

# The Complete Technology Book on Fibre Glass, Optical Glass and Reinforced Plastics

**Author:** NIIR Board of Consultants & Engineers

**Format:** Paperback

**ISBN:** 8178330067

**Code:** NI177

**Pages:** 544

**Price:** Rs. 1,275.00 **US\$** 125.00

**Publisher:** Asia Pacific Business Press Inc.

Usually ships within **5** days

Although many natural materials were used in the past by man, answering his instinctive urges to prevent heat loss from or entry into his dwellings, no material in modern technology has satisfied the all around requirements as has fiber Glass. Fiber glass, optical glass and reinforced plastics have important applications and uses in the making of various products. Fiberglass is a lightweight, extremely strong, and robust material. Although strength properties are somewhat lower than carbon fiber and it is less stiff, the material is typically far less brittle, and the raw materials are much less expensive. Its bulk strength and weight properties are also very favorable when compared to metals, and it can be easily formed using molding processes. Fibre glass behaves as a thermal insulation because of its entrapment of small cells of air, and prevention of movement of the air in those cells. In acoustical applications, fibre glass presents to advancing sound waves a myriad of small anechoic chambers which reflect the sound inward from many diverse surfaces until it becomes blotted out. Optical glass is a high glass material that has been seen specifically formulated to possess certain desirable characteristics that effect the propagation of light. The two primary parameters that define the basic types of optical glass are its refractive index and its dispersion. Transportation on wheel is of special significance to the reinforced plastics industry on a number of counts. Suppliers of reinforced plastics parts are often called upon to furnish prototypes of products being considered for auto, truck and bus applications. Performance and quality demands on materials used in aerospace vehicles have given rise to many plastics developments and have kept profits in the plastics industry at a higher level than those in other major markets.

Some of the fundamentals of the book are fibres based on natural polymers:

fibres based on synthetic polymers, fibre glass blown wool or insulation products and their applications, fibre glass in wall construction for reduced sound transmission, ceramic fibre papers, ceramic fibre textiles, commercial polymerization processes, continuous filament fibre forming methods, marine applications, reinforced plastics for transportation on wheels, plastics in aircraft and aerospace, structural laminate bag molding process, reinforced molding compounds, filament winding, etc.

The present book contains processes and other valuable information for fiber glass, optical glass and reinforced plastics. This is very resourceful book for entrepreneurs, technocrats, institutions, researches etc.

# Contents

## 1. INTRODUCTION

Product and its applications  
Man Made Fibres : An overview  
History of man made fibres-world view  
Fibres Based on Natural Polymers:  
Fibres based on Synthetic Polymers  
History of man made fibres Indian scene

## 2. FIBRE GLASS BLOWN WOOL OR INSULATION PRODUCTS AND THEIR APPLICATIONS

Introduction-parameters and test methods  
Chemical Composition  
Fibre Diameter  
Binders  
Thickness and Density  
Percent shot  
Percent Recovery  
Other properties  
Building Insulation  
Thermal insulation-Homes  
Heat loss data and calculations  
Thermal insulation-Metal Buildings  
Blanket insulation  
Rigid insulation board  
Engineered systems for increased thermal performance  
Insulation of Mobile Homes, Recreational Vehicles, and Packaged Housing  
Acoustical insulation for buildings  
Thermal-Acoustical Batting  
Fibre Glass in Wall Construction for Reduced Sound Transmission  
Thermal-Acoustical insulation or improvement of existing construction  
Additional insulation for acoustical ceilings  
Acoustical ceiling materials  
Materials  
Dimensions and suspending systems  
Aesthetic appearance: Facings, configurations, contours  
Light reflectance  
Acoustical ratings  
Thermal properties of ceiling components  
Integrated systems  
The open office  
Industrial Noise Abatement  
Pipe and air handling insulations  
Pipe insulation  
History and Evaluation  
Manufacture  
Properties and Performance  
General properties  
Specific properties  
Applicable specifications  
Insulation for Air-Handling Systems and Ducting  
Introduction

