

The Complete Technology Book on Pesticides, Insecticides, Fungicides and Herbicides (Agrochemicals) with Formulae, Manufacturing Process, Machinery & Equipment Details 4th Revised Edition

Author:- Dr. Himadri Panda

Format: paperback

Code: NI79

Pages: 536

Price: Rs.1975US\$ 150

Publisher: NIIR PROJECT CONSULTANCY SERVICES

Usually ships within **5** days

Agrochemicals are chemical agents that are applied to fields to boost the nutrient content of the soil or crops. Herbicides, fungicides, and insecticides are among them, as are synthetic fertilizers, hormones, and soil conditioners. They boost agricultural growth by eradicating pests that wreak havoc. They are used in horticulture, dairy farming, poultry farming, crop shifting, commercial planting, and other farming industries.

? A pesticide is any substance that is used to kill, repel, or control pests in plants or animals.

? Insecticides are chemicals that are used to keep insects under control by killing them or stopping them from engaging in undesired or damaging behaviour. Their structure and mode of action are used to classify them.

? Fungicides are pesticides that kill or prevent fungus and their spores from growing. They can be used to manage plant-damaging fungi such as rusts, mildews, and blights. They could also be used to keep moulds and mildew at bay in other places.

? Herbicides are chemicals that are used to control or manage unwanted vegetation. Herbicides are most commonly used in row-crop farming, where they are treated before or during planting to increase crop productivity while reducing other vegetation.

The global agrochemicals market estimated size is CAGR of 3.4%. Increasing demand for food supply due to the rapid growth in the human population has triggered agricultural intensification. Agrochemicals are widely employed in agriculture to meet rising food demands, bridging the gap between food supply and consumption. Concurrently imbalanced use of agrochemicals, on the other hand, degrades the environment and poses serious threats to aquatic and terrestrial ecosystems. Chemical agents used in agricultural lands to increase nutrient shortage in the field or crop are known as agrochemicals. They also help to boost crop development by destroying hazardous insects. Agrochemicals increase the quantity and quality of agricultural goods. These are utilized in horticulture, dairy farming, cattle, grain farming, shifting cultivation, commercial plantation, and many other agricultural fields.

The book covers a wide range of topics connected to Pesticides, Insecticides, Fungicides and Herbicides, as well as their manufacturing processes. It also includes contact information for machinery suppliers, as well as images of equipments.

A complete guide on Agrochemical Products manufacture and entrepreneurship. This book serves as a one-stop shop for everything you need to know about the Pesticides, Insecticides, Fungicides and Herbicides manufacturing industry, which is ripe with opportunity for manufacturers, merchants, and entrepreneurs. This is the only book that covers Agrochemical

in depth. From concept through equipment procurement, it is a veritable feast of how-to information.

