## The Complete book on Natural Dyes & Pigments

Author:- NIIR Board of Consultants & Engineers Format: paperback Code: NI160 Pages: 448 Price: Rs.1100US\$ 125 Publisher: NIIR PROJECT CONSULTANCY SERVICES Usually ships within 5 days

Natural dyes are dyes or colorants derived from plants, invertebrates, or minerals. The majority of natural dyes are vegetable dyes from plant sources. Dyeing is the process of imparting colors to a textile material. Different classes of dyes are used for different types of fiber and at different stages of the textile production process, from loose fibers through yarn and cloth to completed garments. There are technologies that manufacture the pigments for plastics, rubber and cosmetics. Therefore; dyes and pigments have a vast area of applications and have a huge demand in industry. Contrary to popular opinion, natural dyes are often neither safer nor more ecologically sound than synthetic dyes. They are less permanent, more difficult to apply, wash out more easily, and often involve the use of highly toxic mordant. Of course, the colour possibilities are far more limited; the color of any natural dye may be easily copied by mixing synthetic dyes, but many other colors are not easily obtained with natural dyes. However, some mordant are not very toxic, and the idea of natural dyestuffs is aesthetically pleasing. Applying natural dyes in your fabric production using enzymes will reduce your production cost and improve control. There are various kind of natural dyes; guinonoid dyes, cyanine dyes, azo dyes, biflyonyl dyes, omochromes, anthraquinone, coprosma gesus etc. The use of natural dyes in cloth making can be seen as a necessary luxury to trigger off a change in habits. Dyes which stand out for their beauty and ecological attributes would never be employed on just any material but on noble fabrics such as wool, silk, linen or cotton, made to last more than one season. Market value will benefit from consumer preferences for environmentally friendly products, which will support consumption of high performance dyes and organic pigments. This book basically deals with the use of carotenoids as food colours, bianthraquinones and related compounds, intermediate degradation products of biflavonyls, dyestuffs containing nuclear sulphonic and carboxylic acid groups, quinonoid dyes, cyanine dyes, optical whitening agents, natural dyes for food, stability of natural colourants in foods effect of additives, pyrimidine pigments, the total synthesis of the polyene pigments, red pigment from geniposidic acid and amino compound, effect of acid and amine on the formation of red pigment from geniposidic acid, effect of the substituted position of amino group and chain length of amino compound etc.

Due to pollution problems in synthetic dyes and pigments industry, the whole world is shifting towards the manufacturing of natural dyes and pigments. The present book contains techniques of producing different natural dyes and pigments, which has huge demand in domestic as well as in foreign market. It is hoped that entrepreneurs, technocrats, existing units, institutional libraries will find this book very useful.

1. Ommochromes Distribution A. Ommatins B. Ommins Isolation and Purification A. Ommatins **B.** Ommins Structure of the Ommochromes\* **Xanthommatin** Ommatin D Rhodommatin Ommin A X Biogennesis 2. Bisdehydrocanthaxanthin 3. Carotenoids Field **Carotenoid Biogenesis Carotenoid Total Syntheses** The use of Carotenoids as Food Colours 4. Black pigments **Animal Pigments** Melanins Sclerotization **Plant Pigments** Humic acids 1,8-Dihydroxynaphthalene polymers 5. Anthraquinone **Plant Pigments Insect Pigments** 6. Coprosma genus 7. Bianthraquinones and related compounds Skyrin Oxyskyrin Skyrinol Iridoskyrin Rugulosin Luteoskyrin and Rubroskyrin Lumiluteoskyrin Flavoskyrin **Biogenesis** 8. The Biflavonyl Pigments The First Investigations The Work of Nakazawa on Ginkgeting The Work of the Bristol Group On Ginkgetin and Isoginkgetin The Work of Kariyone and Kawano on Sciadopitysin, 1956 Further Work of Brispol Group on Ginkgetin and Sciadopitysin The Work of Kawano on Sciadopitysin and GINKGETIN, 1959 The Synthesis of Ginkgetin Tetramethyl ether, Nakazawa, 1959 The Structure of Ginkgeting The Structure of Isoginkgetin The Structure of Kayafyavone

