Aromatic plants have essential or aromatic oils naturally occurring in them. They help heal mental ailments and other diseases. India is endowed with a rich wealth of medicinal plants. Aromatic (Aroma Producing) plants are those plants which produce a certain type of aroma. Their aroma is due to the presence of some kind of essential oil with chemical constituents that contain at least one benzene ring in the their chemical configuration. The chemical nature of these aromatic substances may be due to a variety of complex chemical compounds. These plants have made a good contribution to the development of ancient Indian material medica. In recent years, there has been a tremendous growth of interest in plant based drugs, pharmaceuticals, perfumery products, cosmetics and aroma compounds used in food flavors and fragrances and natural colors in the world. There is a definite trend to adopt plant based products due to the cumulative derogatory effects resulting from the use of antibiotic and synthetics and except for a few cultivated crops, the availability of plant based material is mainly from the natural sources like forests and wastelands. There is a need to introduce these crops into the cropping system of the county, which, besides meeting the demands of the industry, will also help to maintain the standards on quality, potency and chemical composition. During the past decade, demand for aromatic plants and its products has attracted the worldwide interest, India being the treasure house of biodiversity, accounts for thousands of species which are used in herbal drugs. 90% of herbal industry requirement of raw material is taken out from the forests.

Some fundamentals of this book are botanical description of the plant, genetic improvement, harvesting, intercropping, transplantation, irrigation and weeding, vanilla cultivation in India, commercial cultivation of vanilla, distillation of herbage for essential oil, effect of growth hormones, jasmine crop improvement & agrotechniques, efforts for new variety of Jasminum auriculatum, essential oils of agarwood, Cinnamomum tamala leaves, Eucalyptus citriodora and Cautheria pragrantissima, past and future of sandal wood oil industry, by product development from turmeric and ginger rhizomes, isolation of essential oils and its flavour profile etc.

This book contains most of the important aspects related to aromatic plants. It is being published for those who are interested in growing, processing and trading of aromatic plants.

Contents

1. Cultivation of Tagetes Minuta
   Botanical description of the plant
   Genetic improvement
   Agrotechnology
   Soil and climate
   Propagation
   Weed control
   Fertilizers and manures
   Irrigation
   Harvesting
   Intercropping
   Crop rotations
   Diseases
   Distillation
   Chemistry
   Distillation unit design availability

2. Cultivation of Eucalyptus Citriodora
   Description of the plant
   Cultivation
   Soil and Climate
   Preparation of Land
   Propagation
   Nursery
   Transplanting
   Weeding
   Manures and Fertilizers
   Harvesting
   Pests and Diseases
   Distillation
   Yield
   Chemical Constituents
   Uses

3. Cultivation of Rosmarinus Officinalis
   Introduction
   Description of the plant
   Cultivation
   Soil and Climate
   Propagation
   Transplanting, interculture and fertilizer application
4. Cultivation of Coriander Sativum
Description of the Plant
Cultivation
Soil and Climate
Propagation
Irrigation
Harvesting
Pests and Diseases
Distillation
Yield
Chemical Constituents
Uses
Economics of Cultivation

5. Cultivation of Lavender Species
Botany
Soil and Climate
Cultivation
Propagation
Propagation By Seeds
Transplantation
Fertilizer Application
Weeding
Regeneration
Harvesting
Distillation
Oil Content and Oil Yield
Chemical Constituents
Uses
Economics of Cultivation

6. Cultivation of Matricaria Chamomilla
Description of the Plant
Genetics
Cultivation
Soil and climate
Propagation/nursery
Transplantation, irrigation and weeding
Cropping sequence
Pests and diseases
Manures and fertilizers
Harvesting
Collection of seeds
Yield
Drying and storage
Distillation
Yield and characteristics of the oil
Uses
Specification of the drug
Economics of cultivation

7. Vanilla  World’s second most expensive spice
Vanilla Flower
Vanilla Beans
Vanilla cultivation in India
Commercial Cultivation of Vanilla
Vanilla Extract and Flavourings
Commercial uses of Vanilla
Market for Vanilla
Exports grades and standards

8. Cultivation of Artemisia Annua
Description of the plant
Soil and climate
Propagation
Weed control
Fertilizers and manures
Irrigation
Harvesting
Chemistry and uses
Distillation
Economics of cultivation

