

Alcohol and Alcohol based Industries, Alcoholic and Non Alcoholic Beverages ,Fruit Juices, Whisky, Beer, Rum ,Wine and Sugarcane bye products

[Handbook On Chemical Industries \(Alcohol Based\)](#)

Author: H. Panda

Format: Paperback

Book Code: NI7

Pages: 374

ISBN: 8178330679

Price: Rs. 750.00 US\$ 19.95

The chemical industry comprises the companies that produce industrial chemicals. Central to the modern world economy, it converts raw materials (oil, natural gas, air, water, metals, and minerals) into several different products. The Indian chemical industry is among the established traditional sectors of the country, playing an integral role in the national economic development. This sector, forming part of the basic goods industry, is a critical input for industrial and agricultural development. The fundamental nature and diversity of the industry is best understood from the fact that the industry itself is the largest consumer of its products, accounting for around 33% of total consumption. Alcohol is a very valuable material which has variety of uses such as for production of chemicals, as a source of energy and fuel etc. an alcohol is an organic compound in which the hydroxyl functional group (OH) is bound to a carbon atom. In particular, this carbon centre should be saturated, having single bonds to three other atoms. Some of the common examples of alcohol and its derivatives are acetaldehyde, acetic acid, chloroacetic acid, acetic anhydride, dimethyl acetamide, butyl alcohols, ethyl acetate, butyl acetate, cellulose acetate, ethyl ether and many more. Ethanol can be used in the pharmaceutical, cosmetics, solvents, food, and chemical industries with a majority of industrial ethanol used as a solvent in the manufacture of pharmaceuticals, paints, and lacquers. It is also used as a carrier in medicines. Some food extracts and flavourings can contain ethanol. It is also used in the personal care industry in products such as hairspray, mouthwash and cologne and in hand sanitizers and medical wipes. Some of the fundamentals of the book are manufacture of ethanol, absolute/anhydrous alcohol, barium acetate, calcium acetate, chromium acetate, cobalt acetate, copper acetate, lead acetate, vinyl chloride, vinyl acetate monomer, poly vinyl acetate, film-forming latexes, non film forming latexes, styrene based resins, styrene polyester resins, styrenated oils and alkyds, ion exchange resins, ethylene glycol monoethyl ether (cello solve) etc. The book covers manufacturing details of various alcohol based chemicals. We hope that it will be very resourceful for new entrepreneurs, researchers, general information seekers and libraries as a reference book.

Importers Directory of Food, Beverages & Tobacco Products (World Wide /International Buyers Database) 3rd Edition

Format: CD-Rom

Book Code: NID63

Price: Rs. 4,307.00 **US\$** 150.00

ABOUT: Today much of the world's economy is based on the ability of countries to import and export goods to each other. This global economy is vital to allowing the exchange of technology and goods and relies upon a network of importers and exporters to ensure that goods can flow freely and be available to meet the ever growing demand of the public. In order to keep track of the most reputable importers, we have created Database of Importers. Perhaps no other question is asked more frequently by exporters than "Where and how can I find importers?? Database of Importers is a perfect starting point for international exporters, manufacturers, traders and merchants looking to establish direct contacts with overseas customers. This Directory contains the latest and complete information about your potential business partners in several countries. The importers information listed in Buyers Directory has been collected from very reliable sources like electronic media, embassies and different association of concerned countries .Having in view the export promotional programme, our dedicated team has compiled Buyers Directory with hard work, efforts and devotion. The Directory contains the most comprehensive database of importer information. We at NPCS collect data from around the world, and then classify the raw data into the kind of intelligent categories that companies around the world use to:

- Find new importers, new markets and new business opportunities
- Enhance international trade
- Support sales & marketing.

