

# The Complete Book on Construction Materials

**Author:** NPCS Board of Consultants & Engineers

**Format:** Paperback

**ISBN:** 9788190439831

**Code:** NI190

**Pages:** 672

**Price:** Rs. 1,475.00 US\$ 150.00

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

Construction industry is the largest consumer of material resources, of both the natural ones (like stone, sand, clay, lime) and the processed and synthetic ones. Each material which is used in the construction, in one form or the other is known as construction material (engineering material). No material, existing in the universe is useless; every material has its own field of application. Stone, bricks, timber, steel, lime, cement, metals etc. are some commonly used materials by civil engineers. Selection of building material, to be used in a particular construction, is done on the basis of strength, durability, appearance and permeability. The stone which is used in the construction works, in one form or another is always obtained from the rocks. The rocks may be classified in four ways; geological classification, physical classification, chemical classification and classification based on hardness of the stone. Various kind of rocks come under these classification for example; igneous rocks, plutonic rocks, sedimentary rocks, silicious rocks, stratified rocks etc. brick is the most commonly used building material which is light, easily available, uniform in shape and size and relatively cheaper except in hilly areas. Bricks are easily moulded from plastic clays, also known as brick clays or brick earth. Bricks can be moulded by any of the three methods; soft mud process, stiff mud process and semi dry process. There are various kinds of bricks; specially shaped bricks, burnt clay bricks, heavy duty bricks, sand lime bricks, sewer bricks, refractory bricks, acid resistant bricks etc. lime is an important building material, it has been used since ancient times. Lime is used as a binding material in mortar and concretes, for plastering, for manufacturing glass, for preparing lime sand bricks, soil stabilization etc. Concrete is a construction material obtained by mixing a binder (such as cement, lime, mud etc.), aggregate (sand and gravel or shingle or crushed aggregate), and water in certain proportions. Based on the binding materials, the common concretes can be classified as; mud concrete, lime concrete, cement concrete and polymer concrete. World demand for cement and concrete additives is projected to increase 8.3 percent annually in next few years. This book basically deals with rock and stone, formation of rocks, classification of rocks, geological classification, metamorphism physical classification of rocks, chemical classification, classification based upon hardness of the stone composition of stone (rock forming minerals), igneous rock forming minerals, sedimentary rock forming minerals, texture of the rocks, types of fractures of rock, uses of stone, natural bed of stone, aluminium and magnesium alloys, mechanical properties of a partially cured resin, DMA characterization, chemical advancement of a partially cured resin, differential scanning calorimeter characterization, chemical mechanical relations, moisture content as a variable, wettability and water repellency of wood, fungal and termite resistance of wood etc.

The book provide wide coverage of building materials such as stone, bricks, lime, mortars, concrete, asbestos, gray iron, cast iron, steel castings, aluminium, wood, architectural paints and so many others with their applications in building construction. The book is resourceful for all professionals related to construction field, technocrats, students and libraries.

## Contents

## 1. STONE

- Introduction
- Rock and Stone
- Formation of Rocks
- Classification of Rocks
- Geological classification
- Metamorphism
- Physical classification of rocks
- Chemical classification
- Classification based upon hardness of the stone
- Composition of Stone (Rock-forming Minerals)
- Igneous rock forming minerals
- Sedimentary Rock Forming Minerals
- Texture of the Rocks
- Types of Fractures of Rock
- Uses of Stone
- Natural bed of Stone
- Seasoning of Stones
- Characteristics or Qualities of Stones
- Characteristics of principle Building Stones
- Properties
- Decay or Deterioration of Stones
- Preservation of Stone
- Artificial Stone
- Important point to be Considered before Starting Quarrying
- Methods of quarrying Stone
- Various Operations of Blasting
- Precautions in Blasting
- Blasting materials
- Making of Primer Cartridge
- Storing of explosives
- Handling of misfires
- Dressing of Stone
- Machines Required for Quarrying Stone