9. Cultivation of Mentha Arvensis
Plant descriptors
Available cultivars of menthol mint
Choice of place for cultivation
Land preparation
Preparation of planting material
Production of suckers
Production of seedlings
Planting of suckers in the field
Fertilizer application
Irrigation and drainage
Interculture and weed control
Crop rotation
Intercropping
Harvesting
Yield
Storage of herbage
Pests and diseases
Insect pests
Diseases
Distillation of herbage for essential oil
Directly fired distillation tank
Design availability
Use of mint oil and its derivatives
Economics of cultivation
10. Cultivation of French Basil (Ocimum Bacialicum L.)
   1. European Type
   2. Reunion Type
   3. Methyl Cinnamate Type
   4. Eugenol Type

Botany
Soil and Climate
Field preparation
Propagation
   (a) Raising of Nursery
   (b) Planting
Irrigation
Fertiliser Application
Interculture
Harvesting and Yield
Agronomical Studies
Physiological Studies
Heavy metal tolerance
Effect of growth hormones
Mineral contents
Seed mucilage studies
Effect of photoperiodism
Biosynthesis of Eugenol
Tissue Culture Studies
Genetical Studies
Chemical Composition
Uses
Cosmetic
Food
Folk medicine
Ayurvedic Properties

11. Jasmine Crop improvement & agrotechniques
New varieties of jasmine
   Arka Surabhi
   Arka Arpan
   Efforts for new vatiety of Jasminum auriculatum
for extraction of essential oil
Constituent of Jasmine essential oil
Agronomy
Plant protection
Water saving, labour saving low cost device for
   propagation of plant cuttings
Details of the device
Required materials for the device
Detailed method
Economic viability of growing jasmine for essential oil

Introduction
Chemistry of Nuts
13. Himalayan Cedarwood Oil
   Essential oil of Deodar (Cedrus Deodara)
   Essential oil of Juniperus Recurva var. Squamata and
   other oils of Juniperus spp.
   Agarwood and Oil Agarwood
   Uses

14. Essential oils of Agarwood, Cinnamomum Tamala Leaves,
   Eucalyptus Citriodora and Caultheria Pragantissima
   Distillation
   Gaultheria
   Eucalyptus

15. Past and Future of Sandal wood Oil Industry
   Plantation and Harvesting
   Disease Control
   Distillation of Oil
   Packing
   Problems and their Solutions
   Adulteration
   Future Prospects
   Kewda Industry in Orissa

16. Production Technology and Package of Practices in Chilli
    Cultivated Species of Capsicum
    Constraints in Chilli Production
    Technologies Developed
    Disease and Disease Management
    Marketing in Chilli
    Value Addition in Chilli

17. By Product Development from Turmeric and Ginger Rhizomes
    Introduction
    By Product Development in Turmeric
    Curcumin
    Turmeric Essential Oils
    Isolation of Essential Oils and its Flavour Profile
    By product Development in Ginger
    Survey of Raw Material
    Essential oils
    Oleoresin
    Gingerol in Ginger Oleoresin
    Starch
    Protein
    Crude Fibre
    Commercial Extraction of Ginger Oleoresin
    Process Description for Oleoresins
    Oleoresin Quality
    Flavour Quality of Ginger Oleoresins
    Essential Oils of Ginger
    Profile of Flavour in Ginger Cultivars

18. Synthesis of 4 Acye 3, 7,7 Trimethylbicyclo [4, 1, 0]
Results and Discussions

1. Synthesis of 4 acetyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene and its position isomers (II).

Experimental

Fractionation of Turpentine Oil for Isolation of 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene ((+)-Car 3 ene (I)).

4. Acetyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene and its position isomers (II).

Separation of IIa, and IIc by Column Chromatography.

4. Acetyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 2 ene (IIb)

3 Methylene 4 acetyl 7, 7 dimethylbicyclo [4, 1, 0] heptane (IIc)

4. Propionyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene and position isomers (III).

Separation of IIIa, IIIb and IIIc by column Chromatography.

4. Propionyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene (IIIa).

3 Methylene 4 propionyl 7, 7 dimethylbicyclo [4, 1, 0] heptane (IIIc).

4. Butyryl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene and its position isomers (IV).

Separation of IVa, IVb and IVc by column chromatography.

