Natural dyes are dyes or colorants derived from plants, invertebrates, or minerals. The majority of natural dyes are vegetable dyes from plant sources. Dyeing is the process of imparting colors to a textile material. Different classes of dyes are used for different types of fiber and at different stages of the textile production process, from loose fibers through yarn and cloth to completed garments. There are technologies that manufacture the pigments for plastics, rubber and cosmetics. Therefore; dyes and pigments have a vast area of applications and have a huge demand in industry. Contrary to popular opinion, natural dyes are often neither safer nor more ecologically sound than synthetic dyes. They are less permanent, more difficult to apply, wash out more easily, and often involve the use of highly toxic mordant. Of course, the colour possibilities are far more limited; the color of any natural dye may be easily copied by mixing synthetic dyes, but many other colors are not easily obtained with natural dyes. However, some mordant are not very toxic, and the idea of natural dyestuffs is aesthetically pleasing. Applying natural dyes in your fabric production using enzymes will reduce your production cost and improve control. There are various kind of natural dyes; quinonoid dyes, cyanine dyes, azo dyes, biflavonyl dyes, omochromes, anthraquinone, coprosma geseus etc. The use of natural dyes in cloth making can be seen as a necessary luxury to trigger off a change in habits. Dyes which stand out for their beauty and ecological attributes would never be employed on just any material but on noble fabrics such as wool, silk, linen or cotton, made to last more than one season. Market value will benefit from consumer preferences for environmentally friendly products, which will support consumption of high performance dyes and organic pigments.

This book basically deals with the use of carotenoids as food colours, bianthraquinones and related compounds, intermediate degradation products of biflavonols, dyestuffs containing nuclear sulphonnic and carboxylic acid groups, quinonoid dyes, cyanine dyes, azo dyes, biflavonyl dyes, omochromes, anthraquinone, coprosma geseus etc. The use of natural dyes in cloth making can be seen as a necessary luxury to trigger off a change in habits. Dyes which stand out for their beauty and ecological attributes would never be employed on just any material but on noble fabrics such as wool, silk, linen or cotton, made to last more than one season. Market value will benefit from consumer preferences for environmentally friendly products, which will support consumption of high performance dyes and organic pigments.

Due to pollution problems in synthetic dyes and pigments industry, the whole world is shifting towards the manufacturing of natural dyes and pigments. The present book contains techniques of producing different
natural dyes and pigments, which has huge demand in domestic as well as in foreign market. It is hoped that entrepreneurs, technocrats, existing units, institutional libraries will find this book very useful.

Contents

1. Ommochromes
   Distribution
   A. Ommatins
   B. Ommins
   Isolation and Purification
   A. Ommatins
   B. Ommins
   Structure of the Ommochromes*
      Xanthommatin
      Ommatin D
      Rhodommatin
      Ommin A X
   Biogenesis
2. Bisdehydrocanthaxanthin
3. Carotenoids Field
   Carotenoid Biogenesis
   Carotenoid Total Syntheses
   The use of Carotenoids as Food Colours
4. Black pigments
   Animal Pigments
      Melanins
      Sclerotization
   Plant Pigments
      Humic acids
      1,8-Dihydroxynaphthalene polymers
5. Anthraquinone
   Plant Pigments
   Insect Pigments
6. Coprosma genus
7. Blantheraquinones and related compounds
   Skyrin
   Oxyskyrin
   Skyrinol
   Iridoskyrin
   Rugulosin
   Luteoskyrin and Rubroskyrin
   Lumiluteoskyrin
   Flavoskyrin
   Biogenesis
8. The Biflavonyl Pigments
   The First Investigations
   The Work of Nakazawa on Ginkgetin
   The Work of the Bristol Group
   On Ginkgetin and Isoginkgetin
   The Work of Kariyone and Kawano on
   Sciadopitysin, 1956
Further Work of Brispol Group on Ginkgetin and Sciadopitysin