External Duct insulation  
Internal Duct insulation  
Faced insulation for duct wrapping  
Fabricated Fibre Glass duct  
Appliance and equipment insulations  
Introduction  
Appliance insulation  
Forms available  
Product properties  
Miscellaneous  
Equipment insulation  
Standard roll-type insulation  
Dual-Density insulation  
Mechanically Bonded Mats  
Thermal insulating Wool  
Mineral Fibre Board insulation  
Double Mesh-Faced Insulation  
Metal-Jacketed Equipment insulation  
Miscellaneous  
Insulation for various transportation modes  
Automotive market  
Automotive insulation-Topliners  
Automotive insulation-Handliners  
Automotive insulation-Molded engine housing  
Insulation for Vans  
Automotive insulation-Miscellaneous components  
Summary  
Marine Products  
Navy Hullboard  
Marine Equipment insulation  
Felted Mineral  
Unbonded Mats or Batting  
Flotation wool  
Aircraft and aerospace insulation's  
Introduction  
Aircraft Frame insulation  
Reusable surface insulation for orbiting space vehicles  
High temperature insulation : Refractory Fibres  
Introduction  
Bulk Fibres  
Felts, Blankets, Boards  
Ceramic Fibre papers  
Ceramic Fibre Textiles  
Vacuum Forming Social Shapes  
Mixes  
Tamping Mixes  
Composite insulation for space firings and launchings.  
Reinforcement of Zirconia and Like foams.  
Filtration  
Introduction  
Condition of Air requiring filtration  
Properties of Glass Fibre as an Air Filter Medium  
Understanding Air-filtration Technology

Size of inner diameter  
Length  
Wall thickness  
Densities and interleaving  
Binder content  
Grooving  
Fibre diameter  
Advantages of Fibre glass in filtration of liquids  
Testing liquid filtration media  
Degree or fineness required  
Amount of material to be removed and at what rate  
Overall cost  
Applications and performance  
Paints, varnishes and solvents  
Photography processing  
Underground water flooding  
EDM (Electrical Discharge Machining)  
Filtration of Hydraulic oil  
Filtration of swimming pool water  
Absolute liquid filtration  
Filtration of Jet Fuel and the Like  
Fibre Glass Mat and Web products  
Introduction  
Glass Fibre paper  
Shingles and roofing mats  
Shingles  
Built up Roofing  
Industrial Bonded mats  
Pipeline Protection  
Roadbed protection  
Drain-Tile protection  
Backing for floor tile carpeting and wall covering  
Battery retainer mats  
Separator sheets for small batteries  
Laminated battery separator mats for larger batteries  
Verd and surfacing mats

### 3 MANUFACTURING PROCESSES

General  
Factors responsible for polymerization  
Co-polymer composition  
Neutral comonomers  
Ionic comonomers  
Molecular weight  
Catalyst preparation  
Process parameters  
Polymerization process  
General  
Bulk Polymerization  
Aqueous dispersion/suspension  
Emulsion polymerization  
Solution Polymerization  
Commercial polymerization processes

- Processing and spinning
- General
- Solution dope preparations
- Spinning processes
- Wet spinning
- Dry spinning
- Commercial spinning process
- Comparison of drywet spinning routes
- Special spinning processes
- Special Fibres
- Porous fibres
- Dyning of acrylic fibres
- Pollution control in acroylic fibre plant
- Raw materials
- Acrylonitrile
- Methyl Acorylate and Vinyl Acetate
- Methyl acrylate
- Vinyl acetate
- Ionic co-monomers
- Solvents
- Dimethyl formatted
- Dimethyl acetamide
- Nitric acid
- Major capital equipment
- Suspension polymerization parts
- Solution Polymerization parts
- Dry spinning parts

#### 4 CONTINUOUS FILAMENT FIBRE FORMING METHODS

- Introduction
- Marble melt process
- Direct-melt process
- The stricke and processes
- Fibreproduction from ceramic crucibles
- Metal coated glass Fibres
- Staple Fibre or sliver
- Production of Fibre optic elements
- Extrusion fusion method

#### 5 PRODUCT APPLICATION

- Optical glass
- Definition
- Types of optical glass
- Internal quality grades
- Optical Fibre
- Types of Optical Fibre
- Application Profile
- Optical glass
- Optical Fibre

#### 6. GLOBAL TECHNOLOGY TRENDS

- Glass fabrication
- Melting

Continuous process  
Other emerging fabrication methods  
Sol-gel method  
Vapour deposition method  
New Material compositions  
Environmental friendly materials  
IR materials  
UV Transmission materials  
Super flints  
Artificial Crystal materials  
Ophthalmic materials  
Component production  
Machining  
Gradient index materials  
Optical fibres  
Material status  
Optical fibre fabrication  
Fused quartz and synthetic fused silica tubes/rods  
Preform fabrication  
Fibre drawing and coating processes  
Furnace designs  
Fibre diameter measurement and control  
Fibre coatings  
High speed drawing and coating  
Fibre opto electronic devices and coupling  
Technology status India  
Optical glass  
Ophthalmic glasses  
BOGL  
Other Glasses at R & D states  
Emerging technology trends

## 7 TECHNOLOGY EVALUATION

Optical fibre  
Application viability  
Manufacturing Viability  
Preform Fabrication  
Fibre drawing  
Furnance Designs

## 8 MARINE APPLICATIONS

Introduction  
Marine structural laminates  
Resin systems  
Reinforcements  
Production processes  
Laminated Materials  
Response to marine environment  
Effect of extended water exposure on static properties  
Effect of water under pressure  
Recovery of properties of Drying  
Effect of water on Long terms loading properties  
Weathering effects