## 2. BRICKS AND OTHER CLAY PRODUCTS

- Introduction
- Brick Earth and its Constituents
- Sources of Brick Earth
- Qualities of Brick Earth
- Chemical composition of Brick Earth
- Functions of the constituents of Brick Earth
- Harmful Ingredients
- Pebbles of Stones and Gravel
- Alkaline-Salts
- Limestone and Kankar
- Vegetation and Organic Matter
- Manufacture of Clay Bricks
- Selection of site
- Preparation of Clay
- Weathering Process
- Tempering process
- Moulding of bricks

Soft mud process  
Procedure  
Stiff Mud Process  
Semi Dry Process  
Drying of Bricks  
Natural Drying  
Artificial Drying  
Burning of Bricks  
Clamp  
Intermittent Kilns  
Continuous Kilns  
Classification of Burnt Clay Bricks  
Introduction  
Properties of Burnt Clay Bricks  
General Quality of Bricks  
Dimensions and Tolerances  
Water Absorption of Bricks  
Efflorescence  
Strength of Bricks  
Testing of Bricks  
Test for Compressive Strength  
Test for Water Absorption  
Test for efflorescence  
Test for warpage  
Special Bricks  
Specially shaped Bricks  
Burnt Clay Facing Bricks  
Heavy Duty Bricks  
Perforated building bricks  
Sand lime Bricks  
Sewer Bricks  
Acid Resistant Bricks  
Refractory Bricks  
Manufacture  
Acid bricks  
Basic Bricks  
Neutral Bricks  
Building Tiles  
Process for Manufacturing Roofing Tiles  
Process for Manufacturing Flooring and Wall Tiles  
Specifications for Building Tiles  
Earthenwares  
Glazed Earthenware Tiles  
Terracotta  
Stoneware

### 3. LIME

General  
Properties of Lime  
Uses of Lime  
Source of Lime  
Some Important Terms and their Definitions  
Varieties of lime

Classification of Lime  
Uses of fat lime  
Classification of Lime According to I.S. 712-1984  
Indian Standard Specification for Lime  
Manufacturing process  
Description of Each Stage of Operation  
Field Control Test for Assessing Quality of Lime  
Manufacture of Fat Lime  
Advantages of continuous kiln  
Manufacture of Natural Hydraulic Lime  
Manufacture of Artificial Hydraulic Lime  
Storage of Lime  
Field Slaking of Lime and Preparation of Putty  
Objective of Slaking  
Slaking Process  
Determining the Slaking Nature of Lime  
Slaking Procedure for Quick Slaking Lime  
Initial Preparation  
Methods of Slaking Lime  
General Precautions in Slaking  
Slaking Procedure for Medium and Slow-slaking Limes  
Running  
Maturing  
Making Coarse Stuff and Putty from Hydrated Lime or Powder  
Coarse Stuff  
Putty  
Storage after slaking  
Testing of Lime  
Classification of binding materials  
Precautions to be taken in handling lime  
Properties of Lime

#### 4. MORTARS

Definitions  
Sand  
Classification Based on Fineness  
Bulking of Sand  
Desirable Properties of Sand  
Function of Sand in Mortars  
Fineness Modulus of Sand  
Tests for Sand  
Selection of Sand for Use  
Substitutes for Sand  
Types of Mortars  
Special Mortars  
Properties of Good Mortar  
Test for Mortars  
Precautions in using Mortar

#### 5. CONCRETE

Introduction  
Lime Concrete  
Preparation of lime Concrete

Laying of Lime Concrete  
Properties of Lime Concrete  
Use and Precautions  
Water  
Coarse Aggregate  
Grading of Aggregate  
Proportioning of Fine Aggregate to Coarse Aggregate  
Maximum Size of the Aggregate  
Measurement of Cement Concrete Ingredients  
Significance of Bulking of Sand  
Water Cement Ratio (W/C Ratio)  
Proportioning of Concrete Mixes  
Cube strength of Concrete  
Properties of Cement Concrete  
Slump Test  
Factors Affecting Proportions of Concrete  
Strength of Concrete  
Mixing of Concrete  
Transporting the Concrete  
Placing of Concrete  
Consolidation or Compaction of Concrete  
Finishing  
Curing of Concrete  
Removal of Form Work  
Joints in Concrete  
Some other Types of Cement Concretes  
Form Work