1. AGROCHEMICALS

1.1 Introduction

1.2 Classifications

1.3 Benefits

1.4 Effects

1.5 Needs and Precautions

2. MANAGEMENT OF AGRO-CHEMICALS FOR IMPROVED PUBLIC AND ENVIRONMENTAL HEALTH

2.1 Introduction

2.2 A Strategy for Better Agrochemical Management and Use Implementing the Strategy as a Whole

2.2.1 Multilevel Response

2.2.2 Nine Regional Projects for Implementation

2.3 Using Agro-Chemical Management in a Coordinated Way

2.4 Implementing GAP and Other Good Practice Codes of Conduct

2.5 Informing Management Decisions

2.5.1 Public Health Monitoring

2.5.2 Environmental Monitoring

2.5.3 Further Research

2.6 Supporting Improved Agro-Chemical Use and Management

2.6.1 Sustainable Financing

2.6.2 Communication and Education

2.6.3 Capacity Building

2.7 Strategy Implementation

3. AGROCHEMICAL INDUSTRY OUTLOOK

3.1 Diverse Changes Indicate a Continuously Evolving Industry

3.1.1 Longer Product Development Cycles and Escalating Costs

3.1.2 Increasing Stringency of Regulatory Requirements

3.1.3 Government Farm Subsidy Reduction

3.1.4 The Accelerated Pace of Change within and in Adjacent Markets

3.2 Current Performance and Strategy of Nurturing the Growth Momentum

3.2.1 Leveraging M&A to Optimize Portfolio and Extend Geographical Presence

3.2.2 Focusing on Innovation and R&D to Develop and Commercialize New Products

3.2.3 Bolstering Product Offerings with Digital Technologies to Enhance the Firm-Farmer Engagement

3.3 Opportunities and Challenges in Agrochemicals Today

3.4 Strategic Positioning Uncertainty and Opportunity

3.4.1 Business Strategy & Growth

3.4.2 Digital Transformation

3.4.3 Governance and Board

3.4.4 Innovation

3.4.5 Marketing & Sales

3.4.6 Private Enterprise

3.5 Strategic Positioning Required in a Future That is Uncertain but Full of Opportunities

3.5.1 Capturing Value from Increasing Interest in Sustainable Agricultural Practices and

Precision Farming

3.5.2 Taking Advantage of Asset-Light Business Model and Achieving Innovation Success

3.5.3 Recognizing Long-Term Opportunities that Masquerade as Challenges

3.6 The Future of Agrochemicals: Capturing Value

4. AGROCHEMICALS MANUFACTURING

4.1 Dispersing and Deagglomeration

4.1.1 Dispersion into Liquids

4.2 Dispersion of Nanomaterials (Nanoparticles)

4.2.1 Dispersion of Nanoparticles

4.2.2 Dispersing and Size Reduction of Nanomaterials

4.3 Emulsifying

4.3.1 Stabilizing Emulsifiers

4.3.2 Devices for Efficient Emulsification

4.4 Ultrasonic Dissolving of Solids in Liquids

4.5 Sonochemical Reaction and Synthesis

4.6 Phase Transfer Catalysis

4.7 Agrochemical Formulations

4.8 Processing

4.8.1 Drying

4.8.2 Milling

4.8.3 Blending

4.8.4 Agglomeration

5. AGROCHEMICAL TESTING

5.1 Testing Technology

5.2 Methods of Analysis for Pesticide Residues

5.3 Methods for Testing Agricultural Chemical Residues in Food

5.3.1 Validation Procedure

(1) Selectivity

(2) Trueness

(3) Precision

(4) Limit of Quantification

5.4 Method Validation and Quality Control Procedures for Pesticide Residues Analysis in Food and Feed

5.5 Sampling, Transport, Processing and Storage of Samples

5.5.1 Sampling

5.5.2 Laboratory Sample Transportation

5.5.3 Sample Preparation and Processing Prior to Analysis

5.5.4 Identity, Purity, and Storage of Standards

5.5.5 Preparation and Storage of Stock Standards

5.5.6 Preparation, Use and Storage of Working Standards

5.6 Testing and Replacement of Standards

5.6.1 Extraction and Concentration

5.6.2 Extraction Conditions and Efficiency

5.6.3 Extract Concentration and Dilution to Volume

5.7 Contamination and Interference

5.7.1 Contamination

5.7.2 Interference

5.8 Analytical Calibration, Representative Analytes, Matrix Effects and Chromatographic Integration

5.8.1 General Requirements

5.8.2 Calibration

5.9 Representative Analytes

- 5.10 Matrix Effects and Matrix-Matched Calibration
- 5.11 Standard Addition
- 5.12 Effects of Pesticide Mixtures on Calibration
 - 5.12.1 Calibration for Pesticides that are Mixtures of Isomers
 - 5.12.2 Calibration using Derivatives or Degradation Products
 - 5.12.3 Chromatographic Integration
- 5.13 Analytical Method Validation and Performance Criteria
 - 5.13.1 Qualitative Screening Methods
 - On-going Performance Verification during Routine Analysis
 - 5.13.2 Quantitative Methods
 - 5.13.3 Initial Method Validation
 - On-going Performance Verification (Routine Recovery Determination)
 - 5.13.4 Methods for Determination of Fat or Dry Weight Content
 - 5.13.5 Proficiency Testing and Analysis of Reference Materials
- 5.14 Agrochemicals Solutions Technology
 - 5.14.1 Spectrum 3 MIR/NIR/FIR Spectrometer
 - 5.14.2 Max ICP-OES Scott/Cross-Flow Configuration
 - 5.14.3 Gas Chromatography (GC)
- 5.15 Agrochemicals Testing Solutions
 - 5.15.1 Atomic Spectroscopy
 - Atomic Absorption (AA)
 - Inductively Coupled Plasma (ICP-OES & ICP-AES) Instruments
 - Inductively Coupled Plasma Mass Spectrometry (ICP-MS) Instruments
 - Mercury Analysis Systems
 - Microwave Systems
 - 5.15.2 Chromatography
 - Gas Chromatography Mass Spectrometry (GC/MS)
 - Liquid Chromatography Mass Spectrometry (LC/MS & LC/MS/MS)
 - Liquid Chromatography
 - Discover the LC 300 HPLC and UHPLC Systems
 - 5.15.3 Molecular Spectroscopy
 - Infrared Spectroscopy
 - Fluorescence Spectroscopy
 - Ultraviolet-Visible (UV-Vis) Spectroscopy
 - FT-IR Microscopy & Imaging Systems
 - 5.15.4 Thermal Analysis
 - Thermogravimetry (TGA)
 - Differential Scanning Calorimetry (DSC)
 - Mechanical Analysis (DMA & TMA)
 - Simultaneous Thermal Analysis (STA)
- 6. PACKAGING OF AGROCHEMICALS
 - 6.1 Selection of Packaging Types
 - 6.1.1 Selection of Packaging Materials for Solid Formulations
 - 6.1.2 Selection of Packaging Materials for Liquid Formulations
 - 6.1.3 Plastics
 - 6.1.4 Metal
 - 6.1.5 Glass

