Dyeing is the process of imparting colours to a textile material. Different classes of dyes are used for different types of fiber and at different stages of the textile production process, from loose fibres through yarn and cloth to completed garments. Dyes are any substance, natural or synthetic, used to colour various materials, and have wide industry applications ranging textiles, leather, and food, paper etc. They are available in widest ranges for different applications like acid dyes for wool and nylon, direct dyes for cotton, etc. Dyes and its intermediates are specifically used to make the textiles decorative and attractive. At present, India contributes about 6% of the share in the global market with a CAGR of more than 15% in the last decade. The organized sector dominates, with 65% share of the total market, while the unorganized sector controls the remaining 35% of the market. The demand for dyes and dye intermediates is expected to grow at around 6%, backed by strong demand from the textiles, leather, and inks industries. Dyestuff sector is one of the core chemical industries in India. It is also the second highest export segment in chemical industry. The major users of dyes in India are textiles, paper, plastics, printing ink and foodstuffs. The textiles sector consumes around 80% of the total production due to high demand for polyester and cotton, globally. Globally the dyestuffs industry has seen an impressive growth.

This book majorly deals with classification & nomenclature of dyes, commercial form of dyes, properties, formulae, applications of dyes, manufacturing process of dye intermediates, plant and machinery used etc. The major contents of the book are diazotization, coupling, azo coupling, oxidative coupling, anthraquinone dyes; disperse dyes, dispersion, effect of dispersing agents etc.

Due to increasing growth of textile industries, demand of dyes and dye Intermediates are also increasing very fast in domestic as well as in global market. The book gives stress on syntheses of different types of dyes and dye Intermediates. The formulae and processes have been described in very proper way. Professionals, corporate houses and new entrepreneurs will find this book very useful.

Contents

1. Dyes & Dye Intermediates
Classification & Nomenclature of Dyes

2. Azo Dyes
Diazotization
Coupling
* Azo Coupling
* Oxidative Coupling

Classification of Azo Dyes
* Primary Disazo Dyes
* Secondary Disazo Dyes
* Miscellaneous Disazo Dyes

Types of Azo Dyes: Structures, Application, Uses

Methods of Manufacture

Manufacture Congo Red
Diazotization
Coupling
Isolation

Diazotization of Benzidine
First Coupling
Second Coupling
Third Coupling
Isolation
Diazotization
Coupling
Isolation
Diazotization of Benzidine
Coupling
Isolation
Ethylation
Diazotization of Dianisidine
Coupling
* Yield

Direct Light Fast Blue 4GH
Plant for Azo Dyes

Important notes for diazotization and Coupling

Methods of Analysis of Azo Dyes
* Identification

Methods of Analysis of Azo Dyes
* Procedure
* Hydrolysis
* Nitric Acid Split
* Procedure
Identification of Arylamines in Cleavage Products
Procedure
Identification of Diamines in Cleavage Products
Separation
* Blowout Method
* Identification of Coupling Components

Assay Methods
* Salt Test
3. Reactive Dyes

Introduction

Development of Reactive Dyes
* Chromophoric System
* The Bridging Group

The Reactive System

Synthesis

Reactive Dyes for Cellulosic Materials, Wool & Nylon
* Cellulosic Materials
* Reactive Systems Based on Nucleophilic Substitution
* Reactive Systems Based on Nucleophilic Addition
* Reactive System Based on Both Nucleophilic Addition and Substitution
* Dyes that React with Fibers Under Acid Conditions
* Polyfunction Fixing Agents from Covalent Bonds with Both the Dyestuff and the Substrate
* Dyes Containing several Reactive Groups
* Wool
* Reactive Systems Based on Nucleophilic Substitution
* Reactive Systems Based on Nucleophilic Addition
* Reactive Systems Based on Both Nucleophilic Addition and Substitution
* Reactions involving Disulfide Bonds
* Reactions involving Modified Wool
* Reactive Dyes for Nylon

Classification of Reactive Dyes

Vinyl Sulfone Reactive Dyes
Tetrachloro Pyrimidine Dyes
Chemistry of tetrachloropyrimidines
Reactive Dyes Based on Epoxides