Importers Directory of Food, Beverages & Tobacco Products (World Wide /International Buyers Database) 3rd Edition (Food Products, Dairy Products, Beverages, Milk, Chocolates, Cereal, Wheat, Bakery Products, Biscuit, Noodles, Pasta, Starch, Vegetables, Canned Food, Frozen Food, Seafood, Pulses, Spices, Pickles, Sauces, Fruits, Sugar, Juices, Honey, Eggs, Meat, Beer, Vinegar, Guar Gum, Wine, Soft Drink, Cigarettes, Liquor, Alcohol) Contains: Over 6,300 Importers / Foreign Buyers. Details include Company's Name, Contact Person (4,400), Address (6,200), Phone (6,300 Landline/ Mobile), E-Mail (3,400), Fax (4,500), Website (1,000) and Product Description. Note: All Records does not contain all fields of information. However, maximum information has been incorporated. Format: MS Excel, .xls

[The Complete Technology Book on Alcoholic and Non-Alcoholic](#)

Beverages (2nd Revised Edition)-(Fruit Juices, Sugarcane Juice, Whisky, Beer, Microbrewery, Rum and Wine)

Author: NPCS Board of Consultants & Engineers

Format: Paperback

Book Code: NI209

Pages: 576

ISBN: 9788178331805

Price: Rs. 2,275.00 US\$ 60.95

Alcoholic Beverage contains more than a minimal amount of ethyl alcohol or ethanol. They are classified into three general classes called beer, wine, and spirit. Non-Alcoholic Beverages are considered as the non-alcoholic version of alcoholic beverages. Non-alcoholic beverages include drinks that contains less than 0.5% alcohol. Changing tastes and preferences of consumers and inclination toward consumption of convenience food and beverages have led to the rise in demand for non-alcoholic beverages in the last few years. The global beverage market looks good with opportunities for alcoholic and non-alcoholic beverages. It is expected to reach in \$trillion and is forecast to grow at a CAGR of 3.0%. The major drivers for the growth of this market are growing urbanization, and disposable income. The non-alcoholic segment is expected to show above average growth. Consumer preferences, growing population, and health awareness are the major drivers. Within global beverage industry, beer is expected to remain the largest segment by value. Acceptance of alcohol consumption by consumers, population base of the young generation, and increasing per capita income are the major driving forces that spur growth for this segment over the forecast period. The rapidly invading global culture is also ensuring a rising numbers of Beer Cafés and Microbreweries across the World. The major contents of the book are Grape Juice Processing, Apple Juice, Tropical Fruit Juices, Chemistry and Technology of Citrus Juices and By Products, Beer, Whisky, Rum, Table Wines, Carbonation and Filling, Flavouring and Emulsions, Microbrewery, Manufacturing Process, Process Flow Diagrams, Addresses of Plant & Machinery Suppliers and Photographs of Machineries. It will be a standard reference book for Professionals, Entrepreneurs, Agriculturists, Agriculture Universities, Food Technologists, those studying and researching in this important area and others interested in the field of Alcoholic and Non-Alcoholic Beverages Products Manufacturing.

[Industrial Alcohol Technology Handbook](#)

Author: NPCS Board of Consultants & Engineers

Format: Paperback

Book Code: NI238

Pages: 552

ISBN: 9788178331430

Price: Rs. 1,675.00 US\$ 150.00

Production of industrial alcohol is an age old practice. But with time, the usage areas as well as production techniques have gone through a major transformation. Industrial alcohol is distilled ethyl alcohol (C₂H₅OH), normally of high proof, produced and sold for other than beverage purposes. It is usually distributed in the form of pure ethyl alcohol, completely denatured alcohol, especially denatured alcohol and proprietary solvent blends. Ethyl Alcohol is the common name for the hydroxyl derivative of the hydrocarbon ethane. Industrial alcohol is distilled ethyl alcohol normally of high proof, produced and sold for other than beverage purposes. Industrial alcohol finds its applications in many chemical industries, pharmaceutical industries, Ink Industries and various allied applications. Much of this alcohol is obtained synthetically from ethylene. However, its production from microbial fermentation using variety of cheap sugary substrates is still commercially important. The various substrates used for ethanol production are sugar crops such as sugarcane, sugar beet, sorghum, etc. provide a good substrate. Bye product of these crop processing, e.g., molasses, sweet sorghum syrup, etc. are the most common substrates. Cereals like maize, wheat, rice etc are also used for ethanol production. Distillation of industrial alcohol, which is normally not used for consumption, can be made in a two step process. The process of distillation is one with a slow dynamics making it essential to have a carefully planned and designed control system. Ethyl alcohol or ethanol ranks second only to water as the most widely used solvent in chemical industry and as these industries have expanded, so the demand for industrial alcohol has increased. Some of the fundamentals of the book are base case production of alcohol, survey and natural alcohols manufacture, alcohol from wheat straw, alcohol from sacchariferous feed stocks, conventional process used in Indian distilleries, fermentation, distillation, continuous rectification and reflux ratio, alcohol recovery, quality of alcohol, steam economy, fuel oil separation, trihydric and polyhydric alcohols, coal gasification, methanol synthesis, coal gasification and raw gas purification, synthesis gas preparation, methanol synthesis and purification, badger conceptual design This handbook on Industrial alcohol technology provides complete details on process and the technology used in the production of ethanol