## 6. ASBESTOS

Introduction  
Commercial Focus  
Asbestos Sheets and Boards  
Asbestos Cement Pipes

## 7. ASPHALT, BITUMEN AND TAR

Introduction  
Terminology  
Asphalt/Bitumen  
Other Allied Terms  
Bituminous Materials  
Bitumen Felt/Tar Felt  
Specifications and use  
Other Bituminous Materials  
Tests for Bitumen  
Tar

## 8. GRAY IRON

The Metastable Iron-Iron Carbide System  
Solidification of an Fe-C-Si Alloy  
Chemical Composition Effects  
Carbon  
Silicon  
Silicon Content and Graphitization

- Sulfur and Manganese
- Phosphorus
- Gray-iron Specifications
- Heat-treatment of Gray Iron
- Machinability
- Wear Resistance
- Strength
- Stress Relief
- Alloying Elements
- Effect on Microstructure
- Chromium
- Molybdenum, Molybdenum-Nickel
- Nickel
- Silicon
- Copper
- Aluminum and Titanium
- Effect on Properties

## 9. CAST IRON

- Definitions
- Chemical Composition
- Composition and Graphitization
- Solidification Process
- Microstructure
- Graphite
- Cementite
- Ferrite
- Pearlite
- Steadite
- Austenite
- Properties of Cast Irons
- White Irons
- Chilled Iron

## 10. STEEL CASTINGS

- Introduction
- Molding Processes And Sands
- Green-sand Molding
- Refractoriness
- High permeability and Low Moisture Content
- Organic and Other Additions
- Green-sand-molding Casing Defects
- Dry-sand Molds and Skin-dried Molds
- Other Types of Molds
- Molding Methods
- Cores
- Hot-tear Formation
- Metal penetration
- Burn-on
- Ceroxides
- Core and Mold Washes

## 11. ALUMINIUM AND MAGNESIUM ALLOYS

ALuminum Alloying Principles  
Copper  
Heat-treatment of Cu-Al Alloys  
Silicon  
Magnesium  
Magnesium and silicon

## 12. DUCTILE IRON

Solidification Of Ductile Iron  
Development of Graphite Spheroids  
Role of Magnesium  
Control of the Common Elements  
Carbon  
Silicon  
Sulfur  
Phosphorus  
Other Elements  
Melting Practices  
Acid Cupola Melting  
Desulfurization  
Basic Cupola Melting  
Induction-furnace Melting  
Magnesium Treatment  
Inoculation  
Engineering Properties

## 13. MALLEABLE IRON

Melting  
Batch-Melting Process  
Engineering Properties  
Pearlitic Malleable Irons  
Other Malleable Irons

## 14. RESIN CHARACTERIZATION

Introduction  
Scope  
Mechanical Properties of a Partially Cured Resin – DMA Characterization  
Chemical Advancement of a Partially Cured Resin – Differential Scanning Calorimeter Characterization  
Chemical-Mechanical Relations  
Moisture Content as a Variable  
Flake Bonding  
Measurement of Pressing Environments  
Resin Penetration  
Practical Application

## 15. THERMO-GRAVIMETRY OF WOOD REACTED WITH FLAME RETARDANTS

Introduction  
Experimental Methods  
Results and Discussion  
Phosphorus And Nitrogen  
Thermogravimetry  
Flame Test  
Conclusions