- 6.2 Specifications
- 6.3 Packaging Instructions
- 6.4 Closures
 - 6.4.1 Prevention of Leakage
 - 6.4.2 Tamper Evidence
 - 6.4.3 Closure Diameter - Liquid Products
 - 6.4.4 Dispensing Liquid Products from Packs Designed for Pouring
- 6.5 Labelling
- 6.6 Shelf Life
- 6.7 Pack Design With Regard to Easy Rinsing and Disposal
- 6.8 Types of Secondary Packaging
 - 6.8.1 Unit Cartons
 - 6.8.2 Combination with Primary Pack
 - 6.8.3 Methods for Protection of Unit Loads
- 7. REGISTER A PESTICIDE BUSINESS (PESTICIDE LICENSE)
 - 7.1 Procedure
 - 7.2 Required Documents
 - 7.3 Eligibility
 - 7.4 Validity
- 8. PESTICIDE REGISTRATION PROCESS-EPA (UNITED STATES ENVIRONMENTAL PROTECTION AGENCY)
 - 8.1 Risk Assessments to Analyses the Potential for Harm
 - 8.2 The Evaluation Process
 - 8.3 Federal Pesticide Laws
 - 8.4 The Pesticide Label
 - 8.5 Compliance and Enforcement
- 9. PESTICIDES
 - 9.1 How do Pesticides “Work”?
 - 9.1.1 Organophosphates
 - 9.1.2 Organochlorines (Chlorinated Hydrocarbons)
 - 9.1.3 Carbamates and Thiocarbamates
 - 9.1.4 Pyrethroids (Synthetic)
 - 9.2 Types of Pesticides
 - 9.3 Chemical Pesticides
 - 9.4 Biopesticides
 - 9.5 Benefits of Pesticides
 - 9.6 Classification of Pesticides
 - 9.7 Pesticide Formulations
 - 9.8 Pesticides Modes of Action
 - 9.8.1 Insecticides
 - 9.8.2 Fungicides
 - 9.8.3 Herbicides
 - 9.9 Pesticide Behavior in the Environment
 - 9.9.1 Pesticide Degradation
 - 9.9.2 Pesticide Migration
 - Sorption
 - Leaching
 - Spray Drift
 - Volatilization
 - Surface Runoff
- 10. APPLICATION OF PESTICIDES

- 10.1 Choice of Chemicals (Insecticides)
- 10.2 Timing of Pesticide Application
 - 10.2.1 Stage of Development of Pests
 - 10.2.2 The Growth Stage of the Crop
 - 10.2.3 The Development Stage of Natural Enemies and Activity of Honey Bees
 - 10.2.4 The Severity of Damage or Infestation
 - 10.2.5 The Type of Weather and the Time of Day
 - 10.2.6 Pre-Harvest Interval

11. PRODUCTION OF PESTICIDES

- 11.1 Raw Materials
- 11.2 The Manufacturing Process
 - 11.2.1 Synthesizing the Pesticide
 - 11.2.2 Formulating the Pesticide
 - 11.2.3 Diluting the Pesticide
 - 11.2.4 Applying the Pesticide

