Solubilizing Organisms  
VII Selective Medium for isolation of Pseudomonas fluorescens, a biocontrol agent  
VIII Selective medium for isolation of Trichoderma an antagonistic fungus  
Precautions in handling

## 8. CROP RESPONSE TO BIOFERTILIZERS

Symbiotic Nitrogen Fixation:

Rhizobium

Irrigated Crops

Dry land Crops

Dryland Legumes

Fodder Crops

Azolla

Irrigated crop

Nonsymbiotic Nitrogen Fixation

Blue Green Algae (BGA)

Irrigated Crops

Azotobacter

Irrigated Crops

Dry land crops

Azospirillum

Irrigated Crops

Dryland Crops

Fodder Crops

Phosphate Solubilizers and Fixers

Mycorrhiza

Irrigated Crops

Dryland Crops

Fodder Crops

Phosphate Solubilizing Microorganisms

Irrigated Crops

Factors Affecting Crop Response to Biofertilizers

Interaction effect of microbial strains

Effect of nutrient interactions

Dryland Crops

Fodder Crops

Methods of Inoculation  
Other Factors  
Host Response to Biofertilizers  
Interaction of Inoculants with other Nutrients  
Multi-Microbial Inoculation  
Compatibility Between Biofertilizers and Chemical Fertilizers  
Adaptive Trials

## 9. SIMPLIFIED ANAEROBIC DIGESTERS FOR BIOFERTILIZER

Abstract  
Foreword  
Batch Digester Plant  
Results  
Plug Flow Digester Plant  
Results  
Covered Lagoon Biogas System  
Results  
Continuous Expansion Digester  
Tests on a Small Electric Generator set Fuelled by Biogas  
Results  
An Economic Evaluation of the Plants  
Conclusions

## 10. MODIFIED ANAEROBIC FERMENTER FOR BIOFERTILIZER

Abstract  
Introduction  
Apparatus  
Choice of a Laboratory Fermenter  
The Proposed Impeller Design  
Three-phase Fluidized Bed  
Experimental Technique  
Results and Discussions  
Effect of using the 3-phase Fluidisation Technique  
Effect of the Modified Paddle Mixer  
Effect of Type and Duration of Mixing  
Effect of Temperature  
Conclusions and Recommendations

## 11. OPERATING CONDITIONS FOR ANAEROBIC DIGESTION OF BIOFERTILIZER

Abstract  
Introduction  
Design of the Experiment  
Results and Discussion  
1. Effect of the initial total solids (TS) concentration on  
A. TVS reduction  
B. Biogas and methane  
2. Effect of hydraulic retention time (0) on  
A. TVS reduction  
B. Biogas and methane  
3. Effect of temperature on:  
A. TVS reduction  
B. Biogas and methane  
4. Effect of mode of operation on:

- A. TVS reduction
- B. Biogas and methane

## 12. BIOGAS PRODUCTION FROM ORGANIC BIOFERTILIZER

Abstract

Introduction

Materials and Methods

Organic Wastes

Starter

Digestion Apparatus

Analytical procedures

Experimental

Results and Discussion

Biogas Production from Geranium Flour (GF)

Biogas Production from Akalona (AK)

Biogas Production from Watermelon Residue (WR)

## 13. BIOGAS FROM LIQUID BIOFERTILIZER DERIVED FROM BANANA AND COFFEE PROCESSING

Abstract

Introduction

Results

## 14. ORGANIC FARMING

Pollution Problems with Fertilizers

Water Pollution

Atmospheric pollution

Damage to crops and soils

Heavy Metal Contamination

Environment Restoration with Fertiliser

Organic Matter

Chemical nature of organic matter

Organic Manures

Organic residues

Cow dung manure

Live stock wastes

Green Manure

Importance of green manure

Green manure crops

Turning of green manure crops

Biological cont

### CONTENTS INTRODUCTION TO BIOFERTILIZERS

Concept of IPNM Integrated Plant Nutrient Management (IPNM) Biofertilizer Development Materials of Biological Origin Biofertilizers Classification Potential of Biofertilizers in Crop Production in Indian Agriculture Chemically fixed Nitrogen versus Biologically fixed Nitrogen Synergistic interaction between Biofertilizing Agents Biofertilizing agents and Plant Disease Control Brief account of beneficial MicROORGANISMS RHizobium Azotobacter and Azospirillum Phosphate Solubilizing Microorganisms Vesicular Arbuscular Mycorrhizae (VAM) Azolla Blue Green Algae Plant Growth Promoting Rhizobacteria (PGPR) Status of Biofertilizer in India Thrust in Research and Development Nitrogen Fixation Biochemistry Historical Review Molecular Properties of Nitrogenase Dinitrogenase FeMo cofactor Dinitrogenase Reductase Substrates Energy Requirements Electron Donors Catalytic Mechanism Inhibitors Classical I nhibimes

