Plastic has brought immense benefits to the whole human race. The lightweight, cheap, chemical-resistant, and strong material has got almost omnipotent presence. When we talk of its strength, we talk of the time till it survives, and to everyone’s knowledge, plastic does not bio-degrade. Yes, plastic, the greatest invention of mankind has the power to even destroy mankind. Plastic that is not biodegradable brings a lot of environmental issues. It deteriorates the ozone layer. For the most part, plastic is produced from oil. The world is progressively running out of oil. Research says plastic brings number of harms not only to humans but also the entire cosmos. The plastic which cannot be recycled has to be disposed of in some or the other way. Let’s say if we dispose in water it has the tendency to destroy marine life. So the only way left to reduce the ill effects of plastic is to use eco-friendly or biodegradable plastic.

Biodegradable plastics are plastics that will decay in usual aerobic environments. These include plastics that are made from vegetable oil and other organic matter. The book, Handbook on Bio Degradable Plastics (Eco-friendly plastics) is one of its kinds which give the information about biodegradable plastics. The book gives comprehensive information about Standard Methods for Biodegradation of Plastics, Commercialization of Eco-Friendly Plastics, and multipurpose exploitation of municipal solid waste (plastics), management of non-recoverable plastic waste, guidelines to be followed in recycling of plastic and several other crucial topics required for the understanding of recycling of plastic. According to a report out of 200 million plastic produced in the world, 26 million is produced by the United States, and only 6% (approximately) of plastic waste gets recycled. Posing both a challenge and opportunity. Challenge in the sense that it is causing environmental issues and opportunity for the young entrepreneurs to penetrate this sector. The book provides important and descriptive information on the whole topic of biodegradable plastic, the benefits and the techniques used. The book also contains information on topics arising social concern like present technologies for recycling of polyethylene terephthalate (PET) waste, how to minimise the impact of packaging materials on the environment and also provides information on new bio-degradable plastic, as business options for entrepreneurs.

The book at the end contains a list of directory providing information on List of Plant & Machinery, List of Raw Material, Plant/Machinery Suppliers, Overseas Suppliers of Machinery and Raw Material Suppliers.
Contents

1. INTEGRATED PLASTIC WASTE MANAGEMENT: AN INDIAN PERSPECTIVE
   Introduction
   Degradation of Plastics in Environment
   Biodegradability Vs Eco-Friendliness
   Standard Methods for Biodegradation of Plastics

2. ECO-FRIENDLY PLASTICS FOR A NICHE MARKET
   Disposal of Plastics Disturbs Eco-System
   Biodegradable Polymeric Materials
   Agricultural Mulches
   Agricultural Planting Containers
   Plastics in Municipal Solid Waste (MSW)
   Commercialization of Eco-Friendly Plastics
   Starch
   Ampacet
   BiofineTM Foils
   REXflex Flexible Polyolefin (FPO)
   PBHV-Biodegradable Plastics
   Prospective Markets for Biodegradable Polymer
   Factors Affecting Degradability
   Possibility of Recyclable Biodegradable Polymers
   Biodegradable Additives
   Assessment of Biodegradable Polymers
   Test Conditions
   Biodegradability of Polyolefins
   Mixed Cultures and Microbial Communities
   Conclusion

3. MULTI PURPOSE EXPLOITATION OF MUNICIPAL SLID WASTE (PLASTICS)
   Introduction
   Some Definitions
   Chemical Products
   Economic and Social Benefits
   Ecological Implications
   Fuel cells turn landfill gas into electric power
   Conclusion
   Activity Plan
   Steps to be Taken
   Expected Outcome

4. MANAGEMENT OF RECOVERABLE PLASTIC WASTE
   Incineration
   Mechanical Recycling
   Recent trends in recycling
   Feedstock Recovery
   Biodegradable plastics
   Energy Recovery

