Aromatic plants have essential or aromatic oils naturally occurring in them. They help heal mental ailments and other diseases. India is endowed with a rich wealth of medicinal plants. Aromatic (Aroma Producing) plants are those plants which produce a certain type of aroma. Their aroma is due to the presence of some kind of essential oil with chemical constituents that contain at least one benzene ring in their chemical configuration. The chemical nature of these aromatic substances may be due to a variety of complex chemical compounds. These plants have made a good contribution to the development of ancient Indian material medica. In recent years, there has been a tremendous growth of interest in plant based drugs, pharmaceuticals, perfumery products, cosmetics and aroma compounds used in food flavors and fragrances and natural colors in the world. There is a definite trend to adopt plant based products due to the cumulative derogatory effects resulting from the use of antibiotic and synthetics and except for a few cultivated crops, the availability of plant based material is mainly from the natural sources like forests and wastelands. There is a need to introduce these crops into the cropping system of the county, which, besides meeting the demands of the industry, will also help to maintain the standards on quality, potency and chemical composition. During the past decade, demand for aromatic plants and its products has attracted the worldwide interest, India being the treasure house of biodiversity, accounts for thousands of species which are used in herbal drugs. 90% of herbal industry requirement of raw material is taken out from the forests.

Some fundamentals of this book are botanical description of the plant, genetic improvement, harvesting, intercropping, transplantation, irrigation and weeding, vanilla cultivation in India, commercial cultivation of vanilla, distillation of herbage for essential oil, effect of growth hormones, jasmine crop improvement & agrotechniques, efforts for new variety of Jasminum auriculatum, essential oils of agarwood, Cinnamomum tamala leaves, Eucalyptus citriodora and Cauttheria pragrantissima, past and future of sandal wood oil industry, by product development from turmeric and ginger rhizomes, isolation of essential oils and its flavour profile etc.

This book contains most of the important aspects related to aromatic plants. It is being published for those who are interested in growing, processing and trading of aromatic plants.

Uses of Aromatic Plants, Commercial cultivation of aromatic plants

Contents

1. Cultivation of Tagetes Minuta
   Botanical description of the plant
   Genetic improvement
   Agrotechnology
   Soil and climate
   Propagation
   Weed control
   Fertilizers and manures
   Irrigation
   Harvesting
   Intercropping
   Crop rotations
   Diseases
   Distillation
   Chemistry
   Distillation unit design availability

2. Cultivation of Eucalyptus Citriodora
   Description of the plant
   Cultivation
   Soil and Climate
   Preparation of Land
   Propagation
   Nursery
   Transplanting
   Weeding
   Manures and Fertilizers
   Harvesting
   Pests and Diseases
   Distillation
   Yield
   Chemical Constituents
   Uses

3. Cultivation of Rosmarinus Officinalis
   Introduction
   Description of the plant
   Cultivation
   Soil and Climate
   Propagation
   Transplanting, interculture and fertilizer application
   Irrigation
   Harvesting
   Pests and diseases and their control
   Distillation
   Oil content and yield
   Chemical constituents
4. Cultivation of Coriander Sativum
Description of the Plant
Cultivation
Soil and Climate
Propagation
Irrigation
Harvesting
Pests and Diseases
Distillation
Yield
Chemical Constituents
Uses
Economics of Cultivation

5. Cultivation of Lavender Species
Botany
Soil and Climate
Cultivation
Propagation
Propagation By Seeds
Transplantation
Fertilizer Application
Weeding
Regeneration
Harvesting
Distillation
Oil Content and Oil Yield
Chemical Constituents
Uses
Economics of Cultivation

6. Cultivation of Matricaria Chamomilla
Description of the Plant
Genetics
Cultivation
Soil and climate
Propagation/nursery
Transplantation, irrigation and weeding
Cropping sequence
Pests and diseases
Manures and fertilizers
Harvesting
Collection of seeds
Yield
Drying and storage
Distilation
Yield and characteristics of the oil
Uses
Specification of the drug
Economics of cultivation

7. Vanilla  World s second most expensive spice
Vanilla Flower
Vanilla Beans
Vanilla cultivation in India
Commercial Cultivation of Vanilla
Vanilla Extract and Flavourings
Commercial uses of Vanilla
Market for Vanilla
Exports grades and standards

8. Cultivation of Artemisia Annua
   Description of the plant
   Soil and climate
   Propagation
   Weed control
   Fertilizers and manures
   Irrigation
   Harvesting
   Chemistry and uses
   Distillation
   Economics of cultivation

9. Cultivation of Mentha Arvensis
   Plant descriptors
   Available cultivars of menthol mint
   Choice of place for cultivation
   Land preparation
   Preparation of planting material
   Production of suckers
   Production of seedlings
   Planting of suckers in the field
   Fertilizer application
   Irrigation and drainage
   Interculture and weed control
   Crop rotation
   Intercropping
   Harvesting
   Yield
   Storage of herbage
   Pests and diseases
   Insect pests
   Diseases
   Distillation of herbage for essential oil
   Directly fired distillation tank
   Design availability
   Use of mint oil and its derivatives
   Economics of cultivation

10. Cultivation of French Basil (Ocimum Bacilicum L.)
    1. European Type
    2. Reunion Type
    3. Methyl Cinnamate Type
    4. Eugenol Type
Botany
Soil and Climate
Field preparation
Propagation
(a) Raising of Nursery
(b) Planting
Irrigation
Fertiliser Application
Interculture
Harvesting and Yield
Agronomical Studies
Physiological Studies
Heavy metal tolerance
Effect of growth hormones
Mineral contents
Seed mucilage studies
Effect of photoperiodism
Biosynthesis of Eugenol
Tissue Culture Studies
Genetical Studies
Chemical Composition
Uses
Cosmetic
Food
Folk medicine
Ayurvedic Properties

