The term Spice and Condiments applies to natural plant or vegetable products or mixtures in whole or ground form, which are used for imparting flavour, aroma and piquancy to the food items. Spices and condiments are a major commercial crop in India, and earn a major part of foreign exchange annually. They have been the backbone of agricultural industry. The importance of spices and condiment in dietary, medicinal and other uses, and their commercial importance are immense. India is known the world over as the home of spices. Thus spices are an important group of agricultural goods, which are virtually indispensable in the culinary art. Spice processing includes different steps: spice cleaning, spice reconditioning and spice grinding. Some spices were also used for preserving food like meat for a year or more without refrigeration. In the 16th century cloves for instance were among the spices used to preserve food without refrigeration. Cloves contain a chemical called eugenol that inhibits the growth of bacteria. It is a natural antibiotic. It is still used to preserve food like Virginia Ham. Likewise later mustard and ground mustard were also found to have preservative qualities. India alone contributes 25-30% of the total world trade in spices. It may be interesting to note that nine spices namely pepper ginger clove cinnamon cassia mace nutmeg pimento (allspice) and cardamom alone contributed as much as 90% of the total world trade. Pepper is the most important spice in the world and so also of India. This book basically deals with brief history of spices, uses of spices, world trade in spices area & production of spices in India, area and production of spices in India, major and minor spices of India, spice processing, quality issues with spices, bird chillies and Tabasco chillies, basil or sweet basil, seasoning blend duplication and tricks, sauces and gravies, snack seasonings, quality issues with spices, etc. This book is a single compendium which deals with all aspects and facts of spices and condiments which may meet the requirements of all those handling them at various stages, from harvesting to their end use. This book contains post harvest management, the potentials of genetic engineering, high production technology in spices with plantation and processing of various spices and condiments such as vanilla, turmeric, tamarind, saffron, black pepper, onion, mint, ginger, garlic, curry leaf, coriander etc.

1. INTRODUCTION
   Brief History of Spices
   Uses of Spices
   World Trade in Spices—Area & Production of Spices in India
   Area and Production of Spices in India
Major and Minor Spices of India
Export of Value-added Spice Products:
(Spice Oleoresins & Essential Oils)
2. VALUE ADDED SPICE PRODUCTS
3. POST-HARVEST MANAGEMENT
Procedure for Post-Harvesting Handling
Drying of Spices
Ginger Products
4. HIGH PRODUCTION TECHNOLOGY IN SPICES
5. POTENTIALS OF BIOTECHNOLOGY IN IMPROVEMENT IN SPICE CROPS
The Potentials of Techniques Related to Tissue Culture
Somatic Embryogenesis
Organogenesis
Micropropagation
Secondary Metabolites from Cell Cultures
A vitro Germplasm Conservation
The Potentials of Genetic Engineering: Gene and Genome Analysis Techniques
Genetic Manipulation by Gene Technology
Agrobacterium Mediated Gene Transfer
Gene Transfer by Electroporation
Gene Transfer by Microprojectile Bombardment
Gene Marker and Genome Analysis Techniques
Non-PCR Based Marking Technique: Restriction Fragment Length Polymorphism
Arbitrary/Semiarbitrary Primer Based PCR Techniques

About NiIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.
