

# The Complete Book on Ferrous, Non-Ferrous Metals with Casting and Forging Technology

**Author:** NIIR Board of Consultants and Engineers

**Format:** Paperback

**ISBN:** 9789381039014

**Code:** NI148

**Pages:** 504

**Price:** Rs. 1,575.00 **US\$** 150.00

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

The Casting and Forging product is playing a greater role in our everyday lives and is essential than it has ever been. The Casting and Forging industry fortunes is largely dependent on the level of activity within the construction (building and non-building) and automotive sectors. Ferrous and non ferrous metals and its alloys accounts for a large portion of all metal production. Metal ingots and billets are formed by a casting process. The Casting process has traversed a long path and impacted human civilization for nearly five millennia. For any metal casting process, selection of right alloy, size, shape, thickness, tolerance, texture, and weight is very vital. Casting process involves melting the metal to be used, pouring it into a mould, letting it cool and then knocking out the casting. On the other hand, forging is one of the oldest known metal working processes. Forging technology occupies a very important place among all the manufacturing processes as it produces parts with excellent properties and with minimal wastage. Forging involves the use of machinery with a hammering or pressing action to convert basic shapes into a pre-determined form. Forging has the capacity to refine the grain structure and improve the physical properties of the metal. Forging products are consistent, without the defects of porosity, inclusion or voids, and finishing operations like machining, coining, sizing, straightening or surface treatments can also be easily done. This handbook gives a concise description of the fascinating on the state-of-the-art technology of the casting and forging process of metals and metal alloys. This book contains precise details on production of ferrous and non ferrous metals, its casting and forging process along with their alloys. It is hoped that this book will find very helpful to all its readers who are just beginners in this field and will also find useful for existing industries, technocrats, technical institutions, etc.

## Contents

### CHAPTER 1

Production of Ferrous Metals

Production of Pig Iron

Blast Furnace

Direct Reduction

- Furnaces for Steel making and Iron making
  - Basic Oxygen Furnace
  - Electric Furnace
  - Open-Hearth Furnace
  - Cupola
  - Steel Ingots and Strand Casting
  - Refining Furnaces and Vessels
  - Crucible
  - Induction
  - Melting in a Vacuum and Special Atmospheres
  - AOD Process
  - Energy Referred for Melting
- Ferrous Metals
  - Wrought Iron
  - Steel
    - Carbon Steel
    - Alloy Steel
    - Stainless Steels
  - Cast Iron
  - Effects of chemical elements on cast iron
    - Carbon
    - Silicon
    - Manganese
    - Sulfur
    - Phosphorus

## CHAPTER 2

- Casting Design, Materials and Economics
  - Introduction
  - Design Considerations
    - Designing for expendable-mold casting
    - Corners, angles, and section thickness
    - Flat areas
    - Shrinkage
    - Parting line
    - Draft
    - Tolerances
    - Machining allowance
    - Residual stress
  - Designing for permanent-mold casting
  - Casting Alloys
    - Nonferrous casting alloys
    - Ferrous casting alloys
  - Economics of casting

## CHAPTER 3

- Production of Non-Ferrous Metals
  - Properties
  - Non-Ferrous Metals
    - Smelting
    - Furnaces for Non-Ferrous Smelting
  - Production of Aluminium
  - Production of Magnesium

Production of Copper  
Production of Lead  
Casting Non-Ferrous Materials  
Wrought Alloys  
Aluminium Alloys  
Copper Alloys  
Magnesium Alloys  
Die-Casting Alloys  
Zinc Base Alloys  
Aluminium Base Alloys  
Copper Base Alloys  
Lead Base Alloys  
Tin Base Alloys  
Continuous Casting of Aluminium

