Natural dyes are dyes or colorants derived from plants, invertebrates, or minerals. The majority of natural dyes are vegetable dyes from plant sources. Dyeing is the process of imparting colors to a textile material. Different classes of dyes are used for different types of fiber and at different stages of the textile production process, from loose fibers through yarn and cloth to completed garments. There are technologies that manufacture the pigments for plastics, rubber and cosmetics. Therefore; dyes and pigments have a vast area of applications and have a huge demand in industry. Contrary to popular opinion, natural dyes are often neither safer nor more ecologically sound than synthetic dyes. They are less permanent, more difficult to apply, wash out more easily, and often involve the use of highly toxic mordant. Of course, the colour possibilities are far more limited; the color of any natural dye may be easily copied by mixing synthetic dyes, but many other colors are not easily obtained with natural dyes. However, some mordant are not very toxic, and the idea of natural dyestuffs is aesthetically pleasing. Applying natural dyes in your fabric production using enzymes will reduce your production cost and improve control. There are various kind of natural dyes; quinonoid dyes, cyanine dyes, azo dyes, biflavonyl dyes, omochromes, anthraquinone, coprosma gesus etc. The use of natural dyes in cloth making can be seen as a necessary luxury to trigger off a change in habits. Dyes which stand out for their beauty and ecological attributes would never be employed on just any material but on noble fabrics such as wool, silk, linen or cotton, made to last more than one season. Market value will benefit from consumer preferences for environmentally friendly products, which will support consumption of high performance dyes and organic pigments.

This book basically deals with the use of carotenoids as food colours, bianthraquinones and related compounds, intermediate degradation products of biflavonyls, dyestuffs containing nuclear sulphonie and carboxylic acid groups, quinonoid dyes, cyanine dyes, optical whitening agents, natural dyes for food, stability of natural colourants in foods effect of additives, pyrimidine pigments, the total synthesis of the polylene pigments, red pigment from geniposidic acid and amino compound, effect of acid and amine on the formation of red pigment from geniposidic acid, effect of the substituted position of amino group and chain length of amino compound etc.

Due to pollution problems in synthetic dyes and pigments industry, the whole world is shifting towards the manufacturing of natural dyes and pigments. The present book contains techniques of producing different...
natural dyes and pigments, which has huge demand in domestic as well as in foreign market. It is hoped that entrepreneurs, technocrats, existing units, institutional libraries will find this book very useful.

## Contents

1. Ommochromes  
   Distribution  
   A. Ommatins  
   B. Ommins  
   Isolation and Purification  
   A. Ommatins  
   B. Ommins  
   Structure of the Ommochromes*  
   Xanthommatin  
   Ommatin D  
   Rhodommatin  
   Ommin A X  
   Biogenesis  
2. Bisdehydrocanthaxanthin  
3. Carotenoids Field  
   Carotenoid Biogenesis  
   Carotenoid Total Syntheses  
   The use of Carotenoids as Food Colours  
4. Black pigments  
   Animal Pigments  
   Melanins  
   Sclerotization  
   Plant Pigments  
   Humic acids  
   1,8-Dihydroxynaphthalene polymers  
5. Anthraquinone  
   Plant Pigments  
   Insect Pigments  
6. Coprosma genus  
7. Blantheraquinones and related compounds  
   Skyrin  
   Oxyskyrin  
   Skyrinol  
   Iridoskyrin  
   Rugulosin  
   Luteoskyrin and Rubroskyrin  
   Lumiluteoskyrin  
   Flavoskyrin  
   Biogenesis  
8. The Biflavonyl Pigments  
   The First Investigations  
   The Work of Nakazawa on Ginkgetin  
   The Work of the Bristol Group  
   On Ginkgetin and Isoginkgetin  
   The Work of Kariyone and Kawano on  
   Sciadopitysin, 1956
Further Work of Brispol Group on
Ginkgetin and Sciadopitysin
The Work of Kawano on Sciadopitysin and GINKGETIN, 1959
The Synthesis of Ginkgetin Tetramethyl ether, Nakazawa, 1959
The Structure of Ginkgeting
The Structure of Isoginkgetin
The Structure of Kayafavone
The Structure of Sotetsuflavone
Summary of Biflavonyl Structures

