Coconut is one of the oldest crops grown in India and presently covers 1.5 million hectares in this country. Found across much of the tropic and subtropical area, the coconut is known for its great versatility as seen in the many domestic, commercial, and industrial uses of its different parts. Coconuts are part of the daily diet of many people. Its endosperm is initially in its nuclear phase suspended within the coconut water. As development continues, cellular layers of endosperm deposit along the walls of the coconut, becoming the edible coconut flesh. When dried, the coconut flesh is called copra. The oil and milk derived from it are commonly used in cooking and frying; coconut oil is also widely used in soaps and cosmetics. The clear liquid coconut water within is a refreshing drink and can be processed to create alcohol. The husks and leaves can be used as material to make a variety of products for furnishing and decorating. It also has cultural and religious significance in many societies that use it. India stands third in the production of coconut in the world. There are only two distinguishable varieties of coconut; the tall and the dwarf. As a result of cross pollination in the tails, a wide range of variations occur within the same variety. Coconut based cropping/farming systems promote on farm diversity and strengthens ecological base of coconut farming. Coconut husk is the raw material for the coir industry. It is also used as a domestic fuel and as a fuel in copra kilns. Coconut oil comes under edible/industrial group, is used as cooking oil, hair oil, massage oil and industrial oil. It is dominated by saturated fats and high percentage of lauric acid. India accounts for the 18% of total coconut production in the world and it is the third largest coconut producing country in the world. Coconut processing adds value, and a number of products like coconut oil, desiccated coconut, coir fibre, pith, mattresses, desiccated coconut (DC), coconut cream, coconut milk, spray dried coconut milk powder, coconut shell products, shell charcoal, shell powder, virgin coconut oil are obtained. The demand for coconut oil increases 15 to 20 % during the festival season. Coconut oil for edible purposes is now being claimed to be the second best edible oil in the world, after Olive oil. Coconut shell charcoal is most widely used as domestic and industrial fuel. Some of the fundamentals of the book are product diversification in coconut, future of coconut oil, scope for product diversification, varieties of coconut, farming systems in coconut, organic farming of coconut, spices and herbs, establishment and maintenance of organic coconut plantations, production of organic spices, medicinal and aromatic plants along with coconut, crop improvement, green manuring in coconut garden.
organic recycling in coconut, soil moisture conservation in coconut garden, harvest and post harvest
technology, integrated farming in coconut holdings for productivity improvement, machinery and processing
of desiccated coconut, coconut processing sector in India, etc.
Coconut plays an important role in the economic, social and cultural activities of millions of people in our
country. India is a major producer of coconut in the world. Coconut provides food, edible oil, industrial oil and
health drink to humanity. All parts of coconut tree is useful in one way or other and the crop profoundly
influences the socio economic security of millions of farm families. The present book contains the methods of
cultivation and processing of coconut. This book is very beneficial for agriculturist, researchers, professionals,
entrepreneurs, agriculture universities etc.

Contents

1. PRODUCT DIVERSIFICATION IN COCONUT
   Future of Coconut Oil
   Scope for Product Diversification
   Philippines
   Sri Lanka
   India
   Other Uses
   Conclusion

2. VARIETIES OF COCONUT
   Tall Variety
   West Coast Tall
   East Coast Tall
   Lakshadweep Ordinary
   Lakshadweep Micro
   Andaman Ordinary
   Andaman Giant
   Kappadam
   Laguna
   San Ramon
   Macapuno
   Spicata
   Performance of exotic cultivars under Indian conditions
   Dwarf Variety
   Chowghat Green Dwarf
   Chowghat Orange Dwarf
   Malyan Dwarf
   Gangabondam
   Ayiramkachi
   Thembili (King Coconut)
   Coonino
   Mangipod
   Niuleka

3. FARMING SYSTEMS IN COCONUT
   Rooting Pattern
   Crown Structure And Light Transmission
   Water Use Efficiency
Nutrients
Choice of Inter / Mixed Crops
Criteria For Selection Of Inter/
Mixed Crops