## 17. PEST AND DISEASE MANAGEMENT SYSTEM IN AGRICULTURE Pesticide Usage Trend

Harmful Effects

Integrated Pest and Disease Management System (IPDMS)

Definition

Specific Objectives  
Philosophy or Concepts of IPDMS  
Component of IPDMS  
Cultural Control  
Mechanical and physical control  
Biological Control  
Conservation of Natural enemies  
Release of Parasites  
Use of Microbial Agents  
Use of Predators  
Cultivated crops  
Varietal resistance  
Pest Surveillance Methodology  
Forecasting Pest Attack  
Use of Selective Pesticide  
Need-based Application of pesticides  
Other pest Control Methods  
Limitations of IPDMS  
Demonstrations  
Role of government and private sectors in the promotion of IPDMS

## 18. BIOPESTICIDES

Discovery  
Development  
Registration  
Biological Control of Insect  
Fungal Insecticides  
Bacterial Insecticides  
Bacillus thuringiensis (BT)  
Mode of action  
The question of resistance  
Commercial Prospects  
Improvements in BT through genetic engineering  
The BT protein and the efforts on recombinant DNA in this area  
Limitations of BT  
Safety  
Viral Insecticides  
Nuclear Polyhedrosis Virus  
Protozoan Insecticides  
Possibilities of field application  
Botanical Pesticides  
Pheromone trap  
Trichocards  
Biological control of plant diseases  
Soilborne diseases  
Methods for biocontrol  
Biological Seed Treatment  
Foliar Diseases  
Introduction  
Selection of biocontrol agents  
Formulation and delivery system  
Improved efficacy  
Commercialization

Nematodes as Biological Control Agents  
Production and Formulation  
Biological Control of Nematodes  
Biological Control of Weeds  
Role of genetic engineering

## 19. SUSTAINABLE AGRICULTURE

Definition  
Dimensions  
Perceptions  
Components  
Crop Diversification  
Crop Rotation  
Biological Nitrogen Fixation  
Mixed Cropping  
Soil Micorbes on Crops  
Genetic Diversity  
Integrated Nurient Management (INM)  
Integrated Pest Management (IPM)  
Sustainable Water Management  
Post Harvest Technology  
Extension Programmes  
Sustainable Agriculture for India  
Maintaining quality of the land resource  
Indigenous Water Management  
Conserving crop diversity  
Stable farming systems  
Judicious use of inputs  
Role of biotechnology  
Government support to farmers  
Conclusion

## 20. PRODUCTION : PROMOTION : QUALITY CONTROL AND MARKETING

Diversification  
Need for Basic Facilities  
Availability of High Standard Raw Materials  
Efficient strain  
High grade carrier  
Suitable nutrient broth  
Reliable packing material  
Good quality of adhesive  
Application of Updated Technology  
Conventional method of production  
Production of freeze dried culture  
Improvement on technological procedures  
Production System  
Sterile carrier system  
Improvement in sterillisation procedure  
Fermentation technology  
Latest Technology on Inoculant production  
Bag and carrier  
Rhizobium broth  
Quality Control

Isolation and Identification of bacterial strains

Screening of the pure isolated strains

In Vitro

In vivo

Fermentation

Finished Product

Production Constraints

Raw material

Bacterial strain

Economic viability

Production process

Shelf life

Production Technology (Proposed)

Establishment of efficient Culture Bank

Research and Development (R & D)

Mass Production

Promotion

Field Experiments on R & D Farm

Trials on farms

Demonstration on Farmers'™ Fields

Marketing

Constraints

Pricing policy and packing

Lack of awareness

Inadequate shelf-life

ISI Mark

Outlook

## 21. FUTURE RESEARCH PLANNINGS

Production

Raw materials

Economics of production

Production of biofertilisers

Miscellaneous

Biological

Technical

Ecological

Inoculum

Establishment

Biological stresses

Abiotic stress

Pesticides

Agronomic

Rainfall

Soil Type

Soil Moisture and temperature

Survival of Rhizobial Populations

Field Level

Method of Application

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.
