The use of herbs for medicinal and cosmetic purpose goes back to the ancient times. The emphasis at the present hour has been laid on the spectacular growth of the herbal and ayurvedic products. The demand in past is found to have increased with increase in number of middle class population. People are now a days very much aware of the ingredients in cosmetic products, the benefits of plant products and the harmful effects of chemical ingredients. The presence of artificial and chemical ingredients in cosmetic products has made people to rethink about suitable alternatives to suit their personnel care regime. The herbal products have finally made their appearance in packaged form in the domestic markets, as cosmetics and personal care preparation such as soaps, shampoos, detergent bars, liquid soaps, liquid detergents, etc. These products play a vital role in our sense of well being and quality of life. The herbal soaps and detergents directly influence our emotions and can trigger moods. These creations not only protect the skin from harmful sun radiations but also leave behind a pleasant fragrance. Due to the increasing awareness and importance of cleanliness and healthiness, the use of herbal products is also increasing. Future demand for herbal products depends upon the per capita rate of consumption and segment of population using these products. This handbook provides detailed information on the manufacturing process of herbal soaps and detergents. This book contains numerous formulae, manufacturing process of different type of soaps and detergents which are used in day to day life. The book is an unique compilation and will be very helpful to all its readers, new entrepreneurs, professionals, beauty care product manufacturers, existing units, technical institutions, etc.

Soaps and Detergents
Soaps
Synthetic Detergents
Physical Properties of Soap
Viscosity
Specific heat
Latent heat
Density of soap
66% Rule
Salt distribution between curd and lye
Glycerol distribution between curd and lye
Rate of drying of soap
Uses

Raw Materials
Classification of Fats/Oils
Fatty Oils are Further Classified as
Colour
Availability of oils for Soapmaking
Saponification Value
Iodine Value
Free fatty acids
Titre
Fatty acids containing—OH and —CO
groups, hydroxy and keto-stearic acids
Characteristics of individual Oils
Rice bran oil
Sal
Castor oil
Coconut oil
Linseed oil
Mowrah
Kusum oil
Neem oil
Acid oils
Karanja Oil
Palm Oil
Plam kernel oil
Tallow
Rosin
Other indigenous oils
Abbreviations of Fatty Acids
Fatty Acid Isomers
Pre-Treatment and Upgradation of oils and fats
Introduction
Techniques for Upgrading Oils
De-gumming
Earth bleaching
Air bleaching
Chemical bleaching
Hydrogen peroxide
Benzoyl peroxide
Chlorine
Sodium chlorite or chlorate
Hydrogenation
De-odorisation
Formulation of oil Blends for Soaps
Introduction
Choice of oils and fats
Iodine value, titre and fatty acid composition
Facilities for upgrading oils
Toilet Soaps
FA Composition of Toilet Soap
Typical Oils Blends for Toilet Soap (Compositions %)
Non Fatty Raw Materials for Soap
The Alkalis
Soap Builders
Filler

