Nanoscience and Nanotechnology Habdbook

Author:- H. Panda Format: paperback Code: NI225 Pages: 608 Price: Rs.1675US\$ 150 Publisher: NIIR PROJECT CONSULTANCY SERVICES Usually ships within 5 days

Nanotechnology is the engineering of functional systems at the molecular scale. In its original sense, nanotechnology refers to the projected ability to construct items from the bottom up, using techniques and tools being developed today to make complete, high performance products. In this rising world of rapid technological developments, the role of state of art materials & composites is pivotal in frontier applications like aerospace, aviation, automobile, defense, electronics, chemical, biomedical, energy & nuclear sectors etc. with the advent of 21st century & initiation of Nanotechnology the atomic & molecular structures of materials is redefined. This shall result in new smart materials namely nanoparticles, powder, wires, rods, carbon nano tubes & so on. Nanotechnology is very diverse, ranging from novel extensions of conventional device physics, to completely new approaches based upon molecular selfassembly, to developing new materials with dimensions on the nanoscale, even to speculation on whether we can directly control matter on the atomic scale. Potential of nanotechnology to manipulate and program matter with atomic precision has invited the attention of scientists to explore innumerable applications of nanotechnology was an inspiration for the benefit of researchers, academicians and industries associated with this field. The global market for nanotechnology products is worth an estimated compound annual growth rate (CAGR) of 11.1% from 2010 to 2015. The largest segment of the market, made up of nanomaterials, is expected to increase at a 5 year CAGR of 14.7%.

This book basically deals with design of protein based nanomachines, metastabilities in nanocrystalline, nanoscale characterization of nanowires, thermopower measurements on nickel nanowires, a nanoporous tio2 electrode, nanoscale in investigation of ultrathin, silicone oxide thermal decomposition, cylindrical nanodot arrays, nanocrystalline silicon films, dispersion of carbon nanotubes, electrical conductivity study of nanocomposite films, magnetic properties of nanospheres, generation spectroscopy of nanoparticle monolayer, au nanoparticles on light emitting polymers, etc.

This handbook deals with the technology frontiers, its applications, the current & future challenges etc. This book will be an invaluable resource to all academicians, industrialists, scientists, upcoming entrepreneurs & technocrats.

PREFACE 1. DESIGN OF PROTEIN BASED NANOMACHINES Introduction Renowned Nanomachines of the Biological Cell Confirm Engineering Principles and Inspire Nanomachine Design

De Novo Design of Diverse Elastic-Contractile Protein Machines Hydrophobic and Elastic Consilient Mechanisms: Definitions Hydrophobic Consilient Mechanism and the Inverse Temperature Transition The Elastic Consilient Mechanism and the Nature of Near Ideal Elasticity Coupled Hydrophobic and Elastic Consilient Mechanisms Principal Thermodynamic Quantities Controlling Diverse Energy Conversions in Model Proteins The Change in Gibbs Free Energy for Solubility, ï•,ï, G(solubility) = ï•,ï, H-Tï•,ï, S The Change in Gibbs Free Energy for a Phase Transition The Change in Gibbs Free Energy for an Inverse Temperature Transition Apolar-Polar Repulsive Gibbs Free Energy of Hydration, i•,,i, Gap Calculations of the Entropic Elastic Force and Energy Biology's Protein-based Nanomachines Confirm the Hydrophobic and Elastic Consilient **Mechanisms** The Three Classes of Energy Conversion Within the Cell Complex III of the Electron Transport Chain Within the Inner Mitochondrial Membrane ATP Synthase of the Inner Mitochondrial Membrane The Myosin II Motor of Muscle Contraction Confirmation of the Hydrophobic and Elastic Consilient Mechanisms Designing Protein-based Nanomachines Using the Hydrophobic and Elastic Consilient **Mechanisms** Design of an AFM-Based Stress-Strain Nanomachine for the Detection of a Single Molecular Event Use of the 3 kHz Mechanical Resonances in the Design of an AFM-Based Nanomachine for Detection of Interactions at Fixed Length An Additional Opportunity in the Deciphering of Engineering Principles for the Design of Protein-**Based Nanomachines** 2. METASTABILITIES IN NANOCRYSTALLINE SILICON **Experimental Procedure** Results Discussion Conclusion 3. INTERACTION OF SULPHURIC ACID WITH GRAPHENE Sulphuric Acid in Gas and Solid Phases Sulphuric Acid on Graphene Conclusions 4. NANOSCALE CHARACTERIZATION OF NANOWIRES **Experimental Methods** Nanowire Morphology, Periodicity and Diameter Chemical Analysis of the CoPt/Pt Nanowires Structural Analysis of the CoPt/Pt Nanowires Discussion Conclusions 5. THERMOPOWER MEASUREMENTS ON NICKEL **NANOWIRES Experimental Details Results and Discussion** Structural Characterization of the NWs Initial Characterization of the Measurement Device 6. MULTI-WALLED CARBON NANOTUBE EMITTERS **EXPERIMENT**

