The pulp and paper industry comprises companies that use wood as raw material and produce pulp, paper, board and other cellulose based products. The pulp and paper sector presents one of the energy intensive and highly polluting sectors within the Indian economy and is therefore of particular interest in the context of both local and global environmental discussions. Increases in productivity through the adoption of more efficient and cleaner technologies in the manufacturing sector will be most effective in merging economic, environmental, and social development objectives. Papers are mostly used product starting from writing to packaging. It plays an important role in commercial field as well as in academic field also. Without paper nothing is expressible and reliable, so paper is part and parcel of our life. Adequate amount of raw materials for processing paper and pulp is available. Bamboo is the main raw material for Indian paper industry. New bamboo areas even at high cost are being trapped. Some of the examples of high yield pulping process are mechanical process, semi chemical process, alkaline chemical process, sulfite process, etc. Physical strength properties of paper depend on the quality of raw material, its pulping, bleaching and subsequent paper making processes. Technology has made it easy to process these raw materials in an economic and lucrative way to meet the global demand. Raw materials like, straw, bagasse, wood, bamboo is almost available in most of the places. So it is great opportunity for the entrepreneurs to start up such kind of industry. Paper Industry has tremendously increased in India in the last 20 to 30 yrs. The Paper industry is a priority sector for foreign collaboration and foreign equity participation up to 100% receives automatic approval by Reserve Bank of India. Several fiscal incentives have also been provided to the paper industry, particularly to those mills which are based on non conventional raw material. Some of the fundamentals of the book are bleaching of bamboo cold, high yield semi chemical pulping of mixture of bamboo and mixed hardwoods, sulphate semi chemical process, kraft green liquor semi chemical process, neutral sulphite semi chemical process, thermo mechanical pulps for newsprint, zeta potential concept in paper sizing, sodium carbonate in alkali extraction during bleaching bamboo, maintenance engineering in pulp and paper industry, design and application of refiners in stock preparation, paper machine effluent etc. This book explains about the various raw material, their processing and utilizations and also the possible waste treatment of such paper and pulp making industry. To draw attention for manufacturing quality product with all possible latest technologies is the main purpose of this book. The book is very resourceful for new entrepreneurs, technocrats, existing units and research scholars.

Contents

1. BLEACHING OF BAMBOO COLD SODA PULPS
Results and Discussions
Constant Conditions
Pretreatment with Acid
Pretreatment with Alkali
Bleaching Conditions in Different Stages
Effect of Peroxide in Alkali Pretreatment
Pretreatment with Dye
Bleaching Conditions in Different Stages
Conclusions
Experimental
Raw Materials
Bleaching

2. HIGH YIELD SEMI-CHEMICAL PULPING OF
MIXTURE OF BAMBOO AND
MIXED HARDWOODS
Raw Material
Experimental and Results
Sulphate Semi-Chemical Process
Kraft Green Liquor-Semi-Chemical Process
Neutral Sulphite Semi-Chemical Process
Discussion
Sulphate Semi-Chemical Process
Green Liquor Semi-Chemical Process
Neutral Sulphite Semi-Chemical Process
Conclusion

3. DEVELOPMENT IN HIGH YIELD PULPING PROCESS
Mechanical Process
Semichemical Process
Chemical Process
Alkaline Chemical Process
Sulfite process
Organic Catalyst to High Yield Pulping
AQ Pulping Technology
Polysulfide-AQ Process
Alkaline Sulfite-AQ Pulping
Experimental

4. THERMO-MECHANICAL PULPS FOR NEWSPRINT
MANUFACTURE FROM TROPICAL PINES
Raw Materials
Experimental
Preparation of Thermo-Mechanical Pulps
Results and Discussions

5. A STUDY ON REPLACEMENT OF SODIUM
SULPHATE BY AQ-LARGE SCALE TRIAL
Anthraquinone an Aid to Pulping
Laboratory Scale Investigations at Central Research Laboratory, Dalmianagar
Plant Trial with AQ
Evaluation of Mill Pulp
Discussion and Results
Conclusions

6. ZETA POTENTIAL CONCEPT IN PAPER SIZING
Electro Kinetic (Zeta) Potential-A Concept
The Theory of Electrical Double Layer
Sternâ€™s Modified Double Layer

7. ECONOMICS OF BAMBOO AND HARDWOOD PULPING BY ANTHRAQUINONE CATALYSED-KRAFT-PROCESS
Experimental Design & Observations Results & Discussions Conclusion

