

The Complete Book on Medical Plastics

Author: NIIR Board of Consultants & Engineers

Format: Paperback

ISBN: 8178330008

Code: NI172

Pages: 368

Price: Rs. 975.00 US\$ 25.95

Publisher: Asia Pacific Business Press Inc.

Usually ships within **5** days

Plastics currently form one of the most important components of the medical industry. Medical device designers and engineers increasingly prefer plastics to conventional packaging materials such as metals owing to superior flexibility offered by plastics in fabrication process. Advancements in sterilization techniques shift towards disposable devices, development of enhanced plastic materials, and technological innovations are factors driving the overall market growth and expansion. The development of novel materials such as biocompatible polymers for use in medical implants will furthermore provide the required impetus for the global medical plastics market. Every day, plastics are involved in critical surgeries, life saving efforts, and routine medical procedures. Plastic materials can be sterilized hundreds of times without degradation. Lightweight plastics are used to form replacement joints, non surgical supports, and therapy equipment. Clear plastics provide visibility for transfusions, surgeries, and diagnostic equipment of all kinds and plastics can be machined, molded, or formed into almost any shape imaginable. The use of plastics in health care field encompasses several distinct markets. Plastic is used on a large scale as medical devices like disposable syringes, optical and dental products, heart valves, contact lenses and many more medical products. This way plastic has very importance in making medical devices. The medical plastics industry is set to expand rapidly over the next decade taking up increasing proportions of GDP, as countries provide healthcare to an ageing population, access to medicine expands in developing regions and new technology is developed.

This book basically deals with significance of packaging for pharmaceuticals & medical industry, tablets & capsules liquids, creams and ointments, OPVC, OPP and oriented and non oriented pet containers, blister trays for ampoules, cartridge tubes etc., shrink packaging and stretch wrapping, conducting health based risk assessments of medical materials, performance properties of metallocene polyethylene, EVA, and flexible PVC films, polyurethane thin film welding for medical device applications, polyurethane film as an alternative to PVC and latex, opportunities for PVC replacement in medical solution containers, thermoplastic silicone urethane copolymers : a new class of biomedical elastomers, selecting materials for medical products : from PVC to metallocene polyolefins, injection molding engineering plastics, assessing the performance and suitability of parylene coating etc.

The present book contains the important information of plastics in medical field and their uses in various ways. This is very useful book for entrepreneurs, researchers, technocrats and technical institutions.

Contents

1. SIGNIFICANCE OF PACKAGING FOR PHARMA & MEDICAL INDUSTRY

Tablets & Capsules

Liquids

Creams and Ointments

Labels
Caps & Closures
Wadding Materials
Specific New Systems
Opvc, Opp and Oriented and Non-oriented Pet Containers
Blister Trays For Ampoules, Cartridge Tubes Etc.
Single-serve/Unit Dose Packages (Laminates of PPR, Plastics and Foil)
The Delcap Metered-dose
Form, Fill, Sealing of Plastic Bottles Under Aseptic Condition
Radiation Resistant PP Bottles
Double Derker Spray-aerosol
Single Dose Blister-break Open Packs
Capped Gabletop Cartons
Refillable, Reusable and Recyclable Aerosols
Shrink Packaging and Stretch Wrapping
Bulk Drug and Fine Chemicals
Packaging of Medical Devices
Materials & Technologies
Tyvek
Dot Coat Advantages
Tyvak vs. Paper
Peelable Paper Lidding Materials
Advantages
Applications
Medical Grade Pressure Sensitive Materials
Advantages
Applications
Evoh in Health Care Packaging (HCP)
Packaging Requirements For Health Care Products
Structure, Props & Uses
Barrier Bottles/Vials
Evoth
Other Important Area of Use
Packaging & Sterility
Plastics and Their Biomedical Applications
Pharmaceutical & Medical Packaging
New Development
Packaging Waste Directive
The Directive
Conclusion

2. TESTING

Conducting Health-Based Risk Assessments of Medical Materials
Nancy Stark
Standards and Guidances
Method
Hazard Identification
Dose-Response Assessment
Exposure Assessment
Risk Characterization
Nitinol Implant
Wound-Dressing Formulation
Perchloroethylene Solvent

Ligature Material
Sources of Data
Uncertainty Factors
Safety Margins
Conclusion
Pharmaceutical
Pharmaceutical Market Focuses on Cutting Costs, Not Value
Some Segments Promising
Regulatory Requirements
Packaging Machinery
Other Trends
The Future

3. STERILIZATION

Traditional Processes
New Processes
Chemical Processes (Gas/Liquid)
Peracetic Acid
Hydrogen Peroxide
Ozone
Chlorine Dioxide
Physicochemical Processes
Plasmas
Steam
Synergetic Processes
Psoralens and UVA (PUVA)
Microwave and Bactericide
Low-Temperature Steam and Formaldehyde
Physical Processes
Microwaves
Pulsed-Light Systems
Validation of Sterilizer Processes