4. ORGANIC FARMING OF COCONUT, SPICES AND HERBS
Organic Coconut Scenario
Scope For Organic Production of Coconut In India
Characteristics of A Typical Organic
Coconut Farm
Establishment And Maintenance of Organic Coconut Plantations
Conversion Period
Buffer Zone
Choice of Varieties
Raising Nursery
Land Preparation
Preparations for Planting
Aftercare of the Young Plantation
Nutrient Management
Green Manuring and Cover Cropping
Utilization of Waste from Coconut Palm
Improving Soil Conditions
Plant Protection
Biopesticides
Contamination Control
Soil and Water Conservation
Bee Keeping
Animal Husbandry
Conversion of Established Plantations
Conversion Period
Choice of Cultivars/Varieties
Composting of On-farm Crop Residues/
Farm Wastes
Nutrition Management
Weed Management
Processing of Organic Coconut
Production of Organic Spices, Medicinal And Aromatic

Plants Along With
Coconut
Certification of Organic Products

5. PLANTING MATERIAL
Collection of Seednuts
Raising Nursery
Nursery Care
Seedling Selection
Polybag Nursery
Care of Polybag Nursery
6. GARDEN ESTABLISHMENT
Site Selection
Time of Planting
Planting System
Land Preparation And Preparation of Pits For Planting
Replacement of Unproductive Palms
Replanting
Under Planting
After Care

7. CROP IMPROVEMENT
Varieties
Tall Group
West Coast Tall
East Coast Tall
Lakshadweep Ordinary
Lakshadweep Micro
Andaman Ordinary
Kappadam
VPM-3
ALR (CN) 1
Dwarf Group
Dwarf Green
Dwarf Orange
Malayan Dwarf
Gangabondan
Choughat Orange Dwarf
Tall And Dwarf Hybrids
VHC 1
VHC 2
VHC 3

8. CROP PROTECTION
Insect Pests
Rhinoceros Beetle, Oryctes rhinoceros L.
Management
Red Palm Weevil, Rhynchophorus ferrugineus Oliv. (Curculionidae: Coleoptera)
Management
Black Headed Caterpillar, Opisina arenosella Meyr. (Cryptophasidae: Lepidoptera)
Management
Termite, Odontotermes obesus Ramb. (Termitidae: Isoptera)
Management
Lacewing Bug, Stephanitis typicus Dist. (Tingidae: Hemiptera)
Scale Insect, Aspidiotus destructor Sign. (Diaspididae: Hemiptera)
Mealybug, Pseudococcus longispinus (T.),
P. citriculus G., Palmicultor palmarum (Eh.) (Pseudococcidae : Hemiptera)
Management
Slug Caterpillar, Latoia lepida Cram (Cochlidiidae: Lepidoptera)
Slug Caterpillar, Contheyla rotunda H.,
(Cochlidiidae: Lepidoptera)
Slug Caterpillar, Macroplectra nararia M.  
(Cochlidiidae: Lepidoptera)  
Management

White Leaf Roller, Gangara thyrsis M.  
(Hesperiidae: Lepidoptera)  
Green Leaf Roller, Suastus gremius F.  
(Hesperiidae: Lepidoptera)  
Long Green Caterpillar, Turnaca acuta W.  
(Notodontidae: Lepidoptera)  
Bag Worm, Manatha albipes M.  
(Psychidae: Lepidoptera)  
Management

Nut Borer, Cyclodes omma V.H.  
(Noctuidae: Lepidoptera)  
Lesser Coconut Spike Moth, Batrachedra arenosella Wlk. (Cosmopterygidae: Lepidoptera)

Flower Caterpillar, Syntomis passalis Fab. (Cosmopterygidae: Lepidoptera)

Ash Weevil, Myllocerus curvicornis Fab.  
(Curculionidae: Coleoptera)  
Stem and Bark Weevil, Diocalandra stigmaticollis G. (Curculionidae: Coleoptera)  
Management

Shot Hole Borer, Xyleborus perforans W.  
(Scolytidae: Coleoptera)  
Management

Coreid Bug, Paradasynus rostratus Dist.  
(Coreidae: Heteroptera)  
Management

Root Grub, Leucopholis coneophora Burm. (Melolonthidae: Coleoptera)  
Management

Ant, Dorylus orientalis W.  
(Formicidae: Hymenoptera)