Fabrication of CNT Cathode **Experimental Structures Current-Voltage Characteristics** Simulations Simulated Structures Predicted lâ€"V Characteristics Cathode Support Structure Geometry Conclusion 7. VIBRATION OF A CARBON NANOTUBE The Model for a CNT filled with a C-chain Vibration of a CNT filled with a C-chain Axisymmetric Radial Breathing Vibration (n = 0)Coupled Vibration with n = 1Vibration of Higher-order Modes (n > 2)Conclusions 8. A NANOPOROUS TiO2 ELECTRODE **Experimental Details** Preparation of the ILSE Films Characterization of the ILSE Films Electrode and DSSC Fabrication Containing the ILSE **Electrode Characterization Results and Discussion** Conclusions 9. FREEZING BEHAVIOUR OF AN NANOMETER-SIZED Au DROPLET Numerical Simulations Results and Discussion Conclusions **10. NANOSCALE IN INVESTIGATION OF ULTRATHIN** SILICONE OXIDE THERMAL DECOMPOSITION **Experimental Details Results and Discussion** High Temperature STM in situ Observation of the Thermal Decomposition Process Individual Void Growth Kinetics at the Initial Decomposition Stage Decomposition Rate Variation and Rate Limiting Steps Morphology Effects on the Decomposition Process Conclusions **11. CARBON NANOTUBE FIELD-EFFECT** TRANSISTOR Methodology **Results and Discussion** Conclusions **12. CYLINDRICAL NANODOT ARRAYS** System and Units **Theoretical Model** Vortex-core Magnetization **Total Energy Calculation Results and Discussion** Conclusions **13. SUPERELASTICITY OF ENGINEERING CERAMICS BY NANOTUBES Experimental Details Results and Discussion**

Conclusion **14. POROUS ANODIC ALUMINA Experimental Details** Results Initial Specimens and Anodizing Film Morphology Film Composition Discussion Conclusions **15. METAL NANOCLUSTERS IN GLASS Experimental Procedure Results and Discussion** Ion-Beam Mixed Ag in Silica Ion-Exchanged Ag in Soda Lime Glass Conclusion **16. LIGHT EMISSION FROM NANOCOMPOSITES** Experiments **Results and Discussion** Conclusion **17. NANOCRYSTALLINE SILICON FILMS Experimental Details** Results **Optical Absorption Study** X-ray Diffraction Study Infrared Absorption Study Raman Study **Electron Microscopy** Discussion Conclusion **18. CARBON NANOTUBES IN CHEMICAL VAPOUR** DEPOSITION **19. NANOSCALE DEEP INDENTATION** Simulation Methodology Results and Discussion Conclusion 20. REDUCTION OF NANOWIRES **Experimental Details Results and Discussions** Summary and Conclusion 21. DISPERSION OF CARBON NANOTUBES **Experimental Details** Purification and Dispersion of MWCNTs Preparation of Nanocomposite Films Carbon Nanotube Dispersion Study in Solution and in Nanocomposite Films **Electrical Conductivity Measurement Results and Discussion MWCNT** Dispersion in Solution Nanocomposite Preparation and Carbon Nanotube Distribution in Composite Films Electrical Conductivity Study of Nanocomposite Films Conclusion 22. CREATION OF CARBON ONIONS AND COILS **Experimental Details Result and Discussion**