Raw Materials : Herbal Products
Acacia arabica
A. indica Benth
Parts Used : Bark, gum, leaves, seeds, pods.
Acalypha Indica
(N.O. - Euphorbiaceae)
ANDROPOGON MURICATUS. Retz. or A. Squarrosus
Angelica (Angelica archangelica)
Anise (Pimpinella anisum)
Associated Oil
AZADIRACHTA INDICA
Basil (Ocimum basilicum)
BALSAMODENDRON MUKUL, HOOK. or B. agollocha
Parts Used : Gum
BALSAMODENDRON MYRRHA
(N.O. Burseraceae)
Parts Used : Gum from the bark of the tree
Bay (Laurus nobilis)
Associated Oils
Benzoin (Styrax benzoin)
Associated Oils
Bergamot (Citrus bergamia)
Birch (Betula lenta)
Associated Oils
Calendula (Calendula Officinalis)
Associated Oils
Caraway (Carum carvi)
Cardamom (Elettaria cardamomum)
CITRUS MEDICA, Linm
(N.O.—Rutaceae)
Carrot Seed (Daucus carota)
Caulophyllum Inophyllum
Cedarwood (Cedrus species)
Cinnamon (Cinnamomum zeylanicum)
Associated Oils
Clary Sage (Salvia sclarea)
Associated Oils
Celery (Apium graveolens)
Chamomile, German
(Matricaria recutita, formerly M. chamomilla)
Associated Oils
Coriander (Coriandrum sativum)
Curculigo orchoides Gaertn
(N.O.—Amaryllidaceae)
Ayurvedic Properties
CURCUMA LONGA, Linn
(N.O.—Scitaminateae)
Associated Oil
Cypress (Cupressus sempervirens)
Eucalyptus (Eucalyptus globulus)
Associated Oils
Fennel (Foeniculum vulgare)
Associated Oil
Fir (Abies alba and other species)
Associated Oils
Associated Oils
FICUS RELIGIOSA LINN
(N.O. Moraceae)
Parts Used : Bark, Fruit, Root
Ayurvedic Properties
Galbanum (Ferula galbaniflua)
Associated Oils
Geranium (Pelargonium graveolens)
Associated Oil
Ginger (Zingiber officinale)
Associated Oil
Helichrysum (Helichrysum angustifolium)
Hyssop (Hyssopus officinalis)
Associated Oil
Inula, Sweet (Inula graveolens, or I. odorata)
Associated Oil
HEMIDESMUS INDICUS, R. BR.,
Asclepias pseudosarsa, var. latifolia  
(N.O. Asclepiadaceae)  
Jasmine  
(Jasminum officinale and J. grandiflorum)  
Associated Oil  
Juniper (Juniperus communis)  
Associated Oils  
Labdanum (Cistus labdaniferus)  
Associated Oils  
Lavender (Lavandula angustifolia, previously L. vera and L. Officinale)  
Associated Oils  
Lemon (Citrus limon)  
Associated Oil  
Associated Oils  
Lemongrass Cochin (C. flexuosus)  
Grown in India primarily for isolation of citral  
Lovage (Levisticum officinale)  
Marjoram  
(Origanum marjorana or Marjorana hortensis)  
Associated Oils  
Melissa (Melissa Officinalis)  
Associated Oil  
Mimosa (Acacia decurrens var. dealbata)  
Associated Oil  
Myrrh (Commiphora myrrha)  
Associated Oils  
Myrtle (Myrtus communis)  
Oakmoss (Evernia prunastri)  
Associated Oil  
Orange (Citrus sinensis)  
Associated Oils  
Orange Blossom (Neroli)  
(Citrus aurantium var. amara)  
Associated Oils  
Patchouli (Pogostemon cablin)  
Pepper, Black (Piper nigrum)  
Associated Oils  
Cubeb (Piper cubeba)—A litsea substitute  
Peppermint (Mentha piperita)  
Associated Oils  
PSORALEA CORYLIFOLIA LINN.  
(N.O. Papilionaceae, Fabaceae)  
Parts Used : Roots, leaves, fruits, seeds  
Ayurvedic Properties  
Ravensare (Ravensara aromatica)  
Rose (Rosa damascena, R. gallica, and others)  
Associated Oils  
Rosemary (Rosmarinus officinalis)  
Associated Oils  
Rosewood (Aniba rosaeodora)  
Sage (Salvia officinalis)  
Sandalwood (Santalum album)
Associated Oil
Spikenard (Nardostachys jatamansi)
Associated Oils
SMILAX CHINA
(N.O. - Liilaceae)
TERMINALIA CHEBULA RETZ.
(N.O. Combretaceae)
Parts Used : Fruit
Ayurvedic Properties
TERMINALIA BELERICA ROXB
(N.O. Combretaceae)
Parts Used : Fruit (unripe and ripe)
Ayurvedic Properties
Healing Power and Curative Properties
Cough
Stomach Disorders
Sore Throat
Chronic Constipation
Intestinal Worms
Eye Disorders
Other Diseases
Tea Tree (Melaleuca alternifolia)
Associated Oils
Thyme (Thymus vulgaris)
Associated Oils
Thymus vulgaris has many chemotypes
Tuberose (Polianthes tuberosa)
Vanilla (Vanilla planifolia)
Vetiver (Vetiveria zizanoides)
Violet (Viola odorata)
Associated Oil
Yarrow (Achillea millefolium)
Ylang-Ylang (Canaga odorata)
Associated Oils

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

NIIR PROJECT CONSULTANCY SERVICES, 106-E, Kamla Nagar, New Delhi-110007, India. Email:npcs.india@gmail.com Website: NIIR.org