Other types of Reactive Dyes

Reactivity of different types of Reactive Dyes

Application

Purification of Reactive Dyes
Advantages and Limitations of Reactive Dyes
Fabric Preparation
Washing off
New Development of Reactive Dyes
Kayacelon Reaction Dyes
Cibacron C Dyes
Procion Supra Dyes of (I.C.I.)
Procion HEXL Dyes
Procion N Dyes
Manufacturing Processes
Acetylation of H Acid
Diazotisation of Tobias Acid
Reactive Dyes with Trichloropyrimidine as Reactive Group
Reactive Dyes with 2, 3-Dichlorquin-oxaline-6-Carbonyl Chloride as Reactive Group
Reactive Dyes with Chloroacetyl as reactive Group
Reactive Dyes with 6-amino-2-chlorobenzothia-zole-5 Sulphonic acid as reactive group
Control Test
Properties of Cynuric Chloride
Chlorosulfonic Acid
Commercial Grades and specificaion of Chlorosulphonic Acid
Identification of Reactive Dyes
Analysis
4. Anthraquinone Dyes
Disperse Dyes
Dispersion
Effect of Dispersing Agents
Levelling Agents
Classification
Disperse dyes in the dye bath
Disperse dyes in the fibre
Sensitivity to Metal
Solacet Dyes (Water Soluble)
Current Research Work
Manufacturing Processes
Emulsion of Diphenylamine
Diazontisation of Aniline
Acid Pasting and dispersion
Treatment with hydrochloric acid
* Reactions
* Reduction
Aminoanthraquinone Dyes
* Anthrarufin and Chrysazin Derivatives
Vat Dyes
Acylaminoanthraquinones
Aminoanthraquinone Anthramides
Anthraquinone-Carbozoles
Ring Closure with aluminium chloride
Ring Closure with Titanium Tetrachloride
Ring Closure with Sulphuric acid
Ring Closure with Potassium Hydroxide
Oxidation
Characterisation of Anthrimides and Anthraquinone Carbozoles
Spectral Differentiation
Infrared
C = O Stretching and NH deformation Vibrations
Aminoanthraquinone Indanthrones
Vat Paste
* Manufacturing of Vat Paste
* Manufacturing Process
Standardisation of Vat Dyestuffs
Identification of Vat Dyes
5. Acid Dyes
* Sample Acid Dyes
* Mordant Acid Dyes
* Premetallized Acid Dyes
Manufacturing Processes
Mordant Dyes
Heat transfer Dyes
Economic Aspects
6. Basic Dyes
Classification of Basic Dyes
Manufacturing Processes
Economic Aspects
Health and Safety Factors
Uses
Methods of Analysis
* Identification
Dyes on Substrates
Assay Methods
Titration Methods
Miscellaneous Assay Methods
Application Methods
Determination of Impurities
7. Sulfur Dyes
* Chemical Properties
Manufacturing Process
* Oxidation
Grain Standardisation
Manufacture
Application
Economic Aspects
Commercial Forms of Sulfur Dyes
Health and Safety Factors
Uses
8. Cyanine Dyes
* Properties
Examples of Nuclie Occuring in Important Cyanine Dyes
Photophysical Properties
* Production of Coloured Paper
  Batch Dyeing
  Continous Dyeing
  Leather Dyeing
* Leather Dyeing Methods and Equipment
  Evaluation of Dyes
  Colourfastness
  Lightfastness
  Washfastness
  Miscellaneous Fastness Properties
  Application Properties
  Qualitative And Quantitative Analyses
  Paper and Thin Layer Chromagraphy
  High Pressure Liquid Chromatography
  Spectroscopic Methods
  Colour Difference Evaluation and
  Colour Sorting
* Colourant Formulation
13. Dyes for Non-Textile Application
  Leather Dyes
  Leather Dyeing
  Paper Colours
  Solvent Colours
  Fat Soluble Dyes
  Zapon Fast Dyes
  Neozapon Dyes
  Sudan Dyes
  Thermoplast Dyes
  Manufacturing Process
  Biological Stains
  Dyes Used in Microscopy
  Influence of Impurities on Intensity
  of Staining
  Staining of Bacteria
  Food Colours
  * Characteristics of Certified Food Colours
  * Solubility
  * Specification
  Manufacturing Process
  Material of Construction for Plant
  Manufacturing Process
  Dyes for Miscellaneous Uses
  Waste Water Treatment Textile
  Dyes and their Uses
  * Materials and Methods
  * Experimental Details
  Observations and Result
  Conclusion
14. Analysis of Dyes
  Dye Classification
  * Classification according to Usage
  * Classification according to
  Chemical Structure
Methods of Analysis
Identification of Dyes
* Cationic Dyes
* Metal Complex Dyes
* Vat Dyes
* Leuco Ester Vat Dyes
* Sulfur Dyes
* Reactive Dyes
* Pigments
* Disperse Dyes
15. Dye Intermediates

Introduction
* Sources of Raw Material
* List of Intermediates, Nomenclature;

Auxiliary Agents
* Equipment and Manufacture
* Chemistry of Dye Intermediates
* Electrophilic Substitution
* Transformation of Primary Substitution Products
* Examples of the Most Important Reactions
  Sulfonation
  * Reduction
  * Alkeali fusion
  * Nucleophilic Replacement of Activated CL
  * Special Reactions and Rearrangements
  * Benzidine Rearrangement
  * Bucherer Reaction
  * Kolbe-Schmitt Reaction

Project Briefs
Aceto Acetanilide
Anthraquinone
2-Chloroanthraquinone
2-Amino Anthraquinone
1-Hydroxy Anthraquinone
1-Hydroxy Anthraquinone
1:4 Dihydroxy Anthraquinone (Quinizarine)
1:4 Diamino Anthraquinone
1-Amino-2-Methyl-Anthraquinone
2-Methyl Anthraquinone
1-Nitro-2-Methylanthraquinone
1-Amino-2-Methylanthraquinone
Benzanthrone
Manufacturing Process
* Bromobenzanthrone
* Benzidinc Derivatines
* Chicago Acid and Peri Acid
* Cyanuric Chloride
* Gamma Acid
* H Acid
* Laurant's Acid
* Metanilic Acid
* Orthanilic Acid

NIIR Project Consultancy Services (NPCS) 8/9
* R Salt/R Acid
* Sulfanilic Acid
* Tobias Acid
* Vinyl Sulfone

* P-Aminophenol
* o-Phenylenediamine
* o-And P-Nitrochlorobenzene
* p-Phenylenediamine
* 1-Phenyl 3-Methyl 5-Pyrazolone
* 1-Amino-2-Naphthol-4-Sulphonic Acid
* Schaefer’s Acid
* J-Acid
* Alkali Fusion of Amino J-Acid
* N-Phenyl J-Acid

About NIIR

NIIR PROJECT CONSULTANCY SERVICES (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

NPCS also publishes varies process technology, technical, reference, self employment and startup books, directory, business and industry database, bankable detailed project report, market research report on various industries, small scale industry and profit making business. Besides being used by manufacturers, industrialists and entrepreneurs, our publications are also used by professionals including project engineers, information services bureau, consultants and project consultancy firms as one of the input in their research.

Our Detailed Project report aims at providing all the critical data required by any entrepreneur vying to venture into Project. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