from various sugar crops and cereals and also briefs the different types of monohydric, trihydric and polyhydric alcohols. This handbook will be very helpful to its readers who are just beginners in this field and will also find useful for upcoming entrepreneurs, existing industries, technical institution, etc.

The Complete Book on Wine Production

Author: H. Panda

Format: Paperback

Book Code: NI244

Pages: 752

ISBN: 9789381039021

Price: Rs. 2,275.00 US\$ 60.95

Wine is the most loved beverage across the world and a popular accompaniment with food. The popularity of wine in India has started growing rapidly. Wine is the fermented product of the grape. Because crushed grapes contain all that is needed to create wine, ancient wine producers simply allowed nature to take its course. As time went on, people realized that by intervening at certain times, they could make a wine with more predictable characteristics. Grape cultivation is one of the most remunerative farming enterprises in India. Grapes can be eaten raw or they can be used for making wine, jam, juice, jelly, vinegar. Delicate wine grapes are generally produced in frost free and moderate temperature environments. Thousands of grape varieties are grown all over the world; the wine grape varieties represent only a fraction of them. The colour, size, phenolic distribution and acidity of grapes give each wine its own characteristic. Wine quality is affected by the factors such as soil, climate, viticulture and wine making techniques. Wine quality is dictated mainly by the grapevines, not by the winemaker. Wine must be slightly aged to be drinkable. Grape production, linked with wine processing has provided the much-needed impetus for the growth of the wine industry. Indian government plays a crucial role in the current phase of Indian wine industry, supporting the current momentum amongst others through financial assistance and market protection. Gradual reduction of import duty levels will no doubt lead to increasing competition through imports, but will on the longer term result in a competitive industry that is able to export its top quality products to overseas markets. Some of the fundamentals of the book are wine quality, mold and mold complexes associated with grapes, grape aroma components, soluble solids in winemaking, the molds and yeasts of grapes and wine molds, yeasts of grapes and wine, by-products of fermentation, chemistry of fermentation and composition of wines, outline of red wine making, stuck wines, white table wine, sparkling wine, vermouth and flavoured wines, cider and apple wine, plum wines in Europe, berry wines in pacific coast states, cherry and plum wines in pacific coast states, pomegranate wine from concord grapes, pineapple wine, pear wine, wine from oranges, grapefruit wine, wine from dried fruits, Swiss research on fruit juice fermentation honey wine (mead), etc. This book provides a

complete detail on all aspects of Wine production like describe the varieties of wine available, its manufacturing process, bottling and storage of wine, quality control in wine making and many more. It is hoped that this book will be very resourceful to all its readers, students, scientists, technocrats, existing industries, new entrepreneurs and all those who are related to wine making.

The Complete Book on Sugarcane Processing and By-Products of Molasses (with Analysis of Sugar, Syrup and Molasses)