Red Ant, Oecophylla smaragdina F.  
(Formicidae: Hymenoptera)  
Non Insect Pests

Mites  
Management  
Package of Recommendations  
Management  
Nematodes  
The Burrowing Nematode,  
Radopholus Similis  
Management  
The Coconut Nematode,  
Rhadinaphelenchus Cocophilus

Shell Flour
Coir And Coir Products
Handicrafts From Coconut
Coconut Wood Processing
Mushroom Cultivation Using Coconut Byproducts
12. INTEGRATED FARMING IN COCONUT HOLDINGS FOR PRODUCTIVITY IMPROVEMENT

13. FINANCIAL ASSISTANCE TO PROCESSING INDUSTRIES

14. COCONUT HUSK
Coir
Coir Geotextile
Coir Pith

15. COCONUT OIL
Properties Of Coconut Oil
Extraction Of Coconut Oil
Coconut Oil Based Oleochemicals
Coconut oil based Oleochemicals:
Coconut Oil Cake

16. MACHINERY AND PROCESSING OF DESICCATED COCONUT
Abstract
Introduction
Desiccated Coconut
Processing Of Desiccated Coconut
Plant & Machinery For Desiccated Coconut
Drying Of Desiccated Coconut
The Pilot Plant
Results And Observations
Scale-Up
Quality Of Desiccated Coconut
Conclusions

17. QUALITY STATUS OF DESICCATED COCONUT
Abstract
Introduction
Materials And Methods
Results And Discussion

18. COCONUT PROCESSING SECTOR IN INDIA
Trend In Area, Production And Productivity
Coconut Industry Vs Indian Economy
Present Status Of The Coconut Processing Sector
Traditional Coconut Products And Technological Innovations
Copra
19. VINEGAR FERMENTATION WITH SPECIAL EMPHASIS ON POSSIBILITIES OF UTILIZATION OF MATURED COCONUT WATER
Production And Volume
Raw Materials
Production Of Vinegar
Acetification Methods
The Orleans Process or Slow Process or French Process
Quick Process or German Process
Submerged Method
Other Modern Processes
Coconut Water As Possible Substrate
For Vinegar Fermentation
Preparation of Coconut Water Medium
Pfa Specifications For Vinegar Standards
Problems In Vinegar Manufacture
Ageing Of Vinegar

20. ACTIVATED CARBON FROM COCONUT SHELLS: SIGNIFICANCE AND PROSPECTS
Protection Against Toxic Gases
Air Purification And Recovery
Purification Of Various Gases
Filters For War Gases/ Nuclear Fall-Outs
Purifying Working Environments
And Elimination Of Odours
Recovery Of Solvents And
Other Vapours
Typical Plants where Such Solvents are Recovered
Separation Of Hydrocarbon Mixtures
Purification Of Fermentation
Carbon Dioxide
Recovery Of Gold
Carbon Batteries
Miscellaneous Applications
Activated Carbon As Catalyst
And Catalyst Carriers
Impregnated Carbons
Activated Carbon In Pollution Control
Conclusion

21. COMMERCIAL EXPLOITATION OF COCONUT PITH
Introduction
Coconut Pith
Utilisation Of Pith : Problems
Utilisation Of Pith : Prospects
Pith Fuel Briquettes Briquetting With Binders
Pith As An Ingredient In Agricultural/Horticultural Farms
Pith As A Heat Insulating Material
Conclusion

22. MODERN SEMI AUTOMATIC COPRA MANUFACTURING UNIT USING WASTE HEAT RECOVERY SYSTEM
Introduction
Present Uses Of Coconut Shell In India
Charcoal Manufacture And Waste Heat Recovery Unit
Chemical Analysis And Calorific Value
Whu And Pyrolysis Process
Modern Semi-Automatic Copra Drying Unit
Economic Of A Modern Copra Drying Unit
Inference

23. COCONUT KERNEL PRODUCTS
Virgin Coconut Oil
Desiccated Coconut
Coconut Milk
Spray Dried Coconut Milk Powder

24. FOOD PRODUCTS
The Wet Meat Or Kernel
Coconut Milk and Related Products
Coconut Skim Milk And Related Products
Coconut Protein And Edible Oil
Krauss-Maffei/C.F.T.R.I. Process
Texas A & M University Process
The TPI Process

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery,

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