The Work of Kawano on Sciadopitysin and GINKGETIN, 1959

The Synthesis of Ginkgetin Tetramethyl ether, Nakazawa, 1959

The Structure of Ginkgeting

The Structure of Isoginkgetin

The Structure of Kayafyavone

The Structure of Sotetsuflavone

Summary of Biflavonyl Structures

Intermediate Degradation Products of Biflavonys

Optical Inactivity of the Biflavonys

The Structure of Hinokiilavone

Natural Occurence of Biflavonys

9. Azo dyes

10. Dyestuffs

Introduction

Primary Products for VS-Dyestuffs

1. Methods of preparation

2. Reactions

Processes for the Manufacture of VS-Dyestuffs

Fastness and Dyeing Properties of VS-Dyestuffs

1. VS-Dyestuffs free from nuclear sulphonic and carboxylic acid groups

2. Dyestuffs containing nuclear sulphonic and carboxylic acid groups

Summary

11. Disperse dyes

Light Fastness

Gas Fastness

Sublimation Fastness

Wash Fastness

Structural Modifications Leading to All-Round Fastness

12. Quinonoid dyes

13. Cyanine dyes

Chemistry of 2, 3-Dichloro-1,4-Naphthoquininone (I)

Chemistry of Chloranil (II)

Vat Dyes from Chloranil

Benzodipyrocolinequinones Pyrrocolinequinones,

Unsymmetrical Dipyrrocolinequinones and Naph of Uranopyrocolinequinones

2-alkylamino-(arylamino)-3-chloro-1,

4-naphthoquinones And Di-3-(2-chloro-1,

4-naphthoquinonyl)-alkylamines And Arylamines

Cellulose Acetate Dyes From (i) And (ii)

Synthesis Of Non-coplanar Quinonoid Dyes

14. Fluorescent brightening agents

15. Optical whitening agents

Introduction

Physical Considerations of Fluorescence and Optical Whitening

Chemical constitution of Optical Whitening Agents

1. Stilbene derivatives

2. Benzidine derivatives

3. Benzthiazole, benzoazole and benziminazole derivatives
4. Coumarins
5. Pyrazolines
6. Other types

Some Specific Applications of Optical Whitening Agents
1. Soaps and detergents
2. Textile applications

16. Natural dyes for Food

Natural Colourants
   Natural Colours Presently Used in Food
   Methods of Improving Natural Colourants

Novel Sources of Natural Colourants
   Microbial Sources
   Animal Sources
   Plant Source
   General Reviews
   Colourants from By-products
   Gardenia Extracts
   Other Sources
   Feasibility of Novel Sources

Stability of Natural Colourants in Foods Effect of Additives
   Ascorbic Acid and Derivatives
   Effect of Metal Ions
   Effect of Neutral Salts
   Effect of Organic Acids
   Photoprotection
   Miscellaneous Additives
   Conclusion

Stable Forms of Natural Colourants Found in Vivo

Stabilised Forms Of Natural Colourants Flavonoids
   Chemical Features Affecting Stability
   Self association
   Complex formation
   Copigmentation
   Condensation
   Chemical modifications

Porphyrrins

Others

17. Pyran Pigments : I. Flavones and Flavonols

Flavones
   Chrysin (IV)

General Methods of Synthesis of Flavones
   A. From Aromatic Diketones
   B. From o-Hydroxyacetophenones
   C. From o-Hydroxychalkones
   D. From Phenols

Flavonols
   The Wessely-moser and Related
   Rearrangements of Flavones
   The Formation of Salts by Flavones and Flavonols
   The Reduction of Flavones

