

# The Complete Technology Book on Starch and Its Derivatives

**Author:** H. Panda

**Format:** Paperback

**ISBN:** 8178330733

**Code:** NI81

**Pages:** 540

**Price:** Rs. 1,100.00 US\$ 29.73

**Publisher:** Asia Pacific Business Press Inc.

Usually ships within **5** days

Starch is a group of poly saccharides, composed of glucopyranose units joined together by glucosidric linkages. Starch is also metabolized for energy in plants and animals, and is used to produce a large number of industrial products. Starch is processed to produce many of the sugars in processed foods. The biggest industrial non food use of starch is as adhesive in the paper making process. Other important fields of starch application are textiles, cosmetic and pharmaceutical uses. Starch can be obtained from maize, sorghum, roots and tubers such as tapioca, arrow root, potatoes etc. Starch truly serves as a multifunctional ingredient in the food industry. Starch is one of the most present biomaterials has witnessed significant developments over the years. By products are obtained in the manufacture of different types of starch such as maize gluten has a number of interesting possible uses in industry, zein (by product of corn processing) is used in the preparation of stable glass like plastics, modification of zien is used as adhesives and in the preparation of coating compositions for paper, the most important by product from wheat starch manufacture is gluten which is used in preparing diabetic foods, for feeding cattle, thickening agent in textile printing and so on. The Global starch market is likely to get respite from deceleration in its market growth, with growth poised to receive a new lease of life in the next few years.

This book basically illustrates about the properties, structures, manufacturing process explained with flowcharts and diagrams, applications of starch and its derivatives etc. The major contents of the book are structure and chemical properties of starch, chemical composition, molecular structure, starch granule properties, water sorption and granule swelling as a function of relative humidity, factors affecting starch paste properties, the oxidation of starch etc.

This is a unique book, concise, up to date resource offering a valuable presentation of the subject. This book contains processes of starch and its derivatives. This book is an invaluable resource for new entrepreneurs, industrialists, consultants, libraries.

## Contents

1. Structure and Chemical Properties of Starch
  - Structure and Properties
  - Chemical Composition
  - Molecular Structure
  - Starch Granule Properties
  - Water Sorption and Granule Swelling as a Function of Relative Humidity

Factors Affecting Starch Paste Properties

2. The Swelling And Gelatinisation of Starch

The Swelling of Starch

The Gelatinisation of Starch

The Use of Swelling Agents to Study Gelatinisation

Methods of Following the Course of Gelatinisation of Starch : Optical Methods

Methods Depending on Viscosity

The Effect of Injury to Starch Granules before Gelatinisation on the Properties of the Pastes

Viscosity and Structure

The Rigidity of Starch Pastes

3. The Role of the Minor Constituents of Starch

The Role of Phosphorus in Starch

The Formation of 'Werner Complexes'