Conclusions 23. MAGNETIC PROPERTIES OF NANOSPHERES **Experimental Details Results and Discussion** Conclusion 24. LUMINESCENCE OF CRYSTALS NANORODS **Experimental Section Results and Discussion** Conclusions 25. NANONECKLACE MORPHOLOGY **Experimental Details** Growth of Cu-Pt Nanoparticles Growth of Cu-Pt Nanonecklace Nanowires Conclusions 26. OPTICAL PROPERTIES OF NANODOT ARRAYS **Experimental Details Results and Discussion** Conclusions 27. GENERATION SPECTROSCOPY OF NANOPARTICLE MONOLAYER **Experimental Section Materials** Synthesis of AuNPs Synthesis of Dense AuNPs Monolayer **Dodecanethiol SAM Formation** Characterization SFG Set-up **Results and Discussion** Conclusions 28. CHEMICAL DOPING WITH CARBON NANOTUBES **Experimental Details** Results and Discussion Summary 29. DIRECT-WRITE PROGRAMMING OF NANOSCALE DEMULTIPLEXER ARRAYS 30. POLY(N-ISOPROPYLACRYLAMIDE) NANOPARTICLES Introduction **Experimental Details** PNIPAM-coated Fe3O4@SiO4@CdTe Nanoparticles and ZnPcS Loading **Biological Systems** PL and Fluorescence Measurements ZnPcS Released from the Nanoparticles in PBS Solution ZnPcS Released from the Nanoparticles in the CHO Cells **Results and Discussion** ZnPcS Embedded in the PNIPAM of Nanoparticles Release of ZnPcS from the ZnPcS–loaded Nanoparticles in PBS Solution Release of ZnPcS from the ZnPcS-loaded Nanoparticles in CHO Cells Release of ZnPcS from the ZnPcS-loaded Nanoparticles in Zebra Fish Movement of the Nanoparticles in Zebra Fish by the Magnetic Field Gradient Phthalocyanines and PDT Conclusion **31. COBALT FERRITE NANOPARTICLES Experimental Details**

Sythesis Characterization Methods Results and Discussion Fundamental Characteristics, Crystallite size Versus Coercivity and Remanence Mossbauer Spectra and Distribution of Cations Heating Efficiency from Calorimetric Measurements and ac Hysteresis Loops Conclusions 32. Au NANOPARTICLES ON LIGHT-EMITTING POLYMERS **Experimental Section Measurements Device Fabrication and Characterization Materials** Synthesis of PDOFT-bis-4-thiol End-capping at AuNP onto PDOFT-bis-4-thiol (PDOFT-Au 10, PDOFT-Au15, PDOFT-Au 20 and PDOFT-Au 30) **Results and Discussion** Synthesis and Characterization **Photophysical Properties** Electroluminescent Properties and Current Density-Voltage-Luminescence (J-V-L) Characteristics of the PLED Devices Conclusions 33. CARBON NANOSTRUCTURE BASED NANOCOMPOSITES **Experimental Details Results and Discussion** Conclusions **34. Au NANOPARTICLE CHAINS** Experimental Results and Discussion Sample Preparation and Measuring System **General Considerations on Dielectrophoresis Dielectrophoresis on Flat Substrates** Dielectrophoresis on V-groove-etched Substrates Discussion of Results on Patterned Substrates, Electric Field Numerical Calculation CONCLUSION 35. GOLD-SILICA NANOCOMPOSITES **36. NANOPINS BY CHEMICAL VAPOUR DEPOSITION Experimental Section** Preparation Characterization **Results and Discussion** Conclusions **37. OXIDATION RESISTANT METAL NANOPARTICLES Experimental Details** Thermo-Gravimetric Studies Particle Size Reduction Synthesis and Coating of Metal Nanoparticles **Results and Discussion Thermo-Gravimetric Analysis** Fluidized Bed Processing Particle Size Reduction Passivation of Metal Nanoparticles by in situ ALD Conclusions **38. MOLECULAR CARBON-ONIONS**