8. EFFECT OF BLEACHED PULP VISCOSITY ON STRENGTH PROPERTIES OF BAMBOO SULFATE PULP
Experimental Pulping Bleaching Physical Strength Properties Chemical Analysis Observations and Discussions Conclusion

9. ALKALI/OXYGEN DELIGNIFICATION AND BLEACHING OF SODA BAMBOO PULP
Experimental Discussions Conclusions

10. ALKALI/OXYGEN DELIGNIFICATION AND BLEACHING OF SODA BAMBOO PULP, BAMBOO + MIXED HARD WOOD PULP (70 : 30) AND MIXED HARDWOOD PULP
Experimental and Results Discussions Conclusion

11. SODIUM CARBONATE IN ALKALI EXTRACTION DURING BLEACHING BAMBOO (D. STRICTUS) PULP
Experimental Study on Sequentially Chlorinated (H/C) Pulp Study on Chlorinated Pulp Results and Discussion Conclusions

12. EFFECT OF HEMICELLULOSES ON UNBLEACHED SOFTWOOD KRAFT PULP
Materials and Methods Enzyme Treatments Bleaching Experiments Chemical Composition and Kappa Number Analyses Microscopic Analysis Numerical Measurement of Colour Results and Discussion Chemical Changes After Enzyme Treatment Bleaching Experiments Graff â€™Câ€™ Stain
Numerical Measurement of Colour
Accessibility Changes and Simonsâ€™ Stain
Deuterium Oxide Exchange
Simonsâ€™ Stain

Conclusions

13. THERMODYNAMIC FUNCTIONS OF THE REACTION BETWEEN LIGNIN AND HYDROGEN PEROXIDE DURING BLEACHING

Experimental
Isolation of Thiolignin
Preparation of Hydrogen Peroxide Solution
Reaction of Thiolignin with Hydrogen Peroxide
Results and Discussion
Analysis of Kinetic Data
Order of the Reaction and Variation of Rate
Constant with Reaction Parameters
Validity of Arrhenius Equation (Reaction Rates and Temperature Changes)
Estimation of various Thermodynamic Functions
Conclusions

14. SEQUENTIAL BLEACHING

Experimental Procedure
Discussions of the Results
Bleach Consumption
Physical and Chemical Properties
Pollution Load of the Filtrate
Conclusion

15. MANUFACTURE OF CORRUGATING MEDIUM PAPER UTILIZING 100% BAGASSE FURNISH

Process Suggested for Making
Corrugating Medium from 100% Bagasse
Fibre Preparation
Depithing at Paper Mills
Digestion Cycle
Stock Preparation

16. EFFECTIVE UTILIZATION OF CHEMICALS IN PULP AND PAPER MILLS

Digester House
Chemical Recovery Section
Bleach Plant
Chemical and Stock Preparation
Effluents

17. EFFECTIVE USE AND RECOVERY OF CHEMICALS IN COLD SODA PULPING

Experimental
Chemical Treatment of E. Tereticornis
Eta Reed Sulphate Pulping
Evaporation and Burning Properties of Kraft and Cold Soda Spent liquors
Results and Discussions
Chemical Consumption
Pulp Properties
Composition of Liquors
Pollution Loads
Properties of Spent Liquors
Material Balances
Conclusions

18. EFFECTIVE USE AND RECOVERY OF CHEMICALS IN COLD SODA PULPING WITH PARTIALLY CLOSED SYSTEM
Chemical Treatment of E. Tereticornis
Results and Discussions
Conclusions

19. MAINTENANCE ENGINEERING IN PULP AND PAPER INDUSTRY
Inspection
Lubrication
Servicing
Maintenance Problems

20. LIMITATION TO SATISFACTORY OPERATION OF WET END OF PAPER MACHINE
Basis Weight Profile
Head Box Pulsation
Drainage Formation and Sheet Structure
The Head Box
Rectifier Roll Head Boxes
Micro Turbulence Head Boxes
Web Formers
Twin Wire Forming
Schmidt Classification
Norman Classification
High Consistency Forming
Ancillary Equipments
Wet Web Strength
Limitations of Water Removal on Pressing
Conclusion

21. DESIGN AND APPLICATION OF REFINERS IN STOCK PREPARATION
Conical Refiners
Shallow Angle Refiner
Steep Angle Refiners
Double Disc Refiners
Safety Devices
Influence of Machine Variables on Refining
Batch Refining
Machine Refiners

