Aromatic plants have essential or aromatic oils naturally occurring in them. They help heal mental ailments and other diseases. India is endowed with a rich wealth of medicinal plants. Aromatic (Aroma Producing) plants are those plants which produce a certain type of aroma. Their aroma is due to the presence of some kind of essential oil with chemical constituents that contain at least one benzene ring in their chemical configuration. The chemical nature of these aromatic substances may be due to a variety of complex chemical compounds. These plants have made a good contribution to the development of ancient Indian material medica. In recent years, there has been a tremendous growth of interest in plant based drugs, pharmaceuticals, perfumery products, cosmetics and aroma compounds used in food flavors and fragrances and natural colors in the world. There is a definite trend to adopt plant based products due to the cumulative derogatory effects resulting from the use of antibiotic and synthetics and except for a few cultivated crops, the availability of plant based material is mainly from the natural sources like forests and wastelands. There is a need to introduce these crops into the cropping system of the county, which, besides meeting the demands of the industry, will also help to maintain the standards on quality, potency and chemical composition. During the past decade, demand for aromatic plants and its products has attracted the worldwide interest, India being the treasure house of biodiversity, accounts for thousands of species which are used in herbal drugs. 90% of herbal industry requirement of raw material is taken out from the forests.

Some fundamentals of this book are botanical description of the plant, genetic improvement, harvesting, intercropping, transplantation, irrigation and weeding, vanilla cultivation in india, commercial cultivation of vanilla, distillation of herbage for essential oil, effect of growth hormones, jasmine crop improvement & agrotechniques, efforts for new vatiety of jasmine auriculatum, essential oils of agarwood, cinnamomum tamala leaves, eucalyptus citriodora and cautheria pragrantissima, past and future of sandal wood oil industry, by product development from turmeric and ginger rhizomes, isolation of essential oils and its flavour profile etc.

This book contains most of the important aspects related to aromatic plants. It is being published for those who are interested in growing, processing and trading of aromatic plants.

Contents

1. Cultivation of Tagetes Minuta
   - Botanical description of the plant
   - Genetic improvement
   - Agrotechnology
   - Soil and climate
   - Propagation
   - Weed control
   - Fertilizers and manures
   - Irrigation
   - Harvesting
   - Intercropping
   - Crop rotations
   - Diseases
   - Distillation
   - Chemistry
   - Distillation unit design availability

2. Cultivation of Eucalyptus Citriodora
   - Description of the plant
   - Cultivation
   - Soil and Climate
   - Preparation of Land
   - Propagation
   - Nursery
   - Transplanting
   - Weeding
   - Manures and Fertilizers
   - Harvesting
   - Pests and Diseases
   - Distillation
   - Yield
   - Chemical Constituents
   - Uses

3. Cultivation of Rosmarinus Officinalis
   - Introduction
   - Description of the plant
   - Cultivation
   - Soil and Climate
   - Propagation
   - Transplanting, interculture and fertilizer application
   - Irrigation
   - Harvesting
   - Pests and diseases and their control
   - Distillation
   - Oil content and yield
   - Chemical constituents
4. Cultivation of Coriander Sativum
Description of the Plant
Cultivation
Soil and Climate
Propagation
Irrigation
Harvesting
Pests and Diseases
Distillation
Yield
Chemical Constituents
Uses
Economics of Cultivation

5. Cultivation of Lavender Species
Botany
Soil and Climate
Cultivation
Propagation
Propagation By Seeds
Transplantation
Fertilizer Application
Weeding
Regeneration
Harvesting
Distillation
Oil Content and Oil Yield
Chemical Constituents
Uses
Economics of Cultivation

6. Cultivation of Matricaria Chamomilla
Description of the Plant
Genetics
Cultivation
Soil and climate
Propagation/nursery
Transplantation, irrigation and weeding
Cropping sequence
Pests and diseases
Manures and fertilizers
Harvesting
Collection of seeds
Yield
Drying and storage
Distilation
Yield and characteristics of the oil
Uses
Specification of the drug
Economics of cultivation

7. Vanilla  World s second most expensive spice
Vanilla Flower  
Vanilla Beans  
Vanilla cultivation in India  
Commercial Cultivation of Vanilla  
Vanilla Extract and Flavourings  
Commercial uses of Vanilla  
Market for Vanilla  
Exports grades and standards

8. Cultivation of Artemisia Annua  
Description of the plant  
Soil and climate  
Propagation  
Weed control  
Fertilizers and manures  
Irrigation  
Harvesting  
Chemistry and uses  
Distillation  
Economics of cultivation

9. Cultivation of Mentha Arvensis  
Plant descriptors  
Available cultivars of menthol mint  
Choice of place for cultivation  
Land preparation  
Preparation of planting material  
Production of suckers  
Production of seedlings  
Planting of suckers in the field  
Fertilizer application  
Irrigation and drainage  
Interculture and weed control  
Crop rotation  
Intercropping  
Harvesting  
Yield  
Storage of herbage  
Pests and diseases  
Insect pests  
Diseases  
Distillation of herbage for essential oil  
Directly fired distillation tank  
Design availability  
Use of mint oil and its derivatives  
Economics of cultivation