Isoflavones
   The Synthesis of Isoflavones
18. Pyran Pigments: II. Anthocyanins and Anthocyanidins
Cyanidin (III)
The Synthesis of Anthocyanidins
The Synthesis of Anthocyanins
Color Reactions of The Anthocyanidins and Anthocyanins
Anhydrobases
  Carajurin (XCIX)
  Dracorubin (CXXV)
19. Pyran Pigments: III. Xanthones
Ravenelin (II)
Mangostin (XI)
Pyran Pigments: IV. Rottlerin
Pyran Pigments: V. Brazilin and Mematoxylin
Brazilin (XXXII)
Hematoxylin (XL)
Trimethylbrazilone (XLI)
Brazilin (LXXIX, R - H)
The Synthesis Of Brazilin
Pyrrole Pigments: I. The Porphyrins
Hemin (cxxxvii)
The Synthesis of Dipyrrylmethenes
The Synthesis of Porphyrins
  The Structure of Hemin
Pyrrole Pigments: II. Chlorophylls
Pheoporphyrin, Chloroporphyrin, and Phylloerythrin
The Vinyl Group in Chlorophyll
The Structure of Chlorophyll
  Position of the Phytly Group in Chlorophyll
  The Phase Test
Allomerization
Approaches to the Synthesis of Chlorophyll
Chlorophyll-b
Bacteriochlorophyll
20. Pyrrole Pigments: III. The Bile Pigments
Bilirubin (XXXII)
  Verdins
  Violins
  Bilenes
  Bilanes
Stereochemistry and Tautomerism
Complex Salts of the Bile Pigments
Pyrrole Pigments: IV. Prodigiosin
21. Pyrimidine Pigments: The pterins
The Gmelin Reaction
Pterorhodon
22. Quinonoid Pigments
Benzoquinonoid Pigments
  Perezone (XII)
  Polyporonic Acid (XIV)
  Astromentin (XXVIII)
  Phoenicin (LXI)
Napthaquinonoid Pigments
Lapachol (LXXI)
Eleutherin (CXXI)  
Alkannin and Shikonin (CXLIX)  
Anthraquinonoid Pigments  
Helminthosporin (CLVIII)  
Kermesic Acid (CLXI)  
Skyrin (CLXXVIII)  

Extended Quinone Pigments  
The Aphn Pigments  
Erythroaphin-fb (CCXVI) or (CCXVII)  
Hypericin (CCXXV)  

23. Polyene Pigments  
Bixin (X) and Croceting (XI) the Carotenes  
b-Carotene (LV)  
Lycopene (LXXIII)  
The Total Synthesis of the Polyene Pigments  
Combination of Units in the Order C19 + C2 + C19  
Combination of Units in the Order C16 + C8 + C16  
Combination of units in the Order C14 + C12 + C14  
Combination of Units in the Order C10 + C20 + C10  
The Dehydro - Retrodehydrocarotenoids Epoxides and Furanoid Oxides  

24. Anthocyanins from Indian varieties of Grapes  
Material and Methods  
Extraction  
Purification  
Total anthocyanins  
Separation  
Partial hydrolysis of anthocyanin  
Aglycone and sugar  
Acyl moieties  
Spectral measurements  
Thin layer chromatography  

Results and Discussion  
Recovery of anthocyanin  
Separation of pigments by paper chromatography  
Absorption spectra of pigments  
Partial hydrolysis of anthocyanins  
Aglycones  
Sugar identification  
Acyl moieties  

25. Red pigment from Geniposidic Acid and Amino Compound  
Materials and Methods  
Preparation of geniposide (GS) and GSA solution  
Preparation of other iridoid compounds  
Enzyme and reagents  
General method of preparation of pigment  
Evaluation of pigment  
Identification and quantification of carbon dioxide  
HPLC and NMR measurement  
Structural relationship of iridoids to red pigment production  
Acidity and evolution of carbon dioxide  
Time course of enzymic reaction  
Acidity and atmosphere on the reaction
HPLC monitoring of the pigment formation from GAA and α-alanine
NMR monitoring of the pigment formation from GAA and methylamine

Results and Discussion
The relationship between the evolution of carbon dioxide and reaction pH
The process of formation of red pigment
Molecular mass and colour evaluation of red pigment derived from GAA and α-alanine
NMR spectroscopy of red pigment formed from GAA and methylamine
Monitoring of the reaction by NMR
The formation mechanism of red pigment

26. Effect of Acid and Amine on the formation of Red Pigment from Geniposidic Acid

Materials and Methods
Preparation of geniposide (GS)
Preparation of geniposidic acid (GSA) solution
Enzyme and reagents
General procedure for the red pigment formation
Evaluation of pigment
Kind of acid
The concentration of organic acid
The substituted position of amino group and chain length of amino compound
Kind of amino compound

Results and Discussion
Effect of acid
Effect of the substituted position of amino group and chain length of amino compound
Kind of amino compound

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by
manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