22. WET FELT DESIGNING TECHNIQUES
Pressing
Case Study
Recommendations

23. MODERNIZATION AND OPTIMUM UTILIZATION OF EVAPORATORS FOR HARDWOOD BLACK LIQUORS-MILL EXPERIENCE
Hardwood Black Liquors
Recovery Boilers and Required Liquor Solids
Original Evaporator Units
Installation of a Pump in Between First Pass and Second Pass of Concentration Effects of Both Units

Conversion of Concentration Effect of First (OLD) Unit to a Finisher

Introduction of a New Finisher Effect

Utilization of Vent Vapour from Finisher

Changing the Liquor Entry from Tangential to Radial and Modification of Flash Chamber

Utilization of Vapour from Improvised Finisher of Old Street

Conclusions

24. PAPER MACHINE EFFlUENT

Experimental Discussions

Mode of Treatment for Paper Machine Effluent

Results

Conclusion

25. CONICAL REFINERS AND WIDE-ANGLE REFINERS IN CONTINUOUS AND BATCH REFINING SYSTEMS FOR BAMBOO AND HARDWOOD FURNISH

Introduction

Types of Refining Systems in the Mill

Conical and Wide Angle Refiners Strength, Development and Power Consumption

26. USE OF â€œNO PICKâ€™ ROLL IN PAPER MACHINE PRESS SECTION BASED ON SHORT-FIBRED TROPICAL HARDWOODS AND AGRICULTURAL RESIDUES

Theoretical Considerations

The Problem

Press Section Before Modification

Press Section After Modification

Discussion

Conclusions

27. CONSUMPTION OF FURNACE OIL IN RECOVERY BOILERS

Storage

Viscosity

Velocity

Turbidity & Causticity

Silica

Inverse Solubility

Organic Content and Calorific Value

28. NECESSITY TO RENOVATE AND MODERNIZE PAPER MACHINE

Fourdriner Part

Press Part

Dryer Section

Calender Stacks

Pope Reel

Conclusion

29. WET END OPERATION OF A PAPER MACHINE

Approach Flow

Head Box
The Slice
Approach System, Head Box and Slice at W.C.P.M.
Sheet Formation and Drainage on the Fourdrinier
Shake
Suction Boxes
Dandy Roll
The Couch
Conclusion
30. CLEANING SYSTEM-SHOWER FOR PAPER MACHINE
Mechanical Cleaning
Classification of Water Shower
Wire Cleaning Shower
Knock off Shower
Trim Knock-off Shower
Couch Roll Cleaning Shower
Return Roll Cleaning Shower
Dandy Cleaning Shower
Felt Shower
Special Features of Water Showers
Material of Construction
Insert Type Nozzle
Protective Shell
Programming
Filters
31. SUITABILITY OF KENAF CTMP FOR LINERBOARD
Experimental
Raw Material
Particle Size
Reduction and Washing
Injection Process
Fiberizing and Refining
Kraft Pulping
Pulp Testing and Handsheet Formation and Testing
Results and Discussion
Andritz Sprout-Bauer Pulping Trials
FPL Pulping Trials
Kenaf and Loblolly Pine Pulp Blends
Conclusions
32. NEWSPRINT FROM BLENDS OF KENAF CTMP
AND DEINKED RECYCLED NEWSPRINT
Experimental
Results and Discussion
Conclusion
33. FEASIBILITY OF USING KENAF
CHEMITHERMOMECHANICAL PULP IN
PRINTING AND WRITING PAPER
Results and Discussion
Andritz Sprout-Bauer and FPL Pulping Trials
Postbrightened Kenaf Thermomechanical Pulp
Conclusions
Experimental
Raw Material, Particle Size Reduction, and Material Wash
Injection Process
Fiberizing and Refining Process
Testing of Pulp and Forming and Testing of Handsheets
Postbrightening of Kenaf TMP
Brightness Reversion
34. MESTA/KENAF AS RAW MATERIAL FOR KRAFT PULPING
Raw Material
Experimental
Chemical Constituents of Mesta
Pulping and Sheet Making
Discussion
Physical Characteristics
Chemical Constituents
Pulping Bleaching and Black Liquor Characteristics
Morphological Studies
Properties of Pulp Sheets
Fibre Classification Results
Conclusions
35. RESPONSE OF KENAF VARIETY, HC-583
TO DIFFERENT LEVELS OF NITROGEN
Materials and Methods
Results and Discussion
Plant Height
Basal Diameter of Stalk
Dry Yield of Stalk
Increase in Dry Yield of Stalk per Kg. N Applied
Conclusion
36. PREHYDROLYSED KRAFT COOKING OF
JUTE STICK (EFFECT OF PREHYDROLYSIS CONDITION)
Experiments
Raw Materials
Digestion
Bleaching
Chlorine Water Bleaching
Analysis of the Pulp
Results & Discussion
A. Effect of Prehydrolysis Treatment on the Chemical Composition of Jute Stick
B. Loss of \( \alpha \)-Cellulose and Lignin after Prehydrolysis and Kraft Cooking of Jute Stick
Results of Bleached Pulps
Conclusions
37. HIGH YIELD PULP FROM JUTE STICKS
38. GREASE PROOF PAPERS FROM SULPHITE JUTE STICK PULP
Raw Material
Pulping
Conclusion
39. CHEMICAL RECOVERY BOILERS FOR PULP MILLS
USING AGRICULTURAL RESIDUES AS RAW MATERIALS
Present and Future Prospects of Agricultural Residue Usage in India
Advantages of Use of Agricultural Residues
Special Shelter Type Design for Smaller Units
40. PROBLEMS IN BL EVAPORATION IN INDIAN RAW MATERIALS
Black Liquor Screening
Black Liquor Soap Problem
Carbonaceous Deposits
Scale Formation and its Removal
Results Achieved
Technical
Vapour Side Scale
Method of Feeding Black Liquor
Mixed Feed
Quintuple Effect & Forced Circulation Evaporator
Forced Circulation Evaporator