Intermediate Degradation Products of Biflavonyls
Optical Inactivity of the Biflavonyls
The Structure of Hinokiflavone
Natural Occurrence of Biflavonyls
9. Azo dyes
10. Dyestuffs
Introduction
Primary Products for VS-Dyestuffs
1. Methods of preparation
2. Reactions
Processes for the Manufacture of VS-Dyestuffs
Fastness and Dyeing Properties of VS-Dyestuffs
1. VS-Dyestuffs free from nuclear sulphonic and carboxylic acid groups
2. Dyestuffs containing nuclear sulphonic and carboxylic acid groups
Summary
11. Disperse dyes
Light Fastness
Gas Fastness
Sublimation Fastness
Wash Fastness
Structural Modifications Leading to All-Round Fastness
12. Quinonoid dyes
13. Cyanine dyes
Chemistry of 2, 3-Dichloro-1,4-Naphthoquinone (I)
Chemistry of Chloranil (II)
Vat Dyes from Chloranil
Benzodipyrrocolinequinones Pyrrocolinequinones,
Unsymmetrical Dipyrrocolinequinones and Naphth of Uranopyrrocolinequinones
2-alkylamino-(arylmino)-3-chloro-1,
4-naphthoquinones And Di-3-(2-chloro-1,
4-naphthoquinonyl)-alkylamines And Arylamines
Cellulose Acetate Dyes From (i) And (ii)
Synthesis Of Non-coplanar Quinonoid Dyes
14. Fluorescent brightening agents
15. Optical whitening agents
Introduction
Physical Considerations of Fluorescence and Optical Whitening
Chemical constitution of Optical Whitening Agents
1. Stilbene derivatives
2. Benzidine derivatives
3. Benzthiazole, benzoazole and benziminazole derivatives
4. Coumarins
5. Pyrazolines
6. Other types

Some Specific Applications of Optical Whitening Agents
1. Soaps and detergents
2. Textile applications
16. Natural dyes for Food

Natural Colourants
Natural Colours Presently Used in Food
Methods of Improving Natural Colourants

Novel Sources of Natural Colourants
Microbial Sources
Animal Sources
Plant Source

General Reviews
Colourants from By-products
Gardenia Extracts
Other Sources
Feasibility of Novel Sources

Stability of Natural Colourants in Foods Effect of Additives
Ascorbic Acid and Derivatives
Effect of Metal Ions
Effect of Neutral Salts
Effect of Organic Acids
Photoprotection
Miscellaneous Additives

Conclusion
Stable Forms of Natural Colourants Found in Vivo
Stabilised Forms Of Natural Colourants Flavonoids
Chemical Features Affecting Stability
Self association
Complex formation
Copigmentation
Condensation
Chemical modifications

Porphyrs
Others

17. Pyran Pigments : I. Flavones and Flavonols
Flavones
Chrysine (IV)

General Methods of Synthesis of Flavones
A. From Aromatic Diketones
B. From o-Hydroxyacetophenones
C. From o-Hydroxychalkones
D. From Phenols

Flavonols
The Wessely-moser and Related Rearrangements of Flavones
The Formation of Salts by Flavones and Flavonols
The Reduction of Flavones
Isoflavones
The Synthesis of Isoflavones
18. Pyran Pigments: II. Anthocyanins and Anthocyanidins
   Cyanidin (III)
   The Synthesis of Anthocyanidins
   The Synthesis of Anthocyanins
   Color Reactions of the Anthocyanidins and Anthocyanins
   Anhydrobases
   Carajurin (XCIX)
   Dracorubin (CXXV)

