

The Complete Technology Book on Chemical Industries

Author: NIIR Board

Format: Paperback

ISBN: 8178330687

Code: NI89

Pages: 443

Price: Rs. 975.00 US\$ 25.95

Publisher: Asia Pacific Business Press Inc.

Usually ships within **5** days

In modern age chemical industries have permeated most extensively in comparison with other industries and are progressing at a very rapid pace. Chemical Industry in India is one of the fastest growing industries under the Indian economy. The chemical industry comprises the companies that produce industrial chemicals. Central to the modern world economy, it converts raw materials into more than 70,000 different products. Chemicals have contributed in various sectors like food industry, fertilizers, perfumery, fragrance and flavour etc. Chemicals are used to make a wide variety of consumer goods, as well as thousands inputs to agriculture, manufacturing, construction, and service industries. There are numerous chemicals produced in chemical industry for example chloroform, caffeine, fertilizers, dyes, drug intermediates, herbicide, inorganic salts, copper sulphate, acetaldehyde etc. The chemical industry itself consumes 26 percent of its own output. The Chemical Industry in India is based on the idea of diversification. For example inorganic chemicals is the sector where the growth rate is near about 9% and the chemicals produced in this sector are mainly used in alkalis, fertilizers, etc. Depending on the product categories the chemical industry is divided in many other sectors like drugs and pharmaceuticals, fertilizers, fine chemicals like dyes and paints etc. The chemical industry in India which generates almost 13% of total national export is growing annually at a growth rate anywhere between 10% and 12%.

This book majorly deals with the molecular formula, raw materials, properties, laboratory testing, manufacturing process explained with flow diagrams and uses of the chemicals. The major contents of the book are inorganic salts, inorganic chemicals, industrial gas, fertilizers, alum, caffeine, ceramic chemicals etc. This book covers the production of more than 100 chemicals for example acetanilide, methylamine, butylamine, linalol, phosphorous, salicylic acid etc.

This book should be of great value to young chemical engineers and chemists who are just entering the field but those already practicing will find much of interest and use for broadening of their insight in to fields in which they are only marginally informed. It is hoped that this book will aid to young engineers, chemical, civil, mechanical and electrical as well as chemists, in understanding the value of chemical, the type of problems met in their production and method for solving these problems.

Contents

1. 2-Chloro-6(Trichloromethyl)-Pyridine

Introduction

Classification

Uses and Applications

Industrial Prospect
Formulations
Process of Manufacture
Laboratory Testing
Determination of Pyridine Content
Apparatus
Test Substances
Procedure
Chart Speed
Calculation

2. Alkylamines

Methylamine
Ethylamine
Propylamine
Isopropylamine
Butylamine
Isobutylamine
Amylamine
Monoethanolamine
Diethanolamines
Triethanolamine
Manufacturing Process
Reaction
Uses
Grades
Toxicity
Polypropylene
Manufacturing Process
Hercules Polypropylene Process
Uses
Grades
Polyethylene
Manufacturing Process
From Ethylene by Low-Pressure Polymerization
(Phillips Process)
Uses
Grades
Toxicity
Vinyl Acetate
Manufacturing Process

3. Alum

Introduction
Raw Material Requirements
Reactions
Process of Manufacture
Uses
Plant & Machinery
Market Potential
Plant Economics
Analytical Testing of Ammonium Alum
EDTA Method

Reagents
Procedure
Calculation
Gravimetric Method
Laboratory Testing of Aluminium Sulphate
Introduction
Procedure

4. Bleaching Powder

Introduction
Properties
Properties
Uses
Process of Manufacture
Laboratory Testing
Glacial Acetic Acid
Calculation

5. Caffeine (C₈H₁₀N₄O₂.H₂O)

From Tea Waste
Raw Material Requirements
Process
Properties
Purity
Reagents and Apparatus
Standardization
Procedure A : (Potentiometric)

6. Ceramic Chemicals

Boric Acid
Properties
Manufacturing Process
Reaction
Flow Diagram
Uses
Grades
Toxicity

7. Chemical and Additive for Food Industry

Citric Acid
Properties
Lactic Acid
Molecular Formula
Manufacturing Process
Sodium Bicarbonate
Manufacturing Process

8. Chloroform (Trichloromethane) CHCl₃

Chloroform
Molecular Formula
Properties
From Methane by Chlorination
Material Requirements (Theoretical)

Process
From Acetone and Bleaching Powder
Reaction
Material Requirements
Process
Grades
Purity
Determination of Relative Density
Apparatus
Procedure
Calculation
Determination of Distillation Yield
Apparatus
Assembly of the Apparatus
Procedure

9. Chloram Phenicol (p)(-)-Threo-1-(Para-nitrophenyl)-
2-dichloroacetamide-1, 3-propanediol
Reaction
Raw Material Requirements
Manufacturing Process
Properties
Grades
Purity

10. Coumarin (C₉H₆O₂)
From Salicylaldehyde
Reaction
Properties
Grades
Use & Application
Process of Manufacture
Laboratory Testing
Apparatus
Coumarin
Procedure
Reaction with Iodine Solution