4. HIGH PERFORMANCE PVC COMPOUNDS & TPE™S FOR MEDICAL APPLICATION

Long Term Contribution of PVC in Health Care
Pvc™s Dominance in the Growing Market
Challenges by Environmentalist to PVC
Key Barriers to PVC Replacement
The Major Factors Which Continue to Favour the Use of PVC are
PVC Innovation
ABC of Innovation
Features of Hi-performance PVC Compounds
The Use of Hi-performance PVC in Medical Devices
TPE Based on Pvc Replaces Silicone
TPE Based on PVC Outflexes Silicone Rubber

5. INNOVATIONS REMAKE PLASTIC INJECTION MOLDING

Useful Properties
Parts on a Diet
Equipment and Processes
Automating for Success
Conclusion

6. POLYVINYL CHLORIDE IN CRITICAL HEALTHCARE PRODUCTS

Factors Which Made Polyvinyl Chloride the Material of Choice for the Fabrication of Medical Devices

Typical Medical Applications of PVC

Choice of Plasticisers

Containers for the Collection and Storage of Blood and Blood Products

Storage of Platelets

Containers for Intravenous Fluids and for Parenteral Nutrition

Containers for Constant Ambulatory Peritoneal Dialysis Solutions (Capd Bags)

Containers for the Collection and Storage of Cord Blood

Reported Deleterious Effects of Dehp Plasticised PVC and the Present Position

Trends in the Development of Newer Materials

7. ADVANCES IN MEDICAL PLASTICS

Microtagging

Thermosets

Antithrombogenic Coatings

Dryfilm Lubricant

Curing Process for Synthetic Polyisoprene Latex

Topas Cyclic Olefin Copolymer

8. MEDICAL APPLICATIONS OF POLYCARBONATE

Processing

Sterilization

Typical Applications

Renal Dialysis

Cardiac Surgery Products

Surgical Instruments

IV Connection Components

Polycarbonate Developments for the Medical Market

Radiation Grades

High-Temperature Grades

Polycarbonate Blends

Enhanced-Productivity Grades for Cleanroom Molding

Lipid-Resistant Grades

Conclusion

9. RADIO-FREQUENCY SEALING FOR DISPOSABLE MEDICAL PRODUCTS

Steve Myers

What is RF Sealing?

How RF Works

Sizing RF Sealers

Tooling

Efficient RF Sealing Techniques

Maximum Throughput With Automation

Double-cycle Sealing

Comparing RF With Other Sealing Technologies

Conclusion

10. PET BOTTLES AND APET SHEET FOR BLISTER PACKING FOR PHARMA APPLICATION

Pet Conversion Processes

Pet – A Pure Polymer

Pet Bottles for Pharma

Filling Lines for Pet Bottles

Case Study for Use of Pet Bottles in Pharma Industry
Conclusion
Generic Drugs That Can Be Packed in Pet Bottles
Ayurvedic Products That Can Be Packed In Pet
Cost-Competitiveness of Pet Bottle for Pharma Industry
Pet Bottles for Pharma Products – Useful Tips
Apet Sheet – Material, Processing & Applications
Apet Sheets – Total Consumption
Apet Thin Sheet
What is Apet Sheet
Factors For Growing Interest in Apet Sheet
Advantages of Apet Sheet
Blister Packing
Apet Sheet vs. PVC Sheet
Apet Sheet vs. PP Sheet
Gas/Moisture Barrier Properties Pet vs. Other Polymers
Salient Points of Apet Thin Sheet
Pet – Ecofriendly and Recyclable
Pet Converters – Expectations of Pharmaceutical Industry
Development Trials for Pharma Industry By RIL
Other Applications of Apet Thin Sheet
Conclusion

11. BREATHABLE TPE FILMS FOR MEDICAL APPLICATIONS

Barrier Films
Microclimate Dynamics
TPE Resin Chemistry
Soft Segments
Hard Segments
Film Manufacture
Lamination
Hot-Melt Screen Printing
Melt Printing
Porous Coating
Spray Coating
Medical Applications
Conclusion

12. THE CHANGING ROLE OF THE MEDICAL DEVICE CONTRACT MANUFACTURER

Growth, Growth & Growth
Outsourcing and Consolidation
Meeting the Challenge

13. MEDICAL PACKAGING

Rising Demand Predicted
Drug/Device Products Lead The Way
Cost Considerations
Test Methods
Regulatory Picture
Conclusion

14. PERFORMANCE PROPERTIES OF METALLOCENE POLYETHYLENE, EVA, AND FLEXIBLE PVC FILMS

Experimental Procedure

Results

Conclusion

15. POLYURETHANE THIN-FILM WELDING FOR MEDICAL DEVICE APPLICATIONS

Weldability of Thermoplastics

Film-joining Methods

RF Welding

Ultrasonic Welding

Direct Thermal Sealing

Induction Welding

Solvent Bonding

Conclusion

16. POLYURETHANE FILM AS AN ALTERNATIVE TO PVC AND LATEX

PVC

Natural Rubber Latex (NRL)