12. PESTICIDE APPLICATION EQUIPMENT

- 12.1 Dusters
 - 12.1.1 Hand Operated Dusters
 - 12.1.2 Plunger Tube Dusters
 - 12.1.3 Hand Crank Dusters
 - 12.1.4 Foot Pump Dusters
 - 12.1.5 Power Dusters
 - 12.1.6 Electric Motor Powered Dusters
 - 12.1.7 Gasoline Motor Powered Dusters
 - 12.1.8 Air Pressure Dusters
- 12.2 Sprayers
 - 12.2.1 Hand Operated Sprayers Flit Gun
 - 12.2.2 Small Hydraulic Sprayer
 - 12.2.3 Compressed Air Sprayers
 - 12.2.4 Electric or Gasoline-Operated Sprayers (Powered Spraying)
 - Tanks
 - Pumps
 - a) Piston Pump
 - b) Centrifugal Pumps
 - c) Roller Pumps
 - d) Internal and External Gear Pumps
 - e) Diaphragm Pump
 - f) Flexible Impeder Pump
 - g) Vane Pump
 - Hoses
 - Nozzles
 - Strainers
 - Valves
 - Pressure Regulators
 - Agitators
 - 12.2.5 Gas Generating Sprayers
 - 12.2.6 Granular Applicators
 - 12.2.7 Brush Application
 - 12.2.8 Fumigant Injection
 - 12.2.9 Spot Treatment
 - 12.2.10 Crack and Crevice Treatment
 - 12.2.11 U.L.V