The Structure of Sotetsuflavone Summary of Biflavonyl Structures

Intermediate Degradation Products of Biflavonyls Optical Inactivity of the Biflavonyls The Structure of Hinokiflavone Natural Occurence of Biflavonyls 9. Azo dves 10. Dyestuffs Introduction Primary Products for VS-Dyestuffs 1. Methods of preparation 2. Reactions Processes for the Manufacture of VS-Dyestuffs Fastness and Dyeing Properties of VS-Dyestuffs 1. VS-Dyestuffs free from nuclear sulphonic and carboxylic acid groups 2. Dyestuffs containing nuclear sulphonic and carboxylic acid groups Summary 11. Disperse dyes **Light Fastness** Gas Fastness Sublimation Fastness Wash Fastness Structural Modifications Leading to All-Round Fastness 12. Quinonoid dyes 13. Cyanine dyes Chemistry of 2, 3-Dichloro-1,4-Naphthoquininone (I) Chemistry of Chloranil (II) Vat Dyes from Chloranil Benzodipyrrocolinequinones Pyrrocolinequinones, Unsymmetrical Dipyrrocolinequinones and Naphth of Uranopyrrocolinequinones 2-alkylamino-(arylamino)-3-chloro-1, 4-naphthoquinones And Di-3-(2-chloro-1, 4-naphthoguinonyl)-alkylamines And Arylamines Cellulose Acetate Dyes From (i) And (ii) Sinthesis Of Non-coplanar Quinonoid Dyes 14. Fluorescent brightening agents 15. Optical whitening agents Introduction Physical Considerations of Fluorescence and Optical Whitening Chemical constitution of Optical Whitening Agents 1. Stilbene derivatives 2. Benzidine derivatives 3. Benzthiazole, benzoxazole and benziminazole derivatives 4. Coumarins 5. Pyrazolines 6. Other types Some Specific Applications of Optical Whitening Agents

- 1. Soaps and detergents
- 2. Textile applications

16. Natural dyes for Food Natural Colourants Natural Colours Presently Used in Food Methods of Improving Natural Colourants Novel Sources of Natural Colourants **Microbial Sources Animal Sources** Plant Source **General Reviews** Colourants from By-products Gardenia Extracts Other Sources Feasibility of Novel Sources Stability of Natural Colourants in Foods Effect of Additives Ascorbic Acid and Derivatives Effect of Metal lons Effect of Neutral Salts Effect of Organic Acids Photoprotection **Miscellaneous Additives** Conclusion Stable Forms of Natural Colourants Found in Vivo Stabilised Forms Of Natural Colourants Flavonoids **Chemical Features Affecting Stability** Self association Complex formation Copigmentation Condensation **Chemical modifications** Porphyrins Others 17. Pyran Pigments : I. Flavones and Flavonols Flavones Chrysin (IV) General Methods of Synthesis of Flavones A. From Aromatic Diketones B. From o-Hydroxyacetophenones C. From o-Hydroxychalkones **D. From Phenols** Flavonols The Wessely-moser and Related **Rearrangements of Flavones** The Formation of Salts by Flavones and Flavonols The Reduction of Flavones Isoflavones The Synthesis of Isoflavones 18. Pyran Pigments : II. Anthocyanins and Anthocyanidins Cyanidin (III) The Synthesis of Anthocyanidins The Synthesis of Anthocyanins Color Reactions of The Anthocyanidins and Anthocyanins Anhydrobases Carajurin (XCIX)