11. Construction Material
Lime (Calcium Oxide)
Properties
Manufacturing Process
Hydrated Lime
Chemical Lime
Reaction
Flow Diagram
Uses
Grades
Toxicity

12. Corrosion Inhibitor
Sodium Dichromate
Manufacturing Process

From Chromite Ore
Reaction
Flow Diagram
Uses
Grades
Toxicity

13. Drug Intermediates & Pharmaceuticals

Acetanilide
Molecular Formula
Properties
Manufacturing Process
Reaction
Uses
Specification of Commercial Graders
Toxicity

14. Dry Cleaning Solvent

Perchloroethylene
Molecular Formula
Properties
Manufacturing Process
Reaction
Flow Diagram
Uses
Grades
Toxicity

15. Dyes and Intermediates

Aceto-Acetanilide
Properties
Manufacturing Process
Reaction
Flow Diagram
Uses
Grades
Toxicity
Anthraquinone
Properties
Manufacturing Process
From Phthalic Anhydride and Benzene
Raw Material requirements
b-Naphthol
Properties
Manufacturing Process
From Naphthalene
Raw material requirements
Bon Acid (3-Hydroxy-2 Naphthoic Acid)
Properties
Manufacturing Process
Raw material requirements
Reaction
Flow Diagram

Uses
Grade
G-Acid (2-Naphthol-6, 8 Disulphonic Acid)
Properties (Sodium Salt)
Manufacturing Process
Reaction
Uses
H-Acid
Properties
Manufacturing Process
Reaction
Flow Diagram
Uses
Naphthalene
Manufacturing Process
Process
Naphthol Asg
Manufacturing Process
Raw material requirements
Reaction
Flow Diagram
Uses
Grades
Rhodamine B (Basic Dye)
Properties
Manufacturing Process
From Phthalic Anhydride
Raw material requirements
Reaction
Flow Diagram
Uses
Grades
Toxicity

16. Ester Gum

Field of Applications
Classification
Manufacture
Laboratory Testing
Reagents
Driers
Procedure
Determination of Gel Time
General
Reagents
Procedure

17. Fatty Acids

Properties
Manufacturing Process
Raw Material Requirement
Reaction
Flow Diagram

Uses
Grades
Toxicity

18. Fertilizers

Introduction
Nutrition requirements of crops
Overview of the fertilizer industry
Nitrogen Fertilizers
Miscellaneous low-volume nitrogen fertilizers
Nitrogen fertilizers from synthetic ammonia
Phosphate Fertilizers
Natural Organic Phosphate Fertilizers
Fertilizers from Mineral Phosphates
Potassium Salts
Potassium Minerals
Potassium-Magnesium Minerals
Potassium Sulfate
Potassium Nitrate
Potassium Phosphates
Mixed Fertilizers
Nongranular Mixtures
Compound Granulars
Bulk Blends
Fluid Mixtures

19. Gaur Gum (Galactomannan Gum)

From Guar Seeds (Dry Process)
Raw Material Requirements
Process
Other Processes
Properties
Grades
Containers
Purity
Procedure
Calculation
Determination of Ash
Procedure
Calculation
Determination of Protein
Apparatus
Reagents
Calculation
Determination of Residue Insoluble in Acid
Reagents
Procedure
Calculation
Determination of Gum Content
Procedure
Economic Aspects

20. Herbicide

2, 4-Dichloro Phenoxy Acetic Acid (2, 4-D Acid)

Manufacturing Process

Raw Material requirements

Reaction

Flow Diagram

Uses

Grades

Toxicity

21. Industrial Gases

Overview

Nitrogen

Oxygen

Argon

Hydrogen

Helium

Carbon Dioxide - CO₂

Liquefied Natural Gas

Acetylene

Nitrous Oxide

22. Industrial Halogens

Bromine

Manufacturing Process

Bromine from Sea Water

Reaction

Raw material requirements

Reaction

Uses

Grades

Toxicity

Chlorine

Properties

Manufacturing Process

From Salt by Electrolysis

Raw material requirements (Diaphragm cell)

Reaction

Uses

Grades

Toxicity

Iodine

Manufacturing Process

From Oil-well Brines (Silver iodide process)