Author: H. Panda

Format: Paperback

Book Code: NI246

Pages: 544

ISBN: 9788178331447

Price: Rs. 1,675.00 US\$ 44.95

Sugarcane grows in all tropical and subtropical countries. Sucrose as a commercial product is produced in many forms worldwide. Sugar was first manufactured from sugarcane in India, and its manufacture has spread from there throughout the world. The manufacture of sugar for human consumption has been characterized from time immemorial by the transformation of the collected juice of sugar bearing plants, after some kind of purification of the juice, to a concentrated solid or semi solid product that could be packed, kept in containers and which had a high degree of keep ability. The efficiency with which juice can be extracted from the cane is limited by the technology used. Sugarcane processing is focused on the production of cane sugar (sucrose) from sugarcane. The yield of sugar & Jaggery from sugar cane depends mostly on the quality of the cane and the efficiency of the extraction of juice. Other products of the processing include bagasse, molasses, and filter cake. Sugarcane is known to be a heavy consumer of synthetic fertilizers, irrigation water, micronutrients and organic carbon. Molasses is produced in two forms: inedible for humans (blackstrap) or as edible syrup. Blackstrap molasses is used primarily as an animal feed additive but also is used to produce ethanol, compressed yeast, citric acid, and rum. Edible molasses syrups are often blended with maple syrup, invert sugars, or corn syrup. Cleanliness is vital to the whole process of sugar manufacturing. The biological software is an important biotechnical input in sugarcane cultivation. The use of these products will encourage organic farming and sustainable agriculture. The book comprehensively deals with the manufacture of sugar from sugarcane and its by-products (Ethyl Alcohol, Ethyl Acetate, Acetic Anhydride, By Product of Alcohol, Press mud and Sugar Alcohols), together with the description of machinery, analysis of sugar syrup, molasses and many more. Some of the fundamentals of the book are improvement of sugar cane cultivation, manufacture of Gur (Jaggery), cane sugar refining: decolourization with absorbent, crystallization of juice, exhaustibility of molasses, colour of sugar cane juice, analysis of the syrup, massecuites and molasses bagasse and its uses, microprocessor based electronic instrumentation and control system for modernisation of the sugar industry, etc. Research scholars, professional students, scientists, new entrepreneurs, sugar

technologists and present manufacturers will find valuable educational material and wider knowledge of the subject in this book. Comprehensive in scope, the book provides solutions that are directly applicable to the manufacturing technology of sugar from sugarcane plant.

India Beer Market- Industry Size, Share, Drivers, Trends, Analysis and Forecasts (2019-24)

Author: NPCS Team

Format: Paperback

Book Code: NI263

Pages: 126

ISBN: 9788194737933

Price: Rs. 53,100.00 **US\$** 1,200.00

The report titled 'India Beer Market- Industry Size, Share, Drivers, Trends, Analysis and Forecasts (2019-24)' released by Niir Project Consultancy Services, provides a comprehensive analysis on Indian Beer Market. The report begins with a brief insight into the scenario of the global beer industry giving details about global beer consumption patterns and then proceeds to analyze the Indian scenario. India has one of the lowest consumption levels of beer in the world. Currently India consumes ~2% of the total world consumption and has the potential to match, the world leader, China thus opening a vast pool of opportunities for the brewing companies. The report gives a snapshot of the manufacturing process of the beer starting from malting till the end of process at bottling. The beer segment can be categorized either by fermentation process (Ale & Lager) or by alcohol by volume content (Mild & Strong). Indian industry is majorly dominated by strong beer segment but new flavorful mild beers are finding their feet on the ground. Strong beer has alcohol contents of >5% and mild beer contains less than 5% of alcohol. The report analyzes the beer market in profundity by covering data points like industry growth drivers, emerging trends coupled with SWOT analysis of the market and the regulatory framework surrounding the sector. Beer is being increasingly accepted as a social drink and the urban youth in particular favours it as the preferred alcoholic beverage. Indian market although dominated by hard liquor, consumers are now looking for choices away from whisky. It is not just the male populace that is enamored by beer but female population has started equally enjoying beer. One of the drivers for the beer industry would be the rising concept of online alcohol delivery portals. A sudden spurt of alcohol delivery portals not only indicate the rising acceptability of alcohol in the country but also the much evolving consumer base. The consumers who were unable to go to a liquor store earlier and purchase their preferred drink, are now in a sweet spot with home deliveries. The Indian beer market has been experiencing the trend of microbreweries and some exclusive beer outlets. Such emergence has contributed in increased awareness and easy availability of beer in Indian markets. Also, a rage in the industry is the craft beer boom. Indian market is swamped with a number of craft beers with new and innovative flavors. Beer consumers are now adays shifting