#### CHAPTER 4

Welding and Joining Processes  
Fundamentals of a Welding System  
Design fundamental of welded joints  
ARC Welding Processes  
Carbon Electrode Welding  
Metal Electrode Welding  
Electrode coating  
Atomic Hydrogen Arc Welding  
Inert-Gas Shielded-Arc Welding  
Arc spot Welding  
Submerged Arc Welding  
Stud Arc Welding  
Electroslag Welding  
Resistance Welding Processes  
Spot Welding  
Projection Welding  
Seam Welding  
Butt Welding  
Flash Welding  
Percussion Welding  
    High-Frequency Resistance Welding  
Oxyfuel Gas Welding Processes  
Oxyacetylene Welding  
Oxyhydrogen Welding  
Air Acetylene Welding  
Pressure Gas Welding  
Solid-State Welding processes  
Cold Welding  
Ultrasonic Welding  
Explosive Welding  
Diffusion Welding  
Forge Welding  
Friction Welding  
Special Welding Process  
Induction Welding  
Electron Beam Welding  
Laser Welding

Flow Welding  
Welding Quality and Safety  
Other Joining Processes  
Soldering  
Brazing  
Adhesive Bonding  
Allied Processes  
Oxyacetylene Torch Cutting  
Transferred-Arc Cuttings

## CHAPTER 5

Finish Processes  
Mechanical Surface Preparation  
Blast Finishing  
Process control  
Chemical Surface Preparation  
Water Rinsing  
Drain  
Dragout  
Concentration in the Tank  
Concentration in the Rinse.  
Flow  
Equilibrium and Effectivity  
Multiple Rinsing  
Plating Procedure  
Automatic Control  
Brush Plating  
Metalizing Nonconductors  
Metalizing Processes  
Catalytic Deposition  
Metal Deposition Design Considerations  
Time and Tank Capacity Determination  
Thickness Testing  
Other Metallic Coatings  
Electroplating  
Chrome Plating  
Galvanizing  
Tin Coating  
Other Plating Metals  
Parkerizing  
Anodizing  
Colorizing  
Hard Surfacing

## CHAPTER 6

The Crystalline Structure of Metals  
Space Lattices  
Lattice Constant  
Metallic Bond  
Allotropic Changes  
Atomic Planes  
Crystallographic Anisotropy  
Cooling Curve

Metallic Dendrite  
Dendrite Growth  
Crystal Boundary  
Grain Shape and Size  
Astm Grain Size  
Phases in Metals  
Intermetallic compounds  
Solid Solutions  
Physical Properties of Metals  
Three Kinds of Stress  
Engineering Stress and true Stress  
Engineering Strain and True Strain  
Engineering Stress strain Diagrams  
True Stress-strain Diagram  
Idealized Stress-Strain Diagrams  
Derivative Types of Stress  
Ductility  
Strain Rate  
Compression Test  
Tersion Test  
Combined Deformation Tests  
Hardness Tests  
Hardness Versus Strength  
Hardenability Test  
Dynamic Impact Test  
Toughness  
Heat Resistance  
Thermal Conductivity  
Specific Heat  
Density  
Thermal Diffusivity  
Thermal Expansion  
Thermal Emissivity  
Corrosion Resistance  
Electrical Resistivity  
Magnetic Properties  
Malleability and Machinability  
Wear Resistance  
Classification of Steels and Alloys  
Major Classifications and Specifications  
Unified Numbering System  
AISI-SAE Designation System  
Carbon Steels  
Alloy Steels  
Tools Steels  
Stainless Steels  
Electrical Sheet Steels  
Heat Resisting Alloys

## CHAPTER 7

Conditioning Semi-Finished Products  
Introduction  
Ingot Defects

Surface Defects Originating in Soaking Pits  
Defects Resulting From Hot-Rolling  
Practices  
The Classification of Surface Defects for Conditioning  
Method of Surface-Defect Detection  
The Mechanical Removal of Surface Defects  
Conditioning by Scarfing

## CHAPTER 8

Structural Mills  
Introduction  
The Evaluation of Structural Mills  
Universal Beam Mills  
Modern Structural Mills for Rolling Large Beams  
Modern Mills for Medium Sections

## CHAPTER 9

The Reheating of Ingots  
Introduction  
The General Layout and Design of Soaking-Pit Facilities  
Gaseous Fuels and Burners used in Soaking Pits  
The Use of Oil for Heating Soaking Pits  
Heat Recovery in Soaking -Pit Operations  
Two-Way Fired Soaking Pits  
One Way Fired Soaking Pits  
Bottom Center-Fired of Vertically Fired Pits  
Circular Pits  
Electric Soaking Pits  
Pit Covers and Seals  
Automatic Controls for Soaking Pits  
Handling the Ingots by Crane Tongs