The Adsorption Theory

The Amylophosphoric Acid Theory

The Significance of Nitrogen in Starch

The Coacervation Theory

Fatty Acids Present in Certain Starches

Other Acids Present in Starch as Esters

4. The Retrogradation of Starch

'Retrogradation' of Starch by Freezing

'Retrogradation' by Solvents

Monomolecular Dispersion

Complete Retrogradation

The Explanation of Retrogradation

Practical Significance of Retrogradation in Industry

The Prevention of Retrogradation

Reactions with Formaldehyde

5. Starch and the Hydrogen Bond

6. The Reaction of Starch with Iodine

The Effect of Heat

Sensitivity of the Reaction

An Abnormal Starch-Iodide Reaction

The Composition of Starch Iodide

Use of Starch Iodide

The Starch-Iodide Reaction in the Spectro-photometric Determination of Starch

7. Root Starches

Manufacture of Potato Starch

Refining the Starch

Drying the Starch

Some Difficulties Occurring in the Manufacture of Potato Starch

Cassava Starch or Brazilian Arrowroot

The Manufacture of Sweet-Potato Starch

8. Cereal Starches

The Manufacture of Wheat Starch

Manufacture of Maize Starch

Early Process. Extracting the Starch

Treating the Starch

Drying

Modern Process

Rice Starch

9. The Oxidation of Starch

OXIDATION OF STARCH IN ACID MEDIA

Oxidation by Nitric Acid

Oxidation by Ammonium Nitrate

Oxidation by Chromic Acid

Oxidation by Permanganates

Oxidation by Hydrogen Peroxide

Oxidation by Halogens

Oxidation by Oxy-halogen Acids

Oxidation by other Per-compounds

Oxidation by Oxides in Acid Solution

Oxidation by Irradiation

Oxidation by Air in Acid Solution

Oxidation by Ozone

OXIDATION OF STARCH IN ALKALINE MEDIA

Oxidation by Hypohalites

Oxidation by Alkaline Chlorite

Oxidation by Alkaline Aktivin

Oxidation by Alkaline Permanganates

Oxidation by Alkaline Peroxides

Oxidation by Air in Alkaline Solution

Electrolytic Oxidation

Oxidation by Alkaline Mercuric Oxide

Oxidation by Alkaline Persulphates

OXIDATION OF STARCH IN NEUTRAL MEDIA

Oxidation by Bromine

Oxidation by Iodine

10. Glucose and Maltose

The Manufacture of Glucose

Raw Materials

Earlier Process

The More Recent Process

The Crystalline Forms of Anhydrous Dextrose and  
Dextrose Hydrate

Producing Anhydrous Dextrose

Uses of Glucose

The Manufacture of Maltose

11. Ethyl Alcohol and Acetone

The Manufacture of Ethyl Alcohol

The Amylo Process

The Production of Acetone

12. Dextrin and British Gums

Methods of Manufacture

Raw Materials

The Choice of Acid

Pre-treatment of Starch before Torrification

Main Steps in Dextrin Manufacture

Addition of Catalyst

Maturing the Starch

Drying the Starch before Roasting

The Roasting Process

Cooling and Re-moistening the Dextrin

Grinding and Bagging-off Operations  
 Conversion of Starch to Dextrin by the Wet Process  
 Acid Conversion in the Wet Process  
 The Conversion using Enzymes  
 13. Modified Starches  
 Physical Treatment to Modify Starch  
 14. Adhesives from Starch and Dextrin  
 Purpose and Applicability  
 The Application of Adhesives  
 Theoretical Considerations  
 Flour Pastes  
 Adhesives from Starch  
 Treatment with Caustic Alkalies  
 Treatment with other Alkaline Substances  
 Treatment with Acids  
 Treatment with Salts  
 Treatment with Oxidising Agents  
 Treatment of Starch with Swelling Agents  
 Addition of Various Compounds to Starch Adhesives  
 Dextrin Adhesives  
 15. The Foodstuff Industry  
 Potato Products in the Food Industry  
 Importance of the Storage History of Potatoes  
 Colour of Potato Chips  
 Cooking other than Frying  
 The Gelatinisation of Starch  
 The Effect of Various Factors on Gel-Strength of Starch Pastes  
 Uses of Starch on Various Foodstuff Preparations  
 Starch in the Baking Industry  
 Moisture Absorption by Dough  
 The Influence of Other Physical Properties of  
 Starch on Baking Quality  
 The Diastatic Activity of Flours  
 The Chemistry of certain Baking Faults  
 16. The Paper Industry  
 ENGINE SIZING  
 Tub Sizing  
 Coated Papers  
 Miscellaneous  
 17. The Textile Industry  
 Sizing of Yarns  
 Sizing  
 Considerations influencing Sizing  
 Mechanical Properties of Starch Films and  
 Sized Cloths Arranged in Order of Decreasing Magnitude  
 The Effect of Auxiliary Agents on the  
 Properties of Sizes and Finishes  
 Desizing  
 Enzymes  
 The Use of Enzymes in Desizing  
 The Finishing of Textile Fabrics  
 Adhesive Dressings  
 Characteristics of Individual Starches

Wheat Flour  
Tinting and Blueing Agents  
The Suitability of Starches and Dextrins  
The Printing of Textile  
Function of the Thickener  
Colour Value  
Starch Products used for Thickenings  
Disadvantages attendant on the Use of Starch Thickenings  
Thickenings of British Gums  
18. Miscellaneous Uses of Starches and Dextrins  
The Soap Industry  
Laundry Starches  
Cosmetic and Pharmaceutical Uses  
Horticultural Uses  
Fire-Proofing Preparations  
Explosives and Fuels  
Some Unclassified Uses  
19. Utilisation of the By-Products of Starch Manufacture  
20. Antiseptic Agents and Preservatives  
21. General Features and Nomenclature of Amylases  
Occurrence  
Composition  
22. Preparation of Enzymes used in the Starch Industry  
Enzymes from Malt  
Preparation of Individual Malt Enzymes  
Enzymes from Moulds or Fungi  
Enzymes from Animal Juices  
Bacterial Enzymes  
23. The Action of  $\alpha$ -Amylase on Starch  
Soluble Starch  
HYDROLYSIS OF STARCH BY  $\alpha$ -AMYLASE  
 $\alpha$ -amylodextrin  
Amyloamylose  
Erythro Bodies  
 $\alpha$ - and  $\beta$ -Glucosides  
The Mode of Action of  $\alpha$ -amylase  
24. Analysis of Starch and its Derivatives  
General Methods of Analysis  
ANALYSIS OF CORN STARCH  
ANALYSIS OF STARCH DERIVATIVES  
ANALYSIS OF STARCH HYDROLYZATES  
Dextrose  
Saccharide Contents of Acid-Converted Starch Hydrolyzates  
Reducing Sugars  
Schroder Method : Conversion of Titer Difference to Reducing Sugar  
Assay by Specific Gravity  
Conversion of Commercial Degrees Baumé to % Dry  
Substance for Commercial Corn Syrups and Dextrose Solutions  
Trace Components  
Calcium  
Copper  
Iron  
Chloride

SULFATE  
ANALYSIS OF FEED PRODUCTS

Starch

Crude Fiber

Lactic Acid

Xanthophylls

ANALYSIS OF CORN OIL

Iodine Value

Peroxide Value

Free Fatty Acids

Color

Cold Test

Smoke Point

25. List of Material Suppliers

List of Chemical Suppliers

LIST OF MACHINERY / EQUIPMENT SUPPLIERS

## About NIIR

**NIIR PROJECT CONSULTANCY SERVICES (NPCS)** is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