12.2.12 Soil Injection

12.2.13 Sub-Slab Injection

13. ROLES AND RESPONSIBILITIES

13.1 Role of Manufacturers

13.1.1 Development and Packaging

13.1.2 Advertising and Marketing of Agrochemicals

13.2 Role of Government Agencies

13.2.1 Product Registration

13.2.2 Promulgating Regulations

13.2.3 Provisions for Enforcement and Advisory Services

13.2.4 International Exchange of Information

13.3 Role of Retailers

13.4 Role of Employers and Their Organizations

13.5 Role of Workers and Their Organizations

13.6 Role of the Public

14. PESTICIDE MIXTURES

14.1 Introduction

14.2 Benefits Associated with Pesticide Mixtures

14.3 Concerns Associated with Pesticide Mixtures

14.4 Pesticide Mixtures and Resistance Mitigation

14.5 Pesticide Mixtures and Natural Enemies

15. PESTICIDE FORMULATIONS

15.1 Type

15.2 Formulation Process

15.2.1 Sorption

15.2.2 Solution

15.2.3 Suspension

15.2.4 Emulsion

15.3 Formulation Selection Considerations

15.3.1 Applicator Safety

15.3.2 Environmental Concerns

15.3.3 Pest Biology

15.3.4 Available Equipment

15.3.5 Surfaces to be Protected

15.3.6 Cost

15.4 Common Pesticide Formulations

15.4.1 Solid Formulations

15.4.2 Dusts

15.4.3. Granules

15.4.4 Pellets

- Wettable Powders

- Dry Flowables

- Soluble Powders

15.5 Liquid Formulations

16. VARIOUS METHODS IN PESTICIDE FORMULATION ANALYSIS

16.1 Titrimetry

16.2 Types of Titrations

16.2.1 Some Redox Titrations are Named after the Reagent

- Permanganate Titrations

- Dichromate Titrations

16.2.2 Iodimetric Titrations also are Redox

Titration

16.3 Preparation of Standard Solutions

16.3.1 Preparation of 0.1N Silver Nitrate

16.3.2 Preparation of 0.1N Potassium Thiocyanate

16.3.3 Preparation of 0.1N Sodium Thiosulphate Solution

16.3.4 Preparation of 0.1N Iodine

16.3.5 Preparation of 0.1N Sodium Hydroxide

16.3.6 Preparation of 0.1N Hydrochloric Acid

16.4 Carbofuran

16.5 Captan

16.6 Dicofof

16.7 Copper Compounds

16.8 Dithiocarbamates

16.9 Tridemorph

16.10 Phorate

16.11 Sulphur

16.12 Aluminium Phosphide

16.13 Zinc Phosphide

17. PESTICIDES DILUTED

17.1 Mixing Soluble and Wettable Powders

17.2 Mixing Liquid Formulations

17.3 Mixing Concentrates for Air Blast Sprayers or Mist Blowers 218

18. DISPERSION AND GRINDING OF PESTICIDES

19. PESTICIDES AND ENVIRONMENTAL PROTECTION

19.1 Pesticides in the Environment

19.1.1 Sources of Contamination

19.1.2 Sensitive Areas

19.1.3 Pesticide Movement

a) Air

b) Particles and Droplets

c) Vapors

d) Water

e) On or in Objects, Plants, or Animals

19.1.4 Harmful Effects on Non Target Plants and Animals

1) Harmful Effects from Direct Contact

2) Harmful Effects from Residues

3) Harmful Effects on Surfaces

19.2 Protecting the Environment

19.2.1 Protecting Groundwater

1. Sources of Groundwater

2. Pesticide Contamination of Groundwater

A. Practices for Pesticide Users

• Water on the Treated Surface

• Rain

• Irrigation

• Pesticide Factors

• Soil Factors

• Geology

B. Protection of Endangered Species

• Limitations on Pesticide Use

• Habitats of Endangered Species

• Importance of Protecting Endangered Species

- a. Agriculture
- b. Medicine
- c. Preserving Choices
- d. Interdependence
- e. Natural Balance
- f. Stability

20. DISTRIBUTION ORGANOCHLORINE PESTICIDES IN SOIL AND GROUNDWATER

20.1 Materials and Methods

20.1.1 Research Area Description

20.1.2 Sample Collection

20.1.3 Sample Preparation

20.1.4 Analysis Methods

20.2 Physical-Chemical Properties of Soil Profile in Farmlands

20.2.1 Physical-Chemical Indexes

20.2.2 Profile Textures

21. PESTICIDES IN EXPORT AND DOMESTIC AGRICULTURE

21.1 Conceptual Revisions for More Controlled Comparisons

21.1.1 Comparing Different Crop Types to Explain the Effects of Markets

21.1.2 Assuming Low and Homogenous Pesticide use on National Market Crops

21.1.3 Assuming Ever-Increasing Pesticide use in Export Production

21.2 Methods

21.2.1 Study Site

21.2.2 Farmer Survey

21.2.3 Complementary Methods

22. BOTANICAL PESTICIDES: A POTENTIAL PLANT PROTECTION TOOL

22.1 Introduction

22.2 Chemical Composition

22.2.1 Essential Oil Components

22.2.2 Isothiocyanates and Glucosinolates Glucosinolates (GLSs)

22.2.3 Cyanogenic Glycosides

22.2.4 Alkaloids

22.2.5 Phenolics – Flavonoids

22.2.6 Polyacetylenes & Polythienyls

22.2.7 Pyrethrum

22.2.8 Organic Acids

22.2.9 Others

22.3 Greek Plants as a Source of Botanical Pesticides

22.3.1 Bacteria, Fungi & Terpenes

22.3.2 Insects & Terpens

22.3.3 Nematodes & Terpenes

22.3.4 Nematodes & Limonoids

22.4 Current Trend and Future Prospective

23. DIFFUSION CONTROLLED PESTICIDE RELEASE FORMULATIONS: EFFECTIVE CONSIDERATIONS

23.1 Introduction

23.2 Diffusion Model Development

23.3 Polydisperse Capsule Size Distribution

- 23.4 Microcapsule Clustering
- 23.5 Experimental
 - 23.5.1 Microcapsule Construction
 - 23.5.2 Visualization System for Microcapsule Clustering
- 23.6 Theoretical
 - 23.6.1 Microcapsules Transport via Convective Patterns from Sessile Drop Evaporation
- 23.7 Coupling Capsule Clustering with Pesticide Release Rate

24. FORMULA OPTIMIZATION DESIGN OF PESTICIDE MICRO EMULSION

- 24.1 Introduction
- 24.2 Experimental Section
 - 24.2.1 Materials
 - 24.2.2 Construction of Pseudo-Ternary Phase Diagram
 - 24.2.3 Arrangement of Orthogonal Experiment
- 24.3 Results and Discussion
 - 24.3.1 Selection of Formula Components
 - 24.3.2 Choice of the Best Phase Diagram
 - 24.3.3 The Research of Physical Stability

