Cereals, or grains, are members of the grass family cultivated primarily for their starchy seeds (technically, dry fruits). Cereal grains are grown in greater quantities and provide more food energy worldwide than any other type of crop; they are therefore staple crops. Oats, barley, and some food products made from cereal grains. They are used for both human and animal food and as an industrial raw material. India produces cereals like wheat, rice, barley (jau), buckwheat, oats, corn (maize), rye, jowar (sorghum), pearl millet (bajra), millet (ragi), Sorghum, Triticale, etc.

India is the world's second largest producer of Rice, Wheat and other cereals. The huge demand for cereals in the global market is creating an excellent environment for the export of Indian cereal products. India is not only the largest producer of cereal as well as largest exporter of cereal products in the world. India have been offering incredible opportunities as they have an abundant amount of raw materials and a wide availability of cheap labor.

The book provides comprehensive coverage of the Drying, Milling and information regarding production method of Cereal Foods. It also covers Plant Layout, Process Flow Sheets and photographs of plant & Machinery with supplier's contact details.

Some of the fundamentals of the book are origin of wheat classification of wheat, endeavors to find industrial uses for wheat, criteria of wheat quality, botanical criteria of quality, milling principles, extraction rate and its effect on flour composition, grain structure as affecting grinding, definition of flour extraction stone milling: yields of products, roller milling: flour extraction rates, rice production and utilization, origin of rice, comparison of rice with other cereal grains, composition of rice and cereal, breeding rice varieties with specific, industrial uses for rice and rice by products, caryopsis and composition of rice, gross structure of the rice caryopsis and its milling fractions etc.

This book is essential for those who are interested in cereal areas can find the complete information from manufacture to final uses of Cereal Foods. The present time is an era of information, one should know about what is happening in the world to be able to compete effectively. It will be very informative and useful to consultants, new entrepreneurs, startups, technocrats, research scholars, libraries and existing units.

Contents

1. Wheat
Origin of Wheat
Classification of Wheat
Moisture Consideration
Comparison of Nutrient Values
The Concept of Wheat Quality
Feed Uses For Wheat
Endeavors to Find Industrial Uses for Wheat
Criteria of Wheat Quality
Botanical Criteria of Quality
Species
Varieties
Physical Criteria of Quality
Weight Per Unit Volume
Kernel Weight
Kernel Size and Shape
Kernel Hardness
Vitreousness
Color
Damaged Kernels
Impurities
Milling Quality
Chemical Criteria Of Quality
Moisture Content
Alpha-amylase Activity
Fat Acidity
Crude Fiber and Ash
Wheat-Grading Systems
Composition of Wheat
Proteins
Carbohydrates
Lipids
Minerals
Vitamins
Fiber
Pigments
Enzymes
Milling Principles
Extraction Rate and its Effect on Flour Composition
Grain Structure as Affecting Grinding
Definition of Flour Extraction
Stone-milling: Yields of Products
Roller-milling: Flour Extraction Rates
Extraction Rate and Flour Color
Some Factors Determining Commercial Extraction Rates
Changes in Ash, Thiamine, and Color with Increasing Extraction Rate
General Composition of Flours of different Extraction Rates
Effect of Increasing Extraction on Baking Quality
Roller-Milling Process
Breaking Process
Reduction Process
Grouping of Flour Streams According to Composition: Effect of Change in Extraction Rate
Some Recent Developments
Characteristics of Individual Flour Streams in Milling of White Flour
Proportions and Ash Contents.
Reduction Flours
Minerals
Phosphorus
Other Minerals
Flour Streams
Gluten
Protein Peptization, Proteolysis, Viscosity
Fat
Sugars and Maltose Figure
Sugars
Maltose Figure
B-Vitamins
Thiamine
Riboflavin
Niacin
Pentosans
Loaf Crumb Color
Baking Quality
Water-Absorption
Bread
Cookies (Biscuits)
Dry-cleaning of Wheat
Wheat Conditioning, Moisture Movement,
  Temperature Effects
Washing
Pick-up of Water by Wheat in Washing
Penetration Into Endosperm
Conditioning In Practice
Cold-Conditioning
Warm-Conditioning
Hot Conditioning
Steam-Treatment
Rolling Temperatures
Protein Displacement
Air Classification
Special Grinding of Flour
Usefulness of Products
Damage to Starch Granules in Milling
Factors In Individual Reductions
Coarse Particle (A) Reduction
Fine Particle Reduction
Effects With Successive Reductions
Effect of Wheat Type
The Breaking System
Quantitative Assessments
Germ in Milling
Path of the Germ in Milling
Contribution to Oil of Flour
Endosperm Structure as Affected by Milling
Endosperm Cells
Cell Walls
Experimental Milling
Criteria of Flour Quality
Definition of Flour Quality
Flour Quality and Strength
Components of Quality
Protein Content
Flour Viscosity
Enzyme Content
Amylase
Protease
Lipase
Absorption
Ash and Flour Color
Granulation Or Particle Size
Response to Additives
Color-Removing Agents
Maturing Agents
Enzyme Supplementation
Starch Damage
Methodology
Microbiology
Summary
Wheat Pigments and Flour Colour
Chemical Nature of Wheat Pigments
Xanthophyll
Carotene
Flavones
Pigments in Wheat and Flour
Pigments in the Developing Grain
Determination of the Total of Yellow Pigments
    In Flour Expressed as Carotenoids
Flour Color
Sources of Flour Colour
Methods of Measuring Flour Color
Technology of Flour Color
2. Rice
Production and Utilization
Origin of Rice
Comparison of Rice with Other Cereal Grains
Composition of Rice and Cereals
Breeding Rice Varieties With Specific
    Industrial Uses for Rice and Rice by-Products
Caryopsis and Composition of Rice
Gross Structure of the Rice Caryopsis and its Milling Fractions
Gross Structure
Pericarp and Tegmen
Aleurone Layer
Embryo
Starchy Endosperm
Milling Fractions
Changes In Structure During Grain Development
Structure and Composition
Structure of the Rice Kernel
Important Components
Proteins  
Starch  
Lipids  
  Vitamins  
Minerals  
Other Constituents  
Criteria of Rice Quality  
Objective Versus Subjective Measurements of Criteria  
Varieties  
Grain Size, Shape, Weight, and Uniformity  
Color and Translucence  
Test Weight  
Moisture Content  
Impurities and Damaged Rice  
Dockage  
Damaged Kernels  
Chalky Grains  
Red Rice  
Seeds or Kernels  
Odours  
Milling Quality  
Milling Yield  
Degree of Milling  
Physicochemical Tests  
Rice Drying  
Harvesting Methods  
Optimum Harvest Time  
Preharvest Chemical Drying  
Rice-Drying Terminology and Fundamentals  
Kinds of Rice  
Milling Yields  
Weights  
Moisture Content  
Equilibrium Moisture Content  
Drying-Rate Computation  
Drying Methods  
Forced-Air Drying  
Deep-bed Driers  
Supplemental Heat  
Materials-Handling for Bin Driers  
Continuous-flow, Heated-Air Driers  
Tempering  
Combination System of Drying  
Batch Driers  
Other Drying Methods  
Commercial Rice Drying  
Types of Enterprise  
Receiving and Storing Undried Rice  
Method for Increasing Drier-Facility Capacity  
Sun and Shade Drying  
Threshing and Winnowing  
Mechanical Drying
Effect of Decortication on Nutritional Value