their preferences from regular mainstream bottled beers to artisanal brews, new fresh flavors and unique local ingredients. A large number of microbreweries are currently selling their bottled craft beer in market and are gaining a firm foot on the ground. The surge in craft beer sales is intended to drive the beer industry sales to the bubbly top! One of the recent trends to hit the industry is emergence of 0% beer. Since the consumer profile for beer industry in India is evolving so are their preferences and hence the emergence of new varieties. Consumers are now increasingly opting for drinks that are low on sugar, carbs and hence the calories. In the view of increasing demand for such drinks, a lot of brewers have come up with their versions of 0% beer to tap the demand from this segment. With a ban on direct advertising of alcoholic beverages in India, companies nowadays are using innovative concepts to market their products. Indian market players have been forced to be more innovative in their approach to engage the consumers, branching out into concepts such as non-alcohol brand extensions and surrogate advertising and alignment with sport. Also, With the emergence of more health-conscious consumer class, the health benefits of drinking beer, in moderation, has come into the light. Indian alcohol distribution structure is complex and generally varies from state to state. Liquor is a state subject in India and consequently, the liquor industry is subjected to very strict distribution controls by the state governments. The distribution structure consists three types of market- Government controlled, open market and auction market. States like Assam, West Bengal and Pondicherry are states with open market; States like Tamil Nadu and Kerala fall under the complete regulation of government whereas states like Haryana, Chandigarh and Punjab fall under the auction market structure. The Indian alcohol industry is characterized by high entry barriers due to government regulations. The report further scrutinizes the Indian beer industry with the help of SWOT Analysis. The report elucidates the strengths of the industry in being recession proof in view of the fact that the Indian alcohol consumption generally remains unfazed by the economic downturn in the nation. Also growing Indian population serves as a ready customer base for the beer industry. According to United Nations India is poised to overtake China as the world's most populous nation around 2027. Such population growth puts the industry in a comfortable spot. Indian demographics are bound to benefit the industry in the long term with large number of people under drinkable age. With alcohol consumption no longer a taboo in India with increasing people in drinkable age, Indian beer industry surely

finds itself in the 'bubbly' spot. Also, the rising levels of urbanization, escalating disposable incomes and growing affluent class provides enormous opportunities for the players to tap. It is estimated that the urban population in India will rise to ~38% of the total population by 2025. There has been a shift in the spending pattern of the Indian consumers due to increase in their purchasing power. Rising incomes are resulting in increasing discretionary expenditures. Since expenditure on alcohol consumption is discretionary in nature, beer market is bound to benefit from such paradigm shift. However, the industry faces challenges in the form of ban on direct advertising and derisory state of market infrastructure. The industry is also highly taxed and regulated and struggles with multiplicity of taxes and lack of uniformity in the regulations varying from state to state. Industry is also faced with ban on direct advertising which further elevates the industry's problems. Industry further faces challenges in the wake of rising competition in the sector. Complementary to the changing industry dynamics, beer segment has seen a high spurt in the players operating in the market which has worsened the competition for existing players. With global bigwigs like Carlsberg, Anheuser-Busch and Heineken entering the country, the competitive landscape of the domestic beer market has changed considerably. The industry also faces moral restrictions due to religious influence. It is still considered to be a forbidden, taboo drink in some parts of the society, detrimental for the Indian culture. Drinking alcohol is culturally not accepted in most parts of India. The report further analyses the demand supply situation and foreign trade of beer in the nation along with industry size forecasts. The outlook for Indian beer industry remains buoyant with stable growth rates and all growth triggers like the rising acceptability of beer as a social drink, popularity of microbreweries & craft beers and evolving consumer preferences in place for a new growth wave. Also, the Indian growth story holds up the expansion of the beer industry. Favorable demographics, rising disposable incomes, urbanization and rising acceptability of drinking have brought the winds of change for the industry. We expect the industry to reach consumption levels of 3584 million litres or 459 million cases by 2024. This estimated market size of 459 million cases is a conservative estimate; the industry has all triggers in place for exceeding the projected growth rate.

Reasons for Buying this Report:

- This research report helps you get a detailed picture of the industry by providing overview of the industry along with the market structure and classification
- The report provides market analysis covering major growth driving factors for the industry, latest market

trends and insights on regulatory framework in the industry • This report helps to understand the present status of the industry by elucidating a comprehensive SWOT analysis and scrutiny of the demand supply situation • Report provides analysis and in-depth financial comparison of major competitors • The report provides forecasts of key parameters which helps to anticipate the industry performance Our Approach: • Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years. • The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players • We use reliable sources of information and databases, information from which is processed by us and included in the report

Emerging Opportunities in Booming Indian Beer Industry (Why to Invest, Core Project Financials, Potential Buyers, Market Size & Analysis)