19. Pyran Pigments: III. Xanthones
   Ravenelin (II)
   Mangostin (XI)
   Pyran Pigments: IV. Rottlerin
   Pyran Pigments: V. Brazilin and Mematoxylin
   Brazilin (XXXII)
   Hematoxylin (XL)
   Trimethylbrazilone (XLI)
   Brazilin (LXXIX, R - H)
   The Synthesis of Brazilin
   Pyrrole Pigments: I. The Porphyrins
   Hemin (cxxxvii)
   The Synthesis of Dipyrromethenes
   The Synthesis of Porphyrins
   The Structure of Hemin
   Pyrrole Pigments: II. Chlorophylls
   Pheoporphyrin, Chloroporphyrin, and Phylloerythrin
   The Vinyl Group in Chlorophyll
   The Structure of Chlorophyll
   Position of the Phytyl Group in Chlorophyll
   The Phase Test
   Allomerization
   Approaches to the Synthesis of Chlorophyll
   Chlorophyll-b
   Bacteriochlorophyll

20. Pyrrole Pigments: III. The Bile Pigments
   Bilirubin (XXXII)
   Verdins
   Violins
   Bilenes
   Bilanes
   Stereochemistry and Tautomerism
   Complex Salts of the Bile Pigments
   Pyrrole Pigments: IV. Prodigiosin

21. Pyrimidine Pigments: The Pterins
   The Gmelin Reaction
   Pterorhodin

22. Quinonoid Pigments
   Benzoquinonoid Pigments
   Perezone (XII)
   Polyporic Acid (XIV)
   Astromentin (XXVIII)
   Phoenicin (LXI)
   Naphthaquinonoid Pigments
   Lapachol (LXXI)
Eleutherin (CXXI)
Alkannin and Shikonin (CXLIX)
Anthraquinonoid Pigments
Helminthosporin (CLVIII)
Kermesic Acid (CLXI)
Skyrin (CLXXVIII)
Extended Quinone Pigments
The Aphn Pigments
Erythroaphin-fb (CCXVI) or (CCXVII)
Hypericin (CCXXV)
23. Polyene Pigments
Bixin (X) and Croceting (XI) the Carotenes
b-Carotene (LV)
Lycopene (LXXIII)
The Total Synthesis of the Polyene Pigments
Combination of Units in the Order C19 + C2 + C19
Combination of Units in the Order C16 + C8 + C16
Combination of units in the Order C14 + C12 + C14
Combination of Units in the Order C10 + C20 + C10
The Dehydro - Retrodehydrocarotenoids Epoxides
and Furanoid Oxides
24. Anthocyanins from Indian varieties of Grapes
Material and Methods
  Extraction
  Purification
  Total anthocyanins
  Separation
  Partial hydrolysis of anthocyanin
Aglycone and sugar
  Acyl moieties
  Spectral measurements
  Thin layer chromatography
Results and Discussion
  Recovery of anthocyanin
  Separation of pigments by paper chromatography
  Absorption spectra of pigments
  Partial hydrolysis of anthocyanin
  Aglycones
  Sugar identification
  Acyl moieties
25. Red pigment from Geniposidic Acid and Amino Compound
Materials and Methods
  Preparation of geniposide (GS) and GSA solution
  Preparation of other iridoid compounds
  Enzyme and reagents
  General method of preparation of pigment
  Evaluation of pigment
  Identification and quantification of carbon dioxide
  HPLC and NMR measurement
  Structural relationship of iridoids to red pigment production
  Acidity and evolution of carbon dioxide
  Time course of enzymic reaction
  Acidity and atmosphere on the reaction
HPLC monitoring of the pigment formation from GAA and α-alanine
NMR monitoring of the pigment formation from GAA and methylamine

Results and Discussion
The relationship between the evolution of carbon dioxide and reaction pH
The process of formation of red pigment
Molecular mass and colour evaluation of red pigment derived from GAA and α-alanine
NMR spectroscopy of red pigment formed from GAA and methylamine
Monitoring of the reaction by NMR
The formation mechanism of red pigment

26. Effect of Acid and Amine on the formation of Red Pigment from Geniposidic Acid

Materials and Methods
Preparation of geniposide (GS)
Preparation of geniposidic acid (GSA) solution
Enzyme and reagents
General procedure for the red pigment formation
Evaluation of pigment
Kind of acid
The concentration of organic acid
The substituted position of amino group and chain length of amino compound
Kind of amino compound

Results and Discussion
Effect of acid
Effect of the substituted position of amino group and chain length of amino compound
Kind of amino compound

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by
manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