41. UTILIZATION OF UNCONVENTIONAL RAW MATERIALS
Advantages at a Glance—New Process
Cooking Liquor and Position of pH (Cold) during Pulping
Pulping Conditions and Delignification
Yield and General Properties of Pulp
Chemical Composition of Unbleached Pulp
Bleaching of Pulp
Paper Making Properties
Black Liquor and Recovery
Environmental Protection
Air Protection
Water Protection
Future Looks
Sulfite Shuttles into Space

42. UTILIZATION OF AGRICULTURAL RESIDUES USING MECHANO-CHEMICAL PULPING PROCESS
Pilot Plant Trials at Cellulose and Paper Branch,
Forest Research institute and colleges, Dehradun
Production of Rice Straw Pulp
Production of Wheat Straw Pulp
Production of Bagasse Pulp
Production of Paper
Mechano Chemical Pulping on Industrial Scale
Chemical Preparation
Cooking
Search for Alternative Raw Material
Variables in the Process
Modification of Bagasse Pulping by Partial Replacement of Sodium Hydroxide by Sodium Carbonate
Addition of Sodium Sulphide in Cooking Liquor in Bagasse Pulping
Conclusion

43. FEASIBILITY OF RECYCLED NEWSPAPERS HARDBOARDS
Experimental Design and Analysis
Materials
Processing
Acetylation
Adhesive Application
Board Manufacture
Testing
Results and Discussion
Static Bending Properties
Tensile Strength Properties
Water Absorption and Thickness Swell
Linear Expansion
Concluding Remarks

44. RESTORING BONDING STRENGTH TO RECYCLED FIBERS
   Dry-Fiberized Fiber Characteristics
   Mechanical Treatment
   Fractionation
   Strength Additives
   Chemical Treatments
   Blending with Virgin Fiber
   Papermaking Variables
   Wet-Formed Papers
   Pressing
   Air-Formed Papers
   Conclusions

Methods and Materials

45. CHEMICAL MODIFICATION OF AGRO-FIBER FOR THERMOPLASTICIZATION
   Experimental Procedures
   Esterification Procedure
   Thermal Analysis
   Pressing of Esterified Fiber
   Electron Microscopy of Pressed Fiber
   Swelling of Pressed Fiber in Water
   Results and Discussion
   Esterification of Lignocellulosics
   Thermal Analysis
   Swelling of Pressed Fiber Pellets in Water
   Conclusions

46. POTENTIALS FOR COMPOSITES FROM JUTE AND ALLIED FIBERS
   Plant Utilization for Composites
   Potential Composites for Agro-Resources
   Geotextiles
   Filters
   Sorbents
   Structural Composites
   Non-structural Composites
   Molded Products
   Packaging
   Combinations with Other Resources
   Chemical Modification for Property Improvement
   Conclusions

47. AN APPROACH TO "INPLANT COLOUR REDUCTION" OF BLEACH PLANT EFFlUENT USING CALCIUM HYPOCHLORITE
   Experimental
   Discussion