Raw material requirements

Reaction

Uses

Grades

Toxicity

23. Inorganic Chemicals - With Multipurpose

end use

Activated Alumina

Manufacturing Process

From Alum and Caustic Soda

Raw material requirement

Reaction

Uses

Grades

Toxicity

Activated Carbon

Properties

Manufacturing Process

From Charcoal

Raw Material Requirements

Uses

Grades

Toxicity

Phosphorus Oxychloride

Properties

Manufacturing Process

From Phosphorus Trichloride and Phosphorus

Pentoxide

Raw material requirements

Reaction

Uses

Grades

Toxicity

Sodium Acetate

Properties

Manufacturing Process

From Acetic Acid and Soda Ash

Raw material requirements

Reaction

Uses

Grades

Toxicity

Sodium Chloride

Properties

Manufacturing Process

By Solar Evaporation

Raw material requirements

Major Engineering Problems

Uses

Grades

Toxicity

24. Inorganic Salts

Aluminium Chloride

Properties

Manufacturing Process

From Aluminium Metal and Chlorine

Raw material requirements

Reaction

Uses

Grades

Toxicity

Ammonium Chloride

Properties

Manufacturing Process

From ammonium sulphate and sodium chloride

Raw material requirements

Reaction

Uses

Grades

Toxicity

Ammonium Nitrate

Properties

Manufacturing Process

From Ammonia and Nitric Acid

Raw Material Requirements

Barium Carbonate

Properties

Manufacturing Process

From Barium Sulphide and Carbon Dioxide

Raw material requirements

Reaction

From Barium Sulphide and soda Ash

Raw material requirements

Reaction

Uses

Grades

Toxicity

Copper Sulphate

Properties

Manufacturing Process

From Cupric Oxide and Sulphuric Acid

Raw material requirements

Reaction

Uses

Grades

Toxicity

Uses

Grades

Toxicity

Ferrous Sulphate Heptahydrate

Properties

Manufacturing Process

From Steel Pickling Liquor

Raw material requirements

Reaction

Uses

Grades

Toxicity

Potassium Silicate

Properties

Manufacturing Process

From Sodium Silicate

Raw material requirements

Uses

Grades

25. Linalol

Introduction

Raw Materials Required

Process

Miscellaneous

Properties

Containers

Grades

Uses

Plant & Machinery

28. Metal Treatment and Degreasing chemicals

Chromic Acid

Properties

Manufacturing Process

From Sodium Dichromate

Raw material requirements

Reaction

Uses

Grades

Trichloroethylene

Properties

Manufacturing Process

From Acetylene and Chlorine

Raw material requirements

Reaction

Uses

Grades

Toxicity

29. Natural Gas

Characteristics

Occurrence of Natural Gas

Preparing Natural Gas for Transmission and Sale

Processing for Liquids Recovery

30. Acetaldehyde

Properties

Aceto Acetic Ester

Properties

Manufacturing Process

Raw Material Requirement

Reaction

Uses

Grades

Toxicity

Fire Fighting

Aniline

Properties

Manufacturing Process

From Nitrobenzene by reduction

Raw Material requirements

Benzaldehyde

Properties

Manufacturing Process

Oxidation of Toluene

Raw material requirements

Reaction

Uses

Grades

Specifications for Benzaldehyde
Toxicity
Carboxy methyl cellulose (sodium Salt)
Properties
Manufacturing Process
From Waste Cotton (or cellulose)
Raw material requirements
Reaction
Uses

32. Phosphorus and Phosphates

Introduction
Phosphate Rock
Resources
Phosphate Ores
Mining
Beneficiation
Elemental Phosphorus and Phosphoric Acid
Furnace Phosphoric Acid
Industrial Phosphates
Wet Process Phosphoric Acid
Dihydrate Process
Major Dihydrate Processes
Hemihydrate Processes for Phosphoric Acid
Unit Operations
Superphosphoric Acid
Wet Process Acid by-Products
Phosphogypsum
Fluorine Recovery
Uranium Recovery
Purified Phosphoric Acid
Environmental Aspects

33. Plasticiser

Chlorinated Paraffin Wax
Molecular Formula
Properties
Dialkyl Phthalates
Dimethyl Phthalates
Properties
Diethyl Phthalate
Properties
Dibutyl Phthalates
Properties
Diocetyl Phthalates
Properties
Diamyl Phthalates
Properties
Manufacturing Process
From Phthalic Anhydride and Alcohol by
Esterification
Raw material requirements
Dibutyl phthalate
Reaction
Uses

Grades
Toxicity
Tricresyl Phosphate
Properties
Manufacturing Process
From Cresol and Phosphorus Oxychloride
Reaction
Uses
Grades
Toxicity

34. Potassium Permanganate (KMnO₄)

Properties
From Manganese Ore
Reaction
Material Requirements
Process
From Potassium Manganate by Electrochemical
Oxidation
Reaction
Material Requirements
Process
Grades
Containers
Purity
Determination of Potassium Permanganate Content

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our various services are: Detailed Project Report, Business Plan for Manufacturing Plant, Start-up Ideas, Business Ideas for Entrepreneurs, Start up Business Opportunities, entrepreneurship projects, Successful Business Plan, Industry Trends, Market Research, Manufacturing Process, Machinery, Raw Materials, project report, Cost and Revenue, Pre-feasibility study for Profitable Manufacturing Business, Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Business Opportunities, Investment Opportunities for Most Profitable Business in India, Manufacturing Business Ideas, Preparation of Project Profile, Pre-Investment and Pre-Feasibility Study, Market Research Study, Preparation of Techno-Economic Feasibility Report, Identification and Section of Plant, Process, Equipment, General Guidance, Startup Help, Technical and Commercial Counseling for setting up new industrial project and Most Profitable Small Scale Business.

NPCS also publishes various process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

NIIR PROJECT CONSULTANCY SERVICES , 106-E, Kamla Nagar, New Delhi-110007, India. **Email:** npcs.india@gmail.com **Website:** NIIR.org