10. Cultivation of French Basil (Ocimum Bacilicum L.)  
1. European Type  
2. Reunion Type  
3. Methyl Cinnamate Type  
4. Eugenol Type
Botany
Soil and Climate
Field preparation
Propagation
(a) Raising of Nursery
(b) Planting
Irrigation
Fertiliser Application
Interculture
Harvesting and Yield
Agronomical Studies
Physiological Studies
Heavy metal tolerance
Effect of growth hormones
Mineral contents
Seed mucilage studies
Effect of photoperiodism
Biosynthesis of Eugenol
Tissue Culture Studies
Genetical Studies
Chemical Composition
Uses
Cosmetic
Food
Folk medicine
Ayurvedic Properties

11. Jasmine Crop improvement & agrotechniques
New varieties of jasmine
Arka Surabhi
Arka Arpan
Efforts for new variety of Jasminum auriculatum
for extraction of essential oil
Constituent of Jasmine essential oil
Agronomy
Plant protection
Water saving, labour saving low cost device for
propagation of plant cuttings
Details of the device
Required materials for the device
Detailed method
Economic viability of growing jasmine for essential oil

Introduction
Chemistry of Nuts

13. Himalayan Cedarwood Oil
Essential oil of Deodar (Cedrus Deodara)
Essential oil of Juniperus Recurva var. Squamata and
other oils of Juniperus spp.
Agarwood and Oil Agarwood
Uses
14. Essential oils of Agarwood, Cinnamomum Tamala Leaves, Eucalyptus Citriodora and Caultheria Pragrantissima
Distillation
Gaultheria
Eucalyptus

15. Past and Future of Sandal wood Oil Industry
Plantation and Harvesting
Disease Control
Distillation of Oil
Packing
Problems and their Solutions
Adulteration
Future Prospects
Kewda Industry in Orissa

16. Production Technology and Package of Practices in Chilli
Cultivated Species of Capsicum
Constraints in Chilli Production
Technologies Developed
Disease and Disease Management
Marketing in Chilli
Value Addition in Chilli

17. By Product Development from Turmeric and Ginger Rhizomes
Introduction
By Product Development in Turmeric
Curcumin
Turmeric Essential Oils
Isolation of Essential Oils and its Flavour Profile
By product Development in Ginger
Survey of Raw Material
Essential oils
Oleoresin
Gingerol in Ginger Oleoresin
Starch
Protein
Crude Fibre
Commercial Extraction of Ginger Oleoresin
Process Description for Oleoresins
Oleoresin Quality
Flavour Quality of Ginger Oleoresins
Essential Oils of Ginger
Profile of Flavour in Ginger Cultivars

18. Synthesis of 4 Acye 3, 7,7 Trimethylbicycle [4, 1, 0]
Hept 3 ene and Related Compounds by Friedel Crafts
Results and Discussions
1. Synthesis of 4 acetyl 3, 7, 7 trimethylbicycle [4, 1, 0]
   hept 3 ene and its position isomers (II).
2. Synthesis of 4 propionyl 3, 7, 7 trimethylbicycle [4, 1, 7]

Experimental

Fractionation of Turpentine Oil for Isolation of 3, 7, 7 Trimethylbicyclo [4, 1, 0] hept 3 ene (+(+) Car 3 ene (I)).

4. Acetyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene and its position isomers (II).

Separation of IIa, and IIc by Column Chromatography.

4. Acetyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 2 ene (IIb)

3. Methylene 4 acetyl 7, 7 dimethylbicyclo [4, 1, 0] heptane (IIc)

4. Propionyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene and position isomers (III).

Separation of IIIa, IIIb and IIIc by column Chromatography.

4. Propionyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene (IIIa).

4. Propionyl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 2 ene (IIIb).

3. Methylene 4 propionyl 7, 7 dimethylbicyclo [4, 1, 0] heptane (IIIC).

4. Butyryl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene and its position isomers (IV).

Sederation of IVa, IVb and IVc by column chromatography.

4. Butyryl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 3 ene (IVa).

4. Butyryl 3, 7, 7 trimethylbicyclo [4, 1, 0] hept 2 ene (IVb).

3. Methylene 4 Butyryl 7, 7 dimethylbicyclo [4, 1, 0] heptane (IVc).

19. Free and Glycosidically bound volatiles of Clove (Eugenia caryophyllata)

Experimental Procedures

Capillary Gas Chromatographic Analysis

22. Essential Oils of Artemisia species in Kashmir Himalaya
   Artemisia moorcroftiana Wall
   Artemisia laciniata Wild
   Artemisia salsoloides Will
   Artemisia persica Boiss
   Artemisia vestita Wall
Conclusion

23. Cultivation and Utilization of Kaempferia galanga L.
   Botany
   Crop Improvement
   Crop Management
   Extraction of Essential Oil
   Physico chemical Properties of Oil
   Utilisation

24. Cultivation and Improvement of Sweet Marjoram
   Floristics and Crop Improvement
   (i) Floristics
   (ii) Studies on Floral Biology
   (iii) Crop Improvement
   Crop Production and Management.
   (a) Soil and Climate
   (b) Propagation
   (c) Studies on Nutrient and Spacing
   (d) Use of Growth Regulators
   (e) Crop Rotation/Sequencing and Inter crops
   (f) Irrigation and Inter culture
   (g) Insect Pests and Diseases
   (h) Harvesting, Production of Essential Oil and Yield
   (i) Chemistry of Oil

25. Cultivation of Davana for Essential Oil
   Introduction
   Botany
   Floral biology
   Climate
   Soil
   Nursery raising
   Transplanting
   Manures and fertilizers
   Irrigation
   Interculture
   Growth regulator application

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.