25. PROCESSING OF MICROBIAL PESTICIDES

- 25.1 The Importance of Microbial Pesticides
- 25.2 Production and Commercialization of Pathogens
 - 25.2.1 Steps Leading to Commercialization
 - 25.2.2 Process Development and Production
 - 25.2.3 Organism Storage
 - 25.2.4 Fermentation Method
- 25.3 Theoretical Background of Industrial Processing in Biotechnology
 - 25.3.1 Laboratory Processing
 - 25.3.2 Cleanliness and Safety
 - 25.3.3 Preparation of Dilution
- 25.4 Dilution Plate Counting and Distribution of Bacteria
 - 25.4.1 Pure Culture Techniques Tube transfers
 - 25.4.2 Pure Culture
 - 25.4.3 Preparation and Testing of Culture Media
 - 25.4.4 Sterilization
 - 25.4.5 Steam Sterilization
 - 25.4.6 Flaming
 - 25.4.7 Hot Air
 - 25.4.8 Preservation of Strains
 - 25.4.9 Elaboration of a Processing
 - 25.4.10 Laboratory Scale
 - 25.4.11 Small Scale Production
 - 25.4.12 Problems of Contamination of Microbial Processes
 - 25.4.13 Sterility of Microbial Process
 - 25.4.14 Sensitivity of Microbial Processes to and Protection against Contamination
 - 25.4.15 Pilot-Plant-Fermenters

26. SPRAYING PESTICIDES SAFELY IN GREENHOUSES: A NEW TECHNIQUE

- 26.1 Introduction
- 26.2 Greenhouse Spraying Requirements
- 26.3 Design of the New System
- 26.4 Fog Generation

- 26.4.1 Atomizer Nozzles
 - a. Internal Mix Model
 - b. External Mix Model
 - c. Jet Impact Model
- 26.4.2 Experimental Tests on Nozzles
- 26.4.3 Numerical Simulation of Leaf Spraying
- 26.4.4 Experimental Tests with Various Crops
- 26.4.5 Test Parameters and Results
- 26.5 Defined Volume
- 26.6 Fixed Covering Prototypes
 - 26.6.1 First Fixed-Covering Prototype
 - 26.6.2 Second Prototype with a Fixed Covering
- 26.7 Prototype with Retractable Covering (DeVoPeS)
- 26.8 DeVoPeS Work Cycle
- 26.9 Greenhouse Testing
- 27. GREEN PESTICIDES FOR ORGANIC FARMING: OCCURRENCE AND PROPERTIES OF ESSENTIAL OILS FOR USE IN PEST CONTROL
 - 27.1 Plants and Essential Oils
 - 27.1.1 Technology of Using Eucalyptus Oil
 - 27.1.2 Aromatherapy
 - 27.2 Essential Oil Pharmacological Properties
 - 27.2.1 Antiseptic
 - 27.2.2 Expectorant and Diuretic
 - 27.2.3 Spasmolytic and Sedative
 - 27.2.4 Other Related Properties
 - 27.3 Pesticidal Properties
- 28. REGULATED SOCS: PESTICIDES, COMMON TRADE NAMES, AND RELATED CHEMICALS
- 29. HOW TO START AN INSECTICIDE INDUSTRY
 - 29.1 Steps
 - 29.1.1 Understand the Industry
 - 29.2 Conduct Market Research and Feasibility Studies
 - 29.2.1 Demographics and Psychographics
 - 29.3 Decide Which Niche to Concentrate on
 - 29.4 Economic Analysis
 - 29.5 Decide Whether to Buy a Franchise or Start from Scratch
 - 29.6 Know the Possible Threats and Challenges Will Face
 - 29.7 Choose the Most Suitable Legal Entity (LLC, C Corp, S Corp)
 - 29.8 Choose a Catchy Business Name
 - 29.9 Discuss with an Agent to Know the Best Insurance Policies
 - 29.10 Protect Intellectual Property with Trademark, Copyrights, and Patents
 - 29.11 Get the Necessary Professional Certification
 - 29.12 Get the Necessary Legal Documents Need to Operate
 - 29.13 Raise the Needed Startup Capital
 - 29.14 Choose a Suitable Location for Business
 - 29.15 Hire Employees for Technical and Manpower Needs
 - 29.16 Write a Marketing Plan Packed with Ideas & Strategies
 - 29.17 Develop Strategies to Boost Brand Awareness and