## 16. WETTABILITY AND WATER REPELLENCY OF WOOD

Introduction

Experimental

Wood materials

Automated surface tension analyzer

Computer program: wood wettability study

Graph

Contact angle from attractive force

Contact angle from work of adhesion

Surface free energy estimation

Interaction parameter calculation

Aging effect

Results and Discussion

Aging effect

Surface free energy estimates

Interaction parameter calculation

## 17. FLAME RETARDANT TREATMENT OF WOOD

Introduction

Materials and Methods

Preparation of specimens

Treatment of specimens

Leaching

Dimensional stability tests

Thermogravimetric analysis

Results and Discussion

Treatment of specimens

Leach resistance

Dimensional stability

Thermal degradation

Conclusions

## 18. FUNGAL AND TERMITE RESISTANCE OF WOOD

Introduction

Materials and Methods

Fungal evaluations

Termite evaluations

Reaction time and chemical analysis

Results and Discussion

Decay Resistance

Chemical Analysis

Conclusions

## 19. WEATHERING OF WOOD

Introduction

Early History

The Weathering Process

Weathering Factors

Property Changes

Weathering of Wood-Based Materials

Protection Against Weathering

Film-forming Materials  
Penetrating Finishes  
Summary

## 20. ARCHITECTURAL PAINTS

Introduction

Exterior Paints for Wood

Characteristics of Wood Siding

Binders for Exterior House Paints

Pigments for Colored Paints

Microorganisms in Paints and Coatings

Formulating Exterior Paints for Wood

Interior Paints for Plaster and Wallboard

Exterior Emulsion Paints for Masonry

Exterior Solution Type Paints for Masonry

Interior and Exterior Enamels

Enamels for Wood and Concrete Floors

## 21. BUILDING CONSTRUCTION ADHESIVES

Introduction

Advantage of Using Adhesives in Construction

Elastomeric Adhesives

Gap-Filling Phenol Resorcinol Adhesives

Polyurethane Adhesives

Resorcinol Resin Adhesives

Casein Adhesives

Polyvinyl Acetate Resin Emulsion

Phenolic Resin Adhesives

Melamine-Urea Resin Adhesives

Urea Resin Adhesives

Epoxy Resin Adhesives

Contact Cement

## 22. FLOORING

Domestic Flooring

Institutional Flooring

Industrial Flooring

Types Of Epoxy Flooring

Self-levelling Floors

Trowelled Floors

Epoxy Terrazzo

Future Developments In Epoxy Floors

## 23. MINING

Adhesion And Grouting

Remedial Uses

Concrete Crack Repair

Bonding Concrete to Concrete

Bonding Reinforcements

Epoxy Bonding in New Structures

Fire Resistance

Bulk Mechanical Properties

Creep

## Miscellaneous Bonding Applications

### 24. GROUTS FOR LEVELLING: MISC. APPLICATIONS

Miscellaneous Applications

Soil consolidation

Tile grouts

Epoxy laminates for concrete moulds

Resin concrete

### 25. GLASS

Structure

Composition

Single-Phase Glasses

Properties

Manufacture and Processing

Economic Aspects

### 26. CEMENT

Clinker Chemistry

Hydration

Cement Paste Structure and Concrete Properties

Manufacture

Portland Cements

Special Purpose and Blended Cements

Nonportland Cements

Economic Aspects, Production, and Shipment

Specifications and Types

Uses

### 27. INSULATING MATERIALS

Introduction

Thermal Insulation

Terminology Related to Thermal Insulation

Requirements of Thermal Insulating Materials

Types of Insulating Materials

Air Spaces

Aerated Concrete

Gypsum

Expanded Blast Furnace Slag

Sprayed Asbestos

Vermiculite

Coconut Fibres

Cork Board

Rock Wool

Cellulose

Cellular Plastics

Fibre Glass

Sound Insulation

Terminology

Units of Sound

Velocity of Sound

Acoustics

Noise  
Requirement of Sound Insulating Materials  
Types of Acoustical Materials  
Acoustic Pulp  
Acoustical Plaster  
Unifil Acoustical Plaster  
Limpet Asbestos  
Thermacooustic  
Prefabricated Boards or Tiles  
Glass Fibres  
Composite Units

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