5. MANAGEMENT OF NON RECOVERABLE
PLASTIC WASTE
Photodegradable plastic
Landfill and composting
Biodegradable plastics from microbial origin
India Scenario
Conclusions and Future Outlook
6. STANDARDS ON ENVIRONMENT FRIENDLY PACKAGING AND ECO MARKING
ECO-Mark Scheme
Criteria for ECO-Mark
Product General Requirements
Product Specific Requirements
Procedure for Grant of Licence
ECO logo
General Requirements
Product Specific Requirements
Guidelines for Recycling of Plastics
International Guideline
7. DREAMS AND MYTHS ABOUT BIODEGRADABLE POLYMERS FOR PLASTICS PACKAGING
Origin and Myths of Biodegradable Polymers
Paper
Starch Based films
Suitability of Biodegradable Plastics in Packaging
8. PRESENT TECHNOLOGIES FOR RECYCLING OF POLYETHYLENE TEREPHTHALATE (PET) WASTE
Introduction
Methods for PET Recycling
Mechanical Recycling
Flotation/Hydrocyclone Process
Water Bath/Hydrocyclone Process
Solution/Washing Process
Solvent/Flotation Process
Depolymerisation
New Chemical Recycling Technique for PET
Recycling in India
9. BIO-DEGRADABLE PLASTIC FILM MADE OUT OF SOYBEANS: A BREAK THROUGH IN PLASTIC INDUSTRY
10. BIO-DEGRADABLE PLASTIC: A NEW OPTIONS FOR ENTREPRENEURS
11. PLASTIC WASTE RECYCLING TECHNOLOGIES ECO FRIENDLY SOLUTION
Plastic and Environment
Plastic Waste Management Strategies
Incineration
Recycling
Mechanical Recycling
Recycling to Feedstock and Energy
Process Components
Preretreatment
Liquefaction
Pyrolysis
Co-processing
Hydrocracking
Commercial Technologies
BP Technology
CFFLS Pyrolysis Technology
Bevan Pyrolysis Technology
German Liquefaction Technology
Incineration Technology with Energy Recovery
Indian Scenario
Conclusions and Future Outlook
12. BIO-DEGRADABLE PLASTICS: THE
ECO-FRIENDLY ALTERNATIVE
13. HOW TO MINIMISE THE IMPACT OF PACKAGING
MATERIALS ON THE ENVIRONMENT
Source Reduction
Recycling
Incineration
Landfill
How do we measure up
14. ENVIRONMENTAL MANAGEMENT
SYSTEM STANDARDS ISO 14000
ISO TC 207 and Development of ISO 14000
What is an EMS?
Benefits
Uptake by Business
EMS (ISO 14000) Pilot Programme
15. ENVIRONMENTAL LEGISLATION AND REGULATION
Principles
European Economic Area (EEA) Environmenta Regulation
with Reference to SMEâ€™s
Trade and the Environment International
Trade Centre (ITC)
Environmental Restrictions on trade
16. DEGRADATION OF PLASTIC
BYFUNGIN CONTRARY
17. â€œBIOPOLâ€œ (PHB-CO-PHV) ARE PRODUCED ALREADY COMMERCIALLY.
Biodegradable Polymers for Medicine
18. BIODEGRADABLE PLASTICS
19. PROCESSING OF SYNTHETIC AND
NATURALLY-OCCURRING POLYMERS
20. INJECTION MOLDING OF PLASTICS
FROM AGRICULTURAL MATERIALS
21. PRODUCTION OF DEGRADABLE PLASTIC
FROM EGG SHELL MEMBRANE PROTEINS
22. PHOTO-AND BIO-DEGRADABLE PLASTIC
Technology Description
Innovative Aspects
Application Fields
Status
Intellectual Property Status
Business Potential
23. BIOPOLYMERS
Biodegradable Materials
Water Absorbing Materials Based on Starch

Chitin-Chitosan
Physicochemical and Physical Properties
Biomedical Applications

24. ENVIRONMENTAL PLASTICS
Introduction
Feature
Application
CALFIN C30F & C31F CYPORENE.....
(Introduction, Feature, Application)
CLEAN-PLAS.....
(Introduction, Feature, Application)

25. DEGRADABLE PLASTIC
Biodegradable Polymers
Background of The Invention
Summary of the Invention
Detailed Description
Examples

26. THE PROPOSED PROJECTS FOR INTERNATIONAL ECONOMIC AND TECHNICAL COOPERATION
Project Survey

27. RE-NEW STARCH POLYMERS

28. NEW PLASTIC MADE FROM POTATO PEELS IS DEGRADABLE, INEXPENSIVE, AND ENERGY CONSERVING
Food Wastes can be used to Produce 100% Degradable Plastic
The Future is Promising for Degradable Plastic.

29. PACKAGING REGULATIONS IN THE EUROPEAN UNION INNOVATIONS IN PET

30. PACKAGING WITH PET BOTTLES
PET - a packaging plastics on the up and up
The PET mineral Water Bottle-Still Waiting in the Wings
Savings not only in Weight but also in Fuel
Recycling Quota up to 100 Per Cent

31. STARCH BASED BIODEGRADABLE PLASTICS
Raw Materials:
Uses

32. BIOPLASTICS
Introduction
Aiming for Biodegradable and Ecofriendly Products
The Problem of Plastic
The Solutions for Plastic
Biopol
General Structure of PHA and Some Representative Members
Properties of PHB
Production of PHA by Genetically Engineered Plants
Production of PHA in Genetically Engineered Bacteria

NIIR Project Consultancy Services (NPCS) 5/7
Price Factor
Possible Applications of PHAs
Industrial Production of PHAs and Other Biodegradable Plastics
Biolac
Conclusion

33. PET PRE-FORM FROM PET RESIN
Introduction
Uses
Properties
Market Survey
Permeation Coefficient
Manufacturing Process of PET Pre-form

PROCESS FLOW SHEET
List of Plant & Machinery
List of Raw Material
Plant/Machinery Suppliers
Overseas Suppliers of Machinery
PET Technology Suppliers
Raw Material Suppliers
Plant Economics

34. PET BOTTLES FROM PRE-FORM PET
Introduction
Injection Molding Machines
Blow Molding
Uses
Properties
Chemical Resistance, Environment Friendly
Manufacturing Process
List of Plant & Machinery
List of Raw Material
Plant/Machinery Suppliers
Overseas Suppliers of Machinery
Raw Material Suppliers
Market Survey
Plant Economics

35. INTERNATIONAL ENVIRONMENT ORGANISATIONS

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