48. DESILICATION OF SULPHATE WEAK BLACK LIQUOR BY THE ADDITION OF LIME
   Experimental
   Procedure of Desilication
   Results & Discussion

49. TREATMENT OF PULP & PAPER MILL WASTES
   Pulp and Paper Industry Water
   Consumption
Nature and Effect of Impurities
Primary Treatment
Sedimentation Units
Sludge Handling & Disposal
Secondary Treatment

50. DECOLOURIZATION OF WASTE WATER FROM BLEACHED-KRAFT PULP & PAPER MILL USING ALUM AND CLAY

Materials and Methods
Results and Discussion
Sludge Blanket
Effluent Quality
Colour Removal
Removal of Suspended Solids
COD Reduction
Conclusion

51. REMOVAL OF SOLUBLE SILICA FROM SULPHATE GREEN LIQUOR

Experimental
Carbonation
Green Liquor Analysis
Results & Discussion

52. TRENDS IN ASH CONTENT OF STRAW PULPS: AN EXPLANATION

Experimental

53. MINI LIME TREATMENT OF DISSOLVING PULP MILL COLOURED EFFLUENT

Sources of Colour in the Pulp Mill
Effluent
Present Work
Chlorination of Lime Treated Effluent
Calcining of Effluent Sludge
Causticization Using Lime Obtained from Effluent Sludge
Conclusion

54. COLOUR AND COD REDUCTION OF BLEACH EFFlUENTS

Experimental
Results and Discussions
Colour of the Effluents
Phenolic Compounds
Rate of Colour Reduction
Chemical Oxygen Demand
Conclusions

55. EFFECT OF pH ON SULPHITE PULPING OF HOLOCELLULOSE OF E. TERETICORNIS

Experimental
Preparation of Cooking Liquor
Titration of Cooking Liquor
Sulphite Pulping
Neutral Sulphite Pulping
Preparation of Cooking Liquor
Chemical Analysis of Sulphite and Neutral Sulphite Cooked Holocellulose
Results and Discussion

Effect of pH and Cooking Time on Yield
Effect of pH and Cooking Time on Klason Lignin
Effect of pH and Cooking Time on Alpha-Cellulose
Effect of pH and Cooking Time on Pentosans
Effect of pH and Cooking Time on Acidic Sugar
Effect of pH and Cooking Time on Methoxyl and Acetyl Groups

56. UTILIZATION OF AGRICULTURAL RESIDUES FOR PULP, PAPER AND BOARD

Rice Straw
Writing and Prints Paper
Grease Proof Paper
Wrapping Paper
Straw Board
Fibre Boards
Wheat Straw
Writing & Printing Paper
Greaseproof Paper
Straw Board
Jute Sticks
Writing and Printing Paper
Wrapping Paper
Pulp Yield and Sheet Characteristics
Straw Board
Newsprint Grade Refiner Groundwood Pulp
Constitution of Hemicellulose
Greaseproof Paper, Strength Properties of Standard Sheet
Building Board
Bagasse
Writing and Printing Paper
Wrapping Papers
Rayon Grade Pulps
Greaseproof paper
Straw Board
Fiber Board
Newsprint
Cotton Stem
Writing and Printing Paper
Miscellaneous Raw Materials
Areca nut Husk
Ground Nut Shells
Tea Stem
Caster Stems (Ricinus Communis, linn)
Sun Flower Stalk
Arhar Sticks (Cajanus SP) and Jawar Stalk (Sorghum SP)
Sugar Cane Leaves
Paddy Husk

57. PROVISION OF CAPTIVE POWER GENERATION IN A 30 TPD AGRO-BASED PAPER PLANT AS A MEANS OF IMPROVING CAPACITY UTILIZATION
Capacity Utilization
Power Availability
Captive Power Plant
Recommended Scheme
Features of the Scheme
Fixed Costs
Variable Costs
Average Cost of Power Generation
Economics and Discussion
Conclusion

58. ENERGY CONSERVATION IN PULP AND PAPER INDUSTRY—SOME THOUGHTS
Paper Industry
Deliberations
Total Energy Concept
In-Plant Power Generation
Energy Distribution and Utilization
Overdesign and Capacity Utilization of the Equipment
Energy Audit
Short Term-Long Term Action Programme
Short Term Schemes
Long Term Schemes
Generation

National Energy Programme
Summary and Conclusions

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.
