

# Electroplating, Anodizing & Metal Treatment Handbook

**Author:-** NPCS Board of Consultants & Engineers

**Format:** paperback

**Code:** NI63

**Pages:** 720

**Price: Rs.1475US\$ 150**

**Publisher:** NIIR PROJECT CONSULTANCY SERVICES

Usually ships within 5 days

Surface finishing is a broad range of industrial processes that alter the surface of a manufactured item to achieve a certain property. Currently, the trend is towards surface treatments. Surface engineering techniques are generally used to develop a wide range of functional properties, including physical, chemical, electrical, electronic, magnetic, mechanical, wear-resistant and corrosion-resistant properties at the required substrate surfaces. In general, coatings are desirable, or even necessary, for a variety of reasons including economics, material conservation, unique properties, or the engineering and design flexibility which can be obtained by separating the surface properties from the bulk properties. Surface engineered products thus increase performance, reduce costs, control surface properties independently of the substrate and medium, thus offering an enormous potential in the finishing Industry.

Electro depositing of metals is a very significant industrial process. Electroplating is both an art and science. It entailed adhering a thin metal coating to an object by immersing it into an electrically charged solvent containing the dissolved plating metal. Electroplating served a number of functions, such as protecting from corrosion and wear, decoration, and electrical shielding. Anodizing most closely resembles standard electroplating. Anodizing or anodizing is an electrolytic passivation process used to increase the thickness of the natural oxide layer on the surface of metal parts. Anodizing increases corrosion resistance and wears resistance, and provides better adhesion for paint primers and glues than bare metal. Anodic films are most commonly applied to protect aluminium alloys.

The aim of this handbook is to give the reader a perspective on several metal surface treatment techniques which are generally followed in the finishing Industry. This is a unique compilation and it draws together in a single source technical principles of surface science and surface treatments technologies of plastics, elastomers, and metals along with various formulae of bath solutions, current density, deposit thickness, manufacturing processes, various ingredients used in these processes. It is a very useful guide for the readers, engineers, scientists, practitioners of surface treatment, researchers, students, entrepreneurs and others involved in materials adhesion and processing.

## I. METAL SURFACE PREPARATION AND CLEANING

### 1. Basic Metal Surface

Nature of the Surface

Brightness

### 2. Polishing, Brushing and Buffing

Polishing

- Adhesives
- Lubrication
- Brushing
- Deburring
- Buffing and Polishing Equipment
- 3. Mass Finishing Methods
- Vibratory Finishing Equipment
- Centrifugal Barrel Finishing
- Parts to Media Ratios
- Mass Finishing Media and Compounds
- 4. Electropolishing
- The Electropolished Surface
- Types of Metal Electropolished
- Electropolishing Equipment
- 5. Solvent Cleaning
- Solvent Cleaning
- Diphase Cold Cleaning
- Stability
- Materials of Construction
- Design Consideration
- Location of Vapour Degreaser
- Shutdown Procedure
- Choosing a Vapour Degreasing Solvent
- Water Removal
- 6. Alkaline Cleaning
- Soils
- Machining and Forming Oils
- Alkaline Descalers
- 7. Oxide Removal
- Oxide Removal from Copper Alloys
- Equipment for Pickling and Bright Dipping

## II. TYPICAL PROCESSING AND OPERATING SEQUENCES

- 8. Metals
- Pretreatments
- Preliminary Treatment
- Final Treatment
- Low-Carbon Steel
- High-carbon and Low-Alloy Steels
- Stainless Steels
- Cast Irons
- Copper and Copper-Base Alloys
- Zinc-Base Die Castings
- Magnesium and Its Alloys
- Lead and Lead Alloys
- Powder Metal Compacts
- Less common Metals
- Intermediate Electrodeposited Coating as Basis Metal Surface
- 9. Plastics
- Plating
- Electroless Plating
- 10. Wastewater Control and Treatment
- Water Supply

Water and Chemical Conservation  
Chemical and Water Recovery  
Evaporative Recovery  
Reverse Osmosis  
Electrodialysis  
Ion Exchange  
Waste water Treatment-Segregation and Collection  
Hexavalent Chromium Reduction  
Pretreatment  
Neutralization  
Flocculation  
Special Treatment Methods  
Solids Management  
Maintenance  
11. Plating Bath Compositions and Operating Conditions  
Effects of Hydrogen  
Stripping and Salvaging of Defective Plated Items

### III. TESTING ELECTRODEPOSITED COATINGS

12. Thickness Tests  
Microscopic-Optical Methods  
Double-Beam Interference Microscope, Interferometry  
Magnetic Method  
Eddy Current  
Mass per Unit Area  
Weight Gain Method  
X-Ray Methods  
Beta Backscatter (BBS)  
Microresistance Technique  
13. Corrosion Tests  
Outdoor Exposure Tests  
Electrolytic Corrosion (EC) Test  
14. Inspection  
Factors in Visual Inspection  
Arriving at a Standard of Acceptability  
Degree of Finish  
Inspection of Coloured and Other than Bright Finishes  
Inspection Equipment  
Inspection Personnel