6. Oats

History
Origin of Cultivated Oats
Genetics and Breeding
Cytogenetic Relationship of Species within Avena
Genetic Markers
Utilization of Germplasm Resources
Breeding
Breeding Objectives
Breeding Procedures
The Oat Plant
The Mature Grain
Chemical Composition
Protein
Protein Content and Distribution
Solubility Classification
Amino Acid Composition and Distribution
Lipids
Lipid Content and Distribution
Lipid Composition
Polysaccharides
Starch
B-glucan
Minerals
Vitamins
Processing and Utilization
Utilization
Processing
Cleaning
Drying and Cooling
Hulling
Cutting and Flaking
Oat Flour

7. Rye

Rye Breeding
Morphology and Kernel Characteristics
Growing Conditions
Rye Storage and Rye Grain Reserves and Disappearance
Rye Milling
Rye Flours
Nutrient Composition of Rye
Antinutritional Factors in Rye
Food Uses of Ryes
Industrial Uses of Rye
Rye As Animal Feed

8. Sorghum

Introduction
Origin
Structure and Physical Properties
Appearance of Sorghum Grain and its Genetics
Composition
Tannins and Polyphenols: Effects on Sorghum
Quality and Nutritional Value
Industrial Utilization
Wet Milling
Sorghum Starches
Dry Milling
Alcohol Production
Use of Sorghum for Beer and Malt
Lager Beer
Sorghum Malt
Clear Sorghum Beer
  Sour, Opaque Beer
  Processing For use in Feeds
  Processing for Food
Traditional Food Systems
Sorghum in Baked and Pasta Products
Sorghum Syrup, Molasses, and Sugar
Nutritional Value
Nutritional Value of Sorghum as Livestock Feed
Human Digestibility Studies
Effect of Processing

9. Triticale
   History
   General Characteristics
   Grain Development and Structure
   Genetics and Breeding
   Production
   Quality Factors
   Damaged Kernels
   Defects
   Dockage
   Foreign Material
   Heat-Damaged Kernels
   Other
   Shrunken and Broken Kernels
   Basis of Determination
   Ergoty Triticale
   Garlicky Triticale
   Light Garlicky Triticale
   Light Smutty Triticale
   Smutty Triticalp
Composition and Nutritional Factors
Utilization
Future

10. Photographs of Plant & Machinery with Supplier’s Contact Details

11. Sample Plant Layout and Process Flow Sheets

About NIIR
NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.