4. Butyryl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene (IVa).

3 Methylene 4 butyryl 7, 7 dimethylbicyclo [4, 1, 0] heptane (IVc).

19. Free and Glycosidically bound volatiles of Clove (Eugenia caryophyllata)

Experimental Procedures

Capillary Gas Chromatographic Analysis

Results
Soil Fertility and Nutrient Management
Irrigation
Bush Pepper
Diseases
Pests
Harvesting
Cardamom
Mainfield Planting
Varieties
Propagation
Diseases
Pests
Clove
Climate and Soil
Varieties
Planting Material
Planting
Manuring
Diseases
Pests
Nutmeg
Cultural Practices

21. Bunium persicum (Boiss.) Fedtsch Botany, Conservation Strategies and Cultivation
Botanical Description of Plant
Climate and Distribution
Reasons and Remedies for Dwindling Population of B. persicum in Nature
Phenotypic Variability
Climate
Soil Type
Preparation of Land
Plantation

(i) Plantation Through Seeds
(ii) Plantation Through Tuberous Roots
Spacing
Method of Plantation
Manuring
Weeding
Irrigation
Harvesting
Intercropping
Pests and Diseases of Kala Zira Crop
Experimental Studies for the Propagation of
Planting Material Under Laboratory Conditions
Regeneration Through Tissue Culture
Economics of the Crop
Conclusion

22. Essential Oils of Artemisia species in Kashmir Himalaya
Artemisia moorcroftiana Wall
Artemisia laciniata Wild
Artemisia salsoloides Will
Artemisia persica Boiss
Artemisia vestita Wall
Conclusion

23. Cultivation and Utilization of Kaempferia galanga L.
Botany
Crop Improvement
Crop Management
Extraction of Essential Oil
Physico chemical Properties of Oil
Utilisation

24. Cultivation and Improvement of Sweet Marjoram
Floristics and Crop Improvement
(i) Floristics
(ii) Studies on Floral Biology
(iii) Crop Improvement
Crop Production and Management.
(a) Soil and Climate
(b) Propagation
(c) Studies on Nutrient and Spacing
(d) Use of Growth Regulators
(e) Crop Rotation/Sequencing and Inter crops
(f) Irrigation and Inter culture
(g) Insect Pests and Diseases
(h) Harvesting, Production of Essential Oil and Yield
(i) Chemistry of Oil

25. Cultivation of Davana for Essential Oil
Introduction
Botany
Floral biology
Climate
Soil
Nursery raising
Transplanting
Manures and fertilizers
Irrigation
Interculture
Growth regulator application
Plant protection
Insect pests
Diseases
Harvesting
Distillation
Yield and Oil content
Chemical Constituents
Physico chemical characteristics of davana

26. Essential Oil of Hyptis Suaveolens Poit
Antimicrobial Efficacy of the Essential Oil of H. suaveolens
(ii) Phytotoxic Behaviour of the Oil
(iii) Chemical Constituents of the Oil
Conclusions

27. Tagetes minuta (Wild Marigold)
An Economic Crop for Hilly Regions
Introduction
Crop Management
Harvesting and Distillation
Quality Evaluation
Uses of Tagetes Oil
Research Needs

28. Present Status of Jamrosa  A Review
Cultivation
Areas Under Cultivation and Marketing Prospects

29. Cultural Practices of CKP 25
(Lemongrass) under Irrigated conditions
Introduction
Effect of Date of Plantings
Effect of Different Spacing Combinations
Effect of Nitrogen Levels
Recommendations

30. Development of New Cultivars of Cymbopogons as
Source of Terpene Chemicals

31. Indian Cymbopogons Botany, Agrotechnology,
Utilization, Constraints and Future Scope
Botany
Morphology
Taxonomic Position
Distribution
Cytological Studies
*Chromosome Number
32. Growth and Performance of Cymbopogon citratus Stapf., the West Indian Lemongrass and Cymbopogon pendulus (Nees ex Steud.) Wats., the Jammu Lemongrass in West Bengal

Result and Discussion
Intraspecific Variation:
Interspecific Variation:

33. Indian Turpentine Oil as a Raw Material for Terpene Chemicals
Production of Oil of Turpentine
Utilization of Oil of Turpentine
Constituents of Oil of Turpentine and their Derivatives

34. Cultivation of Musk Mallow in Jammu
Introduction

35. Morpho Economic Features of Burma Citronella (Cymbopogon winterianus Jowitt)
Introduction
Discussion

36. Oxidation of Y Terpinene and Isolongifolene with t Butyl chromate
Oxidation of terpinene (I)
Oxidation of isolongifolene (VI)

37. Scope for Commercial Cultivation of Aromatic Plants in Upper Pulney Hills

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