Biological attack- fouling  
Design of marine structures  
Applications  
Boat Construction  
Fabrication processes  
Fairings and Housings  
Submarine fairwaters  
Outer Hull structures  
Shipboard structures  
Tanks  
Structure sonar Domes  
Floats and Buoys  
Protective Coatings  
Current and future developments  
Large surface slips  
Naval construction  
United Kingdom program  
US program  
Deep submergence vehicles  
Properties of composite  
Effects of operational conditions on properties  
Design concept  
Ring stiffened cylinder  
Sandwich construction  
Hollow glass materials  
Other configurations  
Current Research  
Summation concluding remarks

## 9 REINFORCED PLASTICS FOR TRANSPORTATION ON WHEELS

Introduction  
Production versus materials costs  
FRP properties as related to transportation  
What reinforced plastics to use-where and why  
Low-or-No-Pressure  
Matched Metal Die Molding  
Contains strand mat  
Performs  
Sheet molding compound  
Bulk molding compound (Premix)  
Resins and reinforcements  
The cross over or break even point  
Improved, mechanized, automated equipment  
Mechanization not enough  
Improved equipment  
Low cost high quality auto and truck finishes  
Cases in point  
Mach fender Hood assemblies  
Falcon window frame moldings  
Pressure-molded reinforced plastic reefer panels  
GMC wheelhouse  
International fan shrouds and grille frame

## 10 PLASTICS IN AIRCRAFT AND AEROSPACE

Introduction

Aircraft

Progress

Applications

Plastic-ceramic Armor

Structural and Nonstructural parts

The all-plastics airplane

Costs versus Fabrication

Changing Environment

Aerospace

Introduction

Applications

Fibres

Nonwoven structures

Whiskers

Matrix

Re-entry vehicle

Ionizing Radiation

Effects of Vacuum

Use of advanced composites in spacecraft

Material requirements

Outguessing studies for Lunar Module

Conclusions

## 11 HAND LAY-UP TECHNIQUES

A simple hand lay-up

A complex hand lay-up

Drape molding

Spray-up

Wet lay-up low compression molding

Moldless lay-ups

Direct lay-ups or one-shot techniques

## 12 MATCHED DIE MOLDING-FABRIC, MAT AND PREFORM

Introduction

Definitions

Scope

Molding considerations

Mat materials for molding

Continuous Fibre mats

Mold taper for matched molds

Chopped glass performs

Directed Fibre perform process

Wet slurry process

Preform screens

Preform binders

Molding with fabrics

Vacuum injection molding

Displacement of No pressure matched mold molding

Flexible plunger molding

Molding Presses

Nonmetallic mold materials

Matched metal die molding  
Matched mold materials and mold design  
The positive types of molds  
Transfer molds  
Open flash molds  
The cut off mold  
Complex or combination molds  
Resins for pressure molding  
Resins  
Summary

### 13 STRUCTURAL LAMINATE BAG MOLDING PROCESS

Introduction  
General description of processes  
The bag molding team  
Material and process Engineer  
Tooling Engineer  
Quality control Engineer  
Production personnel  
Bag molding materials and properties  
Structural property determination and relation  
Typical test data  
Specification values  
Design allowable values  
Bag molding processing specification  
Quality control procedures  
Acceptance testing  
Tool cure cycle determination  
Secondary materials for Bag molding  
Production Surveillance and Corrective Action  
Production procedures  
Bagging Area  
Curing Area  
Autoclave Curing  
Detail curing operation  
Autoclave cure  
Oven Cure  
Part removal and finishing  
Final inspection  
Designer  
Materials and process engineer  
Tooling  
Quality control  
Production

### 14 REINFORCED MOLDING COMPOUNDS

Definition  
History  
Premix  
Sheet molding compound (SMC)  
Properties  
Applications  
Materials

- Resin
- Reinforcements
- Fillers
- Curing Agents and inhibitors
- Formulation
- Ingredients
- Premix
- Compounding
- Facility and equipment requirements
- Sheet Molding Compound
- Molding
- Mold Construction
- Release and Ejection of parts form the mold
- Molding presses
- Design

## 15 FILAMENT WINDING

- Introduction
- Basic material for windings
- Reinforcements
- Resin System
- The winding process
- Head counters
- Mandrels
- Behaviour of filament wound composites
- Netting analysis
- Filament winding machines
- Micromechanics and micromecahanics
- Test methods
- Composite Mechanical Properties
- Summary

## 16 Continuous production methods

## 17 Ablation

- Analysis
- History
- Applications
- Material characteristics
- Environmental effects
- Pyrolyzed and graphitized plastics
- Modified phenolic ablators

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