Create a Corporate Identity

30. INSECTICIDES

30.1 Type of Activity

30.1.1 Systemic Insecticides

30.1.2 Contact Insecticides

30.1.3 Ingested

31. REGULATIONS

32. INSECTICIDE FORMULATIONS

32.1 Types

32.1.1 Dusts

32.1.2 Wettable Powders (WPs) or Water Dispersible Powders (WDP)

32.1.3 Emulsifiable Concentrates (ECs) or(E)

32.1.4 Suspension Concentrates (SCs) or Flowables

32.1.5 Water Soluble Powder (SPs)

32.1.6 Solutions(S)

32.1.7 Granules (G)

32.1.8 Water Dispersible Granules (WGs)

32.1.9 Ultra-low-Volume (ULV) Formulations

32.1.10 Aerosols

32.1.11 Controlled Release (CR) Formulations

32.1.12 Baits

32.2 The Non-Insecticidal Ingredients of Formulations

32.2.1 Solvents

32.2.2 Diluents

32.2.3 Surfactants

32.3 Insecticide Application Equipment

a. Sprayers

b. Dusters

c. Granular Applicator

33. LIST OF INSECTICIDE

34. PRODUCT HARVESTING AND FORMULATION OF MICROBIAL INSECTICIDES

34.1 Product Harvesting

34.2 Formulation

34.2.1 Oil Suspension Formulation

34.2.2 Dusts or Wettable Powder

34.2.3 Suspension Concentrates (SC)

34.3 Processing

34.3.1 Function of the Surfactants

34.3.2 Wetting

34.3.3 Milling Aid

34.3.4 Stabilization

34.3.5 Milling Conditions

34.4 Suggested Evaluation Technique of Flowables

- Test of Mechanical Stability
- Suspensibility
- Storage Stability
- Viscosity
- Bloom
- Biological Activity

34.5 Evaluation of Separation Process “Recovery”

35. FUNGICIDE

35.1 Types

35.2 Mode of Action

35.3 Type of Chemical
35.4 Resistance
35.5 Fungicide Resistance Management
36. HERBICIDE
36.1 Application
36.2 Selectivity
36.3 Translocation
36.4 Mode-of-Action
36.5 Growth Regulator Herbicides
36.6 Photosynthesis Inhibitors
36.7 Pigment Inhibitors
36.8 Seedling Growth Inhibitors
36.9 Cell Membrane Disruptors and Organic Arsenicals
36.10 Lipid Synthesis Inhibitors
36.11 Amino Acid Synthesis Inhibitors
36.12 Other Herbicides that Inhibit Amino Acid Synthesis
37. FORMULATIONS OF HERBICIDE
37.1 The Foundation of Formulations
37.2 Types
37.2.1 Solutions (Water Soluble Concentrate and Soluble Powder)
37.2.2 Emulsions (Emulsifiable Concentrate)
37.2.3 Dry Material Suspensions (Wettable Powders, Dry Flowables, Water Dispersible Granules/Powders)
37.2.4 Granules
38. PESTS OF THE GREENHOUSE
38.1 Insect Anatomy
38.2 Insect Damage
38.3 Sucking Insects and Their Damage
38.4 Insects with Sponging Mouthparts
38.5 Siphoning Insects
38.6 Chewing Lapping Insects
38.7 Life Cycle Development or Metamorphosis

- Gradual Metamorphosis
- Complete Metamorphosis

38.8 Insect Pests
38.8.1 Aphids
38.8.2 Fungus Gnats
38.8.3 Leaf Miners
38.8.4 Mealybugs
38.8.5 Mites
38.8.6 Scale Insects
38.8.7 Thrips
38.8.8 Whiteflies
38.9 Insect Control

- Environmental Conditions
- Insect Identification
- Lifecycle
- Insecticide Resistance

38.10 Susceptibility of Greenhouse Plants to Pesticide Injury
38.11 Non Target Insecticide Action
39. BIS SPECIFICATIONS
40. PLANT LAYOUT & PROCESS FLOW CHART

41. PHOTOGRAPHS OF MACHINERY WITH SUPPLIER'S CONTACT DETAILS

- Pesticide Making Machine
- Glass Lined Steel Storage Tank
- Steel Jacketed Tank
- Storage Tank
- Ultra Filtration System
- Water Softening Plant
- Tray Dryer
- Ribbon Mixer
- Sand Bead Mill
- Dyno Mill
- Pulverizers Mills
- Hammer Mill
- Bucket Elevator
- Air Compressor

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.