Thermoplastic Polyurethanes

Concerns About PVC

17. GAS PERMEABILITY AND MEDICAL FILM PRODUCTS

Materials and Experimental Methodology

Results and Discussion

Conclusion

18. OPPORTUNITIES FOR PVC REPLACEMENT IN MEDICAL SOLUTION CONTAINERS

Ethylene-vinyl Acetate

Polyester

Polyolefin Blends

Polyolefin Laminates

Functionalized Polyolefins

Conclusion

19. PRODUCING BUBBLE/TAPER TUBING FOR MEDICAL APPLICATIONS

Extrusion-line Design

Forming Considerations

Cooling and Sizing

Pulling and Cutting Systems

Conclusion

20. THERMOPLASTIC SILICONE-URETHANE COPOLYMERS : A NEW CLASS OF BIOMEDICAL ELASTOMERS

Silicones

Thermoplastic Polyurethanes

Silicone-modified Polyurethanes

Silicone-urethane Copolymers

Conclusion

21. SELECTING MATERIALS FOR MEDICAL PRODUCTS : FROM PVC TO METALLOCENE POLYOLEFINS

Fundamental Considerations

Selecting Materials

Material Performance Versus Product Performance

PVC Versus Metallocenes
Advantages of PVC
Disadvantages of PVC
Advantages of Metallocenes
Potential Metallocene Disadvantages
Challenges for Metallocene Materials
Safety and Quality
Product Design and Processing
Product Performance
Conclusion

22. COATING AND SURFACE TREATMENT TECHNOLOGIES

Ion-Beam Processingâ€™Spire Corp. (Bedford, MA).
Light-Activated Surface Modificationâ€™BSI Corp. (Eden Prairie, MN).
Plasma Surface Engineeringâ€™Talison Research (Sunnyvale, CA).
Antimicrobial/Antibiotic Coatingsâ€™STS Biopolymers, Inc. (Henrietta, NY).
Thromboresistant (Heparin) Coatingsâ€™Baxter Healthcare Corp. (Irvine, CA).

23. INJECTION MOLDING ENGINEERING PLASTICS

How It Works
Balancing Variables
Tool Design
Design Aids
Conclusion

24. GROWTH AND NEW CHALLENGES FOR DEVICE MARKET

Cost Concerns
Steady Growth
Regulatory Issues
Technology Issues
The Future

25. ASSESSING THE PERFORMANCE AND SUITABILITY OF PARYLENE COATING

Medical Coating Characteristics
Medical Coating Applications
Parylene Review
Parylene N
Parylene C
Parylene D
The Parylene Process
Conclusion

26. PAPER OR PLASTIC? MEDICAL NONWOVEN COMBINES BEST PROPERTIES OF BOTH TAPES

Thin-Film Coater Improves Process Control
Susan Wallace
Chips Propel Advances in Medical Imaging Equipment
Susan Wallace

27. PRODUCTS & SERVICES

Dispensing units
Slot-die system
Packaging system
Tube cutter

Automation equipment
Injection moulding machines
Catheter processing equipment
Benchtop moulder

28. REPROCESSING DISPOSABLE (SINGLE-USE) ITEMS

Background
How Safe Is Reprocessing
Benefits of Reprocessing
Definitions
Recycling
Reprocessing
Reprocessing Disposable (Single-use) Items
Reprocessing Disposable Surgical Gloves
Recycling or Reprocessing Disposable (Plastic) Syringes Andhypodermic Needles
Recycling Disposable Syringes
Reprocessing Disposable Syringes (and Needles)
Reprocessing Versus Disposal of Needles and Syringes

29. PLASTICS MEDICAL DISPOSABLES & AMPULE TRAYS WITH G.N. PRESSURE-FORMING TECHNOLOGY

Introduction
Ampule Package
Current Technology
Contact Heat, Cut-in-place, Pressure Thermoforming Technology
Quality Control
Flexibility
Efficiency
Simplicity
Applications of Contact Heat, Cut-in-place, Pressure Thermoformers
Design of Parts
Material
Production Volume
Cost

30. PVC IN MEDICAL APPLICATION

Introduction
Topic of Discussion
Medical Application For PVC
Benefits of PVC
Safety
Chemical Stability
Biocompatibility
Clarity & Transparency
Flexibility, Durability & Dependability
Sterilizability
Compatibility
Resistance to Chemical Stress Cracking
Low Cost
Additives Used for PVC Compounding
Plasticisers
Stabilisers
PVC In Medical Products – An Environmental Perspective

Regulation and Product Standards
Good Manufacturing Practice (GMP)
Important Aspects Of GMP
Plastic Processing in Clean Rooms
I.V. Fluid Containers: Why PVC?
Cost Effectiveness
Reliability
Simplicity in the Filling Process
Safety in the Hospital
Conclusion

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