Experimental Details Discussion of Results Conclusion **39. ATOMIC SCALE MANIPULATION Tip-Surface Interaction Experimental Response Discussion and Conclusion 40. SILICONE NANOWIRES Experimental Session Results and Discussion** Conclusion **41. CARBON NANOFIBERS Experimental Details** Results **Discussion and Conclusion** 42. SINGLE-CRYSTALLINE NANOWIRES Experiments **Results and Discussion** Conclusion **43. SILICONE OXIDE NANOSTRUCTURES Experimental Details Results and Discussion** Conclusion 44. A SQUARE TITANIUM NANOMESH **Experimental Details Results and Discussion** Conclusions 45. NANO-POROUS ANODIC ALUMINIUM OXIDE MEMBRANES **Experimental Details Results and Discussion** Conclusions **46. Co NANOPARTICLES Experimental Section** Materials Synthesis and Assembly of Cobalt Nanoparticles Characterization Results and Discussion Conclusions 47. ZERO-BIAS CONDUCTANCE OF GOLD MOLECULAR JUNCTION Methodology **Results and Discussion** Conclusion 48. ALL-INKJET-PRINTED ELECTRONICS OF METAL NANOPARTICLES Fabrication and Experimental Details Nanoparticle Solution Preparation Semi-conducting Polymer Preparation Organic Field Effect Transistor Fabrication Process and Characterization (Inkjet Printing of Nanoparticle Solution, Polymer Dielectric Layer and Semi-conducting Polymer) **Results and Discussion** Nanoparticle Sintering Characterization **OFET Charactrization** Summary

49. TRIODE TYPE CARBON NANOTUBE FIELD EMITTER Experimental Details Results and Discussion Conclusions 50. PROTEIN AND POLYMER IMMOBILIZED NANOPARTICLES FOR BIOMEDICAL **APPLICATIONS** Methodology **Chemicals and Materials Experimental Set-up** Analyses **Results and Discussion Protein Estimation Conjugation Studies Magnetic Studies Microscopy Studies Cytotoxicity Studies** Leaching Studies Hyperthermia Studies Conclusion **51. 3D STRUCTURES OF NANOWIRES** Methods Nanowire Growth **TEM Characterization Image Simulations** Result **Crystal Structure Image Simulations** Discussion Summary 52. SUPERIOR CONDUCTIVITY OF NANOPARTICLES **Experimental Details** Synthesis of Nanocomposites Characterization **Results and Discussion** Conclusions 53. STRUCTURAL AND ELECTRONIC PROPERTIES OF ZnO NANOTUBES **Computational Method Results and Discussion** Conclusions 54. SYNTHESIS OF NANOCRYSTALLINE CERAMIC POWDERS **Experimental Procedure Results and Discussion** Nanocrystalline CeO2 Powders Through Glycine-Nitrate and Citrate-Nitrate Combustion Auto-Ignition Synthesis of Monophasic BaTi4O9 and Ba2Ti9O12 Powders Combustion Synthesis of TbO2, and MTbO3 (M = Ba and Sr) Conclusions 55. NANOCLUSTERS ON POLYMER SURFACES Organization of Nanoparticles on the Polymer Matrices: Why? Nanoclusters Organization on Polymers: How? **Electrostatic Organization Covalent Organization** Vander-Waals Organization

Different Preparation Strategies Nanocomposites Versus Surface Functionalisation Selection of Polymers Selection of Clusters Metallic Nanoclusters Semi-conducting Nanoclusters Characterisation Techniques Selected Applications Catalytic Applications Photovoltaic Applications Biological Applications Limiations of Cluster Organization on Polymers Conclusion

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Startup Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIIR PROJECT CONSULTANCY SERVICES, 106-E, Kamla Nagar, New Delhi-110007, India. Email: <u>npcs.india@gmail.com</u> Website: <u>NIIR.org</u>