Author: NPCS Team

Format: Paperback

Book Code: NI272

Pages: 33

ISBN: 9789381039441

Price: Rs. 29,500.00 **US\$** 500.00

The research report titled 'Emerging Opportunities in Booming Indian Beer Industry (Why to Invest, Core Project Financials, Potential Buyers, Market Size & Analysis)' released by Niir Project Consultancy Services aims at providing a detailed analysis of the investment opportunities prevalent in the Indian beer industry. The report covers crucial aspects like reasons for investment in the sector, core project financials, glimpse of the regulatory environment of the industry, potential buyers and analysis of the industry as a whole. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product: • Good Present/Future Demand • Export-Import Market Potential • Raw Material & Manpower Availability • Project Costs and Payback Period We at NPCS, through our reliable expertise in the project consultancy and market research field, have identified beer project, in the alcoholic beverages segment, which satisfies all the above mentioned requirements and has high growth potential in the Indian markets. And through this report we aim to help you make sound and informed business decision. The report contains all the data which will help an entrepreneur find answers to questions like: • Why I should invest in beer project? • Who are the customers of the product? • What will drive the growth of the product? • What are the costs involved? • What will be the market potential? The report begins by providing an overview of the beer industry in India and then proceeds to enhance the product knowledge of the entrepreneur. The report discusses beer as a product in various lights like product definition and product classification. The report further enlightens the entrepreneur about the potential buyers of the product, beer, which will help him identify his customers and place his product correctly. It provides a profound analysis of the investment factors of the project along with graphical representation and forecasts of key investment indicators which can help an entrepreneur assess the market potential of the product. The report further helps in enhancing the assessment of market potential by listing the export-import market of the product coupled with market size & outlook of the Indian beer industry as a whole. It also helps an entrepreneur in keeping abreast of the recent developments as well as the regulatory environment prevalent in the industry. The report

then turns its path towards the project insights of the beer plant. It includes core project financials of a model project with specified product list and plant capacity. It enumerates project information like raw materials required for manufacturing beer, manufacturing process, list of machinery and basic project financials. Project financials like plant capacity, costs involved in setting up of project, working capital requirements, payback period, projected revenue and profit are listed in the report. It also lists down the key players in the beer segment along with their contact details. This report helps an entrepreneur gain meaningful insights into the Indian beer sector and make informed and sound business decision. Reasons for buying the report:

- This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, demand of the product and reasons for investing in the product
- This report provides vital information on the product like its definition, characteristics and segmentation
- This report helps you market and place the product correctly by identifying the target customer group of the product
- This report helps you understand the viability of the project by disclosing details like raw materials required, manufacturing process, project costs and snapshot of other project financials
- The report provides a glimpse of important taxes applicable on the product
- The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions

Our Approach:

- Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.
- The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players
- We use reliable sources of information and databases. And information from such sources is processed by us and included in the report

**Market Research Report on Packaged Fruit Juices & Drinks in India
(Present & Future Potential, Market Insights, Growth Drivers,
Opportunities, Industry Size, Porters 5 Forces, Demand Analysis &
Forecasts upto 2017)**

Author: NPCS Team

Format: Paperback

Book Code: NI281

Pages: 84

ISBN: 9789381039540

Price: Rs. 35,400.00 US\$ 750.00

Fruit beverages in India have come a long way since their first forms to find their permanent place in Indian households. Today you will find yourself bewildered with the choices available if you wish to drink a fruit beverage. Innumerable and eclectic flavors combined with several variants (juices, drinks or nectars), is a testament to the fruit beverage industry transformation. In the view of the rising future potential of the industry, Niir Project Consultancy Services has released a new research report titled "Market Research Report on Packaged Fruit Juices & Drinks in India (Present & Future Potential, Market Insights, Growth Drivers, Opportunities, Industry Size, Porter's 5 Forces, Demand Analysis & Forecasts upto 2017)". The report aims at providing a thorough understanding and analysis of the industry by deeply exploring the present status as well as the future prospects of the fruit beverage sector in India in the wake of evolving market dynamics. The report establishes the study by covering data points like growth drivers for the industry, opportunities, present scenario, demand supply estimation & analysis, porters 5 force analysis and key player information. The report begins with a brief on global status of the fruit beverage industry and then shares information on the current status of the industry on the domestic front. The report discusses the overview of the sector along with its classification and structure and then further proceeds to analyze the growth drivers and opportunities for the industry. Rising per capita incomes of the Indians, bulging middle class, surging modern trade and growing urbanization will be the macro economic factors that will contribute to its growth. Escalating health consciousness among Indians has lured them towards fruit beverages and the players have left no stone unturned in capturing this sudden rush of demand. Although the fruit beverage industry is dominated by the loose beverage segment, the share of packaged fruit beverages is gradually rising and eating away the other share. The report then discusses the demand-supply scenario of packaged fruit beverages in India by analyzing various aspects. The demand for packaged fruit beverages is captured by studying the consumption volumes and the industry revenues while the supply side involves scrutiny of estimated fruit processing units in the country along with the fruit production statistics of India. The data discussed above is supported by graphical representations wherever necessary along with the key