### IV. SURFACE PROTECTION AND FINISHING TREATMENTS

15. Phosphate Coating Processes  
Amorphous Phosphate Coatings on Aluminum Surfaces  
Process Cycles  
Discussion of Process Steps in Practical Procedures  
Immersion Processes  
Spray Processes, with Solution Recirculation  
Design Features  
Simplified and Specialized Processes  
16. Chromate Conversion Coatings  
Metals Commonly Chromated  
Control of Electroplating Solutions  
Coatings for Conversion Coatings

## 17 Sulfuric and Chromic Acid Anodizing of Aluminium

Sulfuric Acid Anodizing

Colouring

Power Supply

Coating Properties

Chromic Acid Anodizing

Processing Steps

Electrolyte Maintenance

Designation System for Anodic Coatings

Anodizing and Surface Conversion Treatments  
for Magnesium

Pickling

Tank Equipment for Cleaning Acid Pickling

Anodizing Processes

## 18. Electroplating Formulae of Various

Electroplating and Allied Chemicals

Electroplating not aluminium

Gold Electroplating

Iron Electroplating

## 19. Principles of Electroplating

Polarisation

## 20. Properties of Electroplating 428

Conducting Salts

Plating Quality

## 21. Electroplating or Coatings on Silver, Copper and leads

Coating of Silver

Alkaline Bath

Plant and Machinery Details for Electroplating Baths Salts

## 22. Conservation of Materials and Energy in

Electroplating Industries with Effluent Treatment

Regeneration and Recovery Techniques Applications  
for Waste Water Treatment

Techniques for Uniform Metal Distribution Chemicals

will exceed the costs associated with purchasing

Choice of Finish and Process

Plating From Low Concentrated Solutions at

Room Temperature

## 23 Black Chrome Plating for Solar Energy Conversion

Hull Cell Studies

Effect of Plating Time on Optical Properties

## 24 Pickling of Metals

Chemical and Electrolytic Pickling Compared

Tin and Lead Additions

Regeneration of Pickling Solutions

## 25 Pickling Conditions and Solution Compositions

Pickling of Cast Iron

Pickling in Salt Baths

Pickling of Copper and Copper Alloys

Pickling of Copper Alloys

Pickling of Aluminium

Acid or Cold Pickling

Pickling of Magnesium

Pickling of Silver

Pickling of Titanium  
26 Cadmium Plating  
27 Cobalt Plating  
28 Copper Plating  
Coppering by Simple Immersion  
Bath Preparation  
29. Iron Plating  
30 Nickel Plating  
Nickel fluoborate bath  
Precautions  
Semi-Bright Nickel Plating  
Stabilisers  
Barrel Nickel Plating  
Heavy Nickel Plating  
Nickel Electroforming & Electrotyping  
31 Silver Plating  
Application of silver Plating  
32 Gold Electroplating  
Stripping Gold  
Current-Density, 0.15 Ampere  
Gold Baths for Hot Gilding  
Tanks for Gold Baths  
For Gold-Plating in the Cold Bath the Process Is As Follows  
Gold Thread  
Methods of Plating Stainless Steel  
33 Nonelectrolytic Metal Coating Processes  
Non-Catalytic Chemical Methods  
Maintenance of Immersion and Contact Baths  
Sensitizing for Chemical Reduction  
34 Vapour-Phase Methods  
Vacuum Evaporation  
Coating Properties  
Sputtering  
Range of Applicability  
Apparatus Configuration  
Ion Plating  
Chemical Vapour Deposition (CVD)  
Apparatus Configuration  
35 Catalytic Methods  
Catalytic Chromium Plating  
Electroless Copper Plating  
Reducing Agents  
The Operation of Electroless Copper Baths  
Electroless Copper Treatment Sequence  
Solution Formulations  
Analysis of Deposit  
Corrosion Resistance of Deposits  
Applications for Electroless Nickel  
Boron Nickel Alloys  
36 Electroforming  
Mandrel Types and Materials  
Mandrel Design and Fabrication  
Preparation of Mandrel Surfaces

Electroforming Solutions and Deposit Properties

Control of Electroforming Processes

Machining and Final Finishing of the Electroform

37. Industrial Anodising of Aluminium and its Alloys

Impurities and Bath Control

38. Environmental-Regulatory Restrictions, Response of Paint Industry and Eco-Friendly Coating

Enactment of Rule 66 on the Use of Organic Solvents

Strategy of Paint Industry

Powder Coatings

39 Plating of Precious Metals

Silver Plating

Operating Conditions

Materials of Construction

Maintenance and Control of Solutions

40. Control of Electroplating Solutions Using Hull

Cell Studies

Hull Cell

Case Studies using Hull Cell

Current Efficiency Test

41 Corrosion and their Preventive Measures and

Pollution Control Consideration

The Mechanism of Basic Corrosion

Protection of Intergranular Corrosion

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur

ving to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