Dracorubin (CXXV) 19. Pyran Pigments : III. Xanthones Ravenelin (II) Mangostin (XI) Pyran Pigments : IV. Rottlerin Pyran Pigments : V. Brazilin and Mematoxylin Brazilin (XXXII) Hematoxylin (XL) Trimethylbrazilone (XLI) Brazilein (LXXIX, R - H) The Synthesis Of Brazilin Pyrrole Pigments : I. The Porphyrins Hemin (cxxxvii) The Synthesis of Dipyrrylmethenes The Synthesis of Porphyrins The Structure of Hemin Pyrrole Pigments : II. Chlorophylls Pheoporphyrin, Chloroporphyrin, and Phylloerythrin The Vinyl Group in Chlorophyll The Structure of Chlorophyll Position of the Phytyl Group in Chlorophyll The Phase Test Allomerization Approaches to the Synthesis of Chlorophyll Chlorophyll-b Bacteriochlorophyll 20. Pyrrole Pigments : III. The Bile Pigments Bilirubin (XXXII) Verdins Violins **Bilenes Bilanes** Stereochemistry and Tautomerism Complex Salts of the Bile Pigments Pyrrole Pigments : IV. Prodigiosin 21. Pyrimidine Pigments : The pterins The Gmelin Reaction Pterorhodin 22. Quinonoid Pigments **Benzoquinonoid Pigments** Perezone (XII) Polyporic Acid (XIV) Astromentin (XXVIII) Phoenicin (LXI) Napthaquinonoid Pigments Lapachol (LXXI) Eleutherin (CXXI) Alkannin and Shikonin (CXLIX) Anthraguinonoid Pigments Helminthosporin (CLVIII) Kermesic Acid (CLXI) Skyrin (CLXXVIII) **Extended Quinone Pigments** 

The Aphin Pigments Erythroaphin-fb (CCXVI) or (CCXVII) Hypericin (CCXXV) 23. Polyene Pigments Bixin (X) and Croceting (XI) the Carotenes b-Carotene (LV) Lycopene (LXXIII) The Total Synthesis of the Polyene Pigments Combination of Units in the Order C19 + C2 + C19 Combination of Units in the Order C16 + C8 + C16 Combination of units in the Order C14 + C12 + C14Combination of Units in the Order C10 + C20 + C10The Dehydro - Retrodehydrocarotenoids Epoxides and Furanoid Oxides 24. Anthocyanins from Indian varieties of Grapes Material and Methods Extraction Purification **Total anthocyanins** Separation Partial hydrolysis of anthocyanin Aglycone and sugar Acyl moieties Spectral measurements Thin layer chromatography **Results and Discussion** Recovery of anthocyanin Separation of pignnents by paper chromatography Absorption spectra of pigments Partial hydrolysis of anthocyanins Aglycones Sugar identification Acyl moieties 25. Red pigment from Geniposidic Acid and Amino Compound Materials and Methods Preparation of geniposide (GS) and GSA solution Preparation of other iridoid compounds Enzyme and reagents General method of preparation of pigment Evaluation of pigment Identification and quantification of carbon dioxide HPLC and NMR measurement Structural relationship of iridoids to red pigment production Acidity and evolution of carbon dioxide Time course of enzymic reaction Acidity and atmosphere on the reaction HPLC monitoring of the pigment formation from GAA and a-alanine NMR monitoring of the pigment formation from GAA and methylamine Results and Discussion The relationship between the evolution of carbon dioxide and reaction pH

The process of formation of red pigment Molecular mass and colour evaluation of red pigment derived from GAA and a-alanine NMR spectroscopy of red pigment formed from GAA and methylamine Monitoring of the reaction by NMR The formation mechanism of red pigment 26. Effect of Acid and Amine on the formation of Red Pigment from Geniposidic Acid Materials and Methods Preparation of geniposide (GS) Preparation of geniposidic acid (GSA) solution Enzyme and reagents General procedure for the red pigment formation Evaluation of pigment Kind of acid The concentration of organic acid The substituted position of amino group and chain length of amino compound Kind of amino compound **Results and Discussion** Effect of acidz Effect of the substituted position of amino group and chain length of amino compound Kind of amino compound

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Startup Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIIR PROJECT CONSULTANCY SERVICES, 106-E, Kamla Nagar, New Delhi-110007, India. Email: npcs.india@gmail.com Website: NIIR.org