11. Jasmine Crop improvement & agrotechniques
New varieties of jasmine
Arka Surabhi
Arka Arpan
Efforts for new variety of Jasminum auriculatum
for extraction of essential oil
Constituent of Jasmine essential oil
Agronomy
Plant protection
Water saving, labour saving low cost device for
propagation of plant cuttings
Details of the device
Required materials for the device
Detailed method
Economic viability of growing jasmine for essential oil

Introduction
Chemistry of Nuts

13. Himalayan Cedarwood Oil
Essential oil of Deodar (Cedrus Deodara)
Essential oil of Juniperus Recurva var. Squamata and
other oils of Juniperus spp.
Agarwood and Oil Agarwood
Uses
14. Essential oils of Agarwood, Cinnamomum Tamala Leaves, Eucalyptus Citriodora and Caultheria Pragantissima Distillation Gaultheria Eucalyptus

15. Past and Future of Sandal wood Oil Industry Plantation and Harvesting Disease Control Distillation of Oil Packing Problems and their Solutions Adulteration Future Prospects Kewda Industry in Orissa

16. Production Technology and Package of Practices in Chilli Cultivated Species of Capsicum Constraints in Chilli Production Technologies Developed Disease and Disease Management Marketing in Chilli Value Addition in Chilli

hept 3 ene and its position isomers (III).
3. Synthesis of 4 Butyryl 3, 7,
7 trimethylbicyclo [4, 1, 0] hept 3 ene and its
position isomers (IV).

Experimental
Fractionation of Turpentine Oil for Isolation
of 3, 7, 7 Trimethylbicyclo [4, 1, 0] hept 3 ene
((+ Car 3 ene (I)).
4 Acetyl 3, 7, 7 trimethylbicyclo [4, 1, 0]
hept 3 ene and its position isomers (II).
Separation of IIa, and IIc by Column Chromatography.
4 Acetyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 2 ene (IIb)
3 Methylene 4 acetyl 7, 7 dimethylbicyclo
[4, 1, 0] heptane (IIc)
4 Propionyl 3, 7, 7 trimethylbicyclo [4,1,0]
hept 3 ene and position isomers (III).
Separation of IIIa, IIIb and IIIc by column Chromatography.
4 Propionyl 3, 7, 7 trimethylbicyclo [4, 1, 0]
hept 3 ene (IIIa).
4 Propionyl 3, 7, 7 trimethylbicyclo [4, 1, 0]
hept 2 ene (IIIb).
3 Methylene 4 propionyl 7, 7 dimethylbicyclo [4, 1, 0]
heptane (IIIc).
4 Butyryl 3, 7, 7 trimethylbicyclo [4, 1, 0]
hept 3 ene and its position isomers (IV).
Sederation of IVa, IVb and IVc by column chromatography.
4 Butyryl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene (IVa).
4 Butyryl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 2 ene (IVb).
3 Methylene 4 Butyryl 7, 7 dimethylbicyclo [4, 1, 0]
heptane (IVc).

22. Essential Oils of Artemisia species in Kashmir Himalaya
Artemisia moorcroftiana Wall
Artemisia laciniata Wild
Artemisia salsoloides Will
Artemisia persica Boiss
Artemisia vestita Wall
Conclusion

23. Cultivation and Utilization of Kaempferia galanga L.
Botany
Crop Improvement
Crop Management
Extraction of Essential Oil
Physico chemical Properties of Oil
Utilisation

24. Cultivation and Improvement of Sweet Marjoram
Floristics and Crop Improvement
(i) Floristics
(ii) Studies on Floral Biology
(iii) Crop Improvement
Crop Production and Management.
(a) Soil and Climate
(b) Propagation
(c) Studies on Nutrient and Spacing
(d) Use of Growth Regulators
(e) Crop Rotation/Sequencing and Inter crops
(f) Irrigation and Inter culture
(g) Insect Pests and Diseases
(h) Harvesting, Production of Essential Oil and Yield
(i) Chemistry of Oil

25. Cultivation of Davana for Essential Oil
Introduction
Botany
Floral biology
Climate
Soil
Nursery raising
Transplanting
Manures and fertilizers
Irrigation
Interculture
Growth regulator application
Plant protection
Insect pests
Diseases
Harvesting
Distillation
Yield and Oil content
Chemical Constituents
Physico chemical characteristics of davana

26. Essential Oil of Hyptis Suaveolens Poit
   Antimicrobial Efficacy of the Essential Oil of H. suaveolens
   (ii) Phytotoxic Behaviour of the Oil
   (iii) Chemical Constituents of the Oil
Conclusions

27. Tagetes minuta (Wild Marigold)
   An Economic Crop for Hilly Regions
   Introduction
   Crop Management
   Harvesting and Distillation
   Quality Evaluation
   Uses of Tagetes Oil
   Research Needs

28. Present Status of Jamrosa A Review
   Cultivation
   Areas Under Cultivation and Marketing Prospects

29. Cultural Practices of CKP 25
   (Lemongrass) under Irrigated conditions
   Introduction
   Effect of Date of Plantings
   Effect of Different Spacing Combinations
   Effect of Nitrogen Levels
   Recommendations

30. Development of New Cultivars of Cymbopogons as
    Source of Terpene Chemicals

31. Indian Cymbopogons Botany, Agrotechnology,
    Utilization, Constraints and Future Scope
   Botany
   Morphology
   Taxonomic Position

37. Scope for Commercial Cultivation of Aromatic Plants in Upper Pulney Hills

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the inputs in their research.

NIIR PROJECT CONSULTANCY SERVICES, 106-E, Kamla Nagar, New Delhi-110007, India. Email: npcs.india@gmail.com Website: NIIR.org