## CHAPTER 10

Forging  
Introduction  
Open-Die Forging  
Cogging  
Precision Forging  
Forging Force  
Coining  
Related Forging Operations  
Heading  
Piercing  
Other Operations  
Rotary Swaging  
Forging-Die Design  
Die Material and Lubrication Forgeability  
Forging Machines  
Presses  
Mechanical Presses  
Screw Presses  
Hammers  
Counterblow Hammers

High-Energy-Rate Machines  
Selection of Forging Machines  
Forging Practice and Process Capabilities  
Automation in Forging  
Economics of Forging

## CHAPTER 11

Metal Casting processes  
Introduction  
Sand Casting  
Types of Sand Molds  
Patterns  
Cores  
Sand Molding Machines  
Sand Casting operation  
Shell Mold Casting  
Composite molds  
Sodium silicate process  
Rammed graphite molding  
Expandable pattern casting (lost Foam)  
Plaster Mold casting  
Ceramic Mold Casting  
Investment Casting  
Vacuum Casting  
Permanent Mold Casting  
Slush Casting  
Pressure Casting  
Die Casting  
Hot Chamber process  
Cold chamber process  
Process capabilities and machines selection  
Centrifugal Casting  
Squeeze Casting and Semisolid Metal Forming  
Squeeze casting  
Semisolid metal forming  
Casting Technique for Single Crystal component  
Rapid solidification (Amorphous alloys)  
Inspection of castings  
Melting practice and furnaces

## CHAPTER 12

Foundry Processes  
Sand casting and Molding procedures  
Green Sand Mold  
Loam Mold  
Furfuryl Alcohol Binder Molds  
CO<sub>2</sub> Molds  
Skin Dried Molds  
Dry Sand Molds  
Metals and Special Molds  
Gating System and Solidification Characteristics  
Patterns  
Allowances

Removable patterns  
Sand Technology  
Mold and Core Hardness Test  
Fineness  
Test for moisture Content  
Clay content Test  
Permeability Test  
Sand conditioning  
Cores  
Green Sand Cores  
Dry sand Cores  
Core Making  
Binders and Core Mixtures  
Molding Equipment  
Jolt Machine  
Squeezer Machine  
Jolt Squeeze Machine  
Sandslinger  
Diaphragm Molding Machine  
Pouring and cleaning castings

#### CHAPTER 13

Tube Mills  
Introduction  
Typical Skelp Mill  
The production of continuous butt-welded pipe  
The production of electric-resistance-welded tubing and electric-welded large-diameter pipe  
The production of seamless shells or Bottles by Direct Punching  
Rotary Piercing machines  
Rotary Rolling Mills  
The Plug Rolling Mill  
Reeling  
The Mandrel Mill  
Sizing and Stretch Mills  
The Pilger Mill  
Other Type of Mills Used in The Production Of Tubes  
The Diescher Mill  
Modern Seamless Tube-Making Facilities

#### CHAPTER 14

The cooling of Mill Rolls  
Introduction  
Heat Conduction equations  
Solution to Transient Heat Conduction Problems  
Mathematical Models Pertaining to Transient Heat Flow in Work Rolls  
Measured One-Dimensional Temperature Patterns in Mill Rolls  
Predicating the Roll Surface Temperature Rise in The Roll Gap  
The Water Cooling of Rolls and Measurement of Heat Transfer Coefficients  
Sprays and Their Placement for Optimum Roll Cooling

#### CHAPTER 15

Extrusion and Drawing  
Introduction

Extrusion Force  
Metal Flow in Extrusion  
Extrusion Practice  
Hot Extrusion  
Die Design and Materials  
Lubrication  
Cold Extrusion  
Impact Extrusion  
Extrusion Defects  
Surface cracking  
Pipe  
Internal Cracking  
Extrusion Equipment  
The Drawing Process  
Drawing Practice  
Die design  
Die Materials  
Lubrication  
Defects and Residual Stresses  
Drawing Equipment

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