forecasts. Moving forward, the report analyzes the attractiveness of the sector by evaluating the status of porters 5 forces prevalent in the sector. The sector is said to be most attractive when the 5 forces are their weakest and the report explicates the forces methodically to simplify the analysis. The next segment of the report includes industry players details like key player business profile and financial comparison of companies operating in this segment. Profiles of companies like Dabur India, PepsiCo India, Coca-Cola India and Parle Agro are included while peer group financials includes contact information like address of registered office, director's name and financial comparison covering balance sheet, profit & loss account and several financial ratios of the players. The report ends with a promising outlook of the sector. The fruit beverage industry in India is on its mark for a great run to success. Changing consumer dynamics like rising incomes, shifting preferences towards healthy drinks and changing perceptions will contribute majorly for the industry's next growth phase. Macro-economic factors like spurt in the modern trade, growing urbanization in the nation and burgeoning middle class will further lend a helping hand to the sector.

Reasons for Buying this Report:

- This research report helps you get a detail picture of the industry by providing overview of the industry along with the market structure and its classification
- The report provides in-depth market analysis covering major growth driving factors for the industry and opportunities prevalent
- This report helps to understand the present status of the industry by elucidating a comprehensive scrutiny of the demand – supply situation with forecasts and porters 5 force analysis
- Report provides analysis and in-depth financial comparison of major players/competitors
- The report provides forecasts of key parameters which helps to anticipate the industry performance

Our Approach:

- Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.
- The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players
- We use reliable sources of information and databases. And information from such sources is processed by us and included in the report

How and Why to Start Your Own Fruit Beverage Industry

Author: NPCS Team

Format: Paperback

Book Code: NI282

Pages: 36

ISBN: 9789381039557

Price: Rs. 29,500.00 **US\$** 500.00

How and Why to Start Your Own Fruit Beverage Industry (Business Plan, Investment Opportunity, Why to invest, Market Potential, Project Financials of Fruit Juice Plant (FMCG Sector) for Indian entrepreneur, Project Feasibility, Potential Buyers, Market Size & Analysis) Indian fruit beverage industry has an effervescent future ahead of itself with rising health consciousness and growing affordability among Indians. The industry is in the pink of its health as fruit beverage consumption levels grows among Indian population and makes way for newer variants and flavors in the segment. Acknowledging the growth potential of fruit beverages in India, Niir Project Consultancy Services has launched its new report titled “How and Why to Start Your Own Fruit Beverage Industry (Business Plan, Investment Opportunity, Why to invest, Market Potential, Project Financials of Fruit Juice Plant (FMCG Sector) for Indian entrepreneur, Project Feasibility, Potential Buyers, Market Size & Analysis)”. The report qualifies as an investor’s guide for making investment into Indian fruit beverage segment. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product: • Good Present/Future Demand • Export-Import Market Potential • Raw Material & Manpower Availability • Project Costs and Payback Period We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in fruit beverage sector in India and its business prospects. Through this report we have identified Fruit Juice project which has the potential to be a lucrative investment avenue. The report analyzes the investment feasibility of fruit beverage sector by discussing factors like potential buyers, reasons for investment, regulations, foreign trade and project financials. The report embarks the assessment by giving an overview of the overall fruit beverage sector in India as well as in world which is followed by the identification, estimation and forecasts of target consumers of the industry in India. The report further elaborates on factors that make a case for investing in the sector by profound analysis supported by graphical representation and forecasts of key data indicators. Evolving consumer dynamics like changing preferences, growing health consciousness and

increasing consumption levels will bring in the next phase of growth for the industry. The report then lists the import-export market of the products and the recent developments in the sector. The key segment of the report 'Project Details' is a useful tool for any entrepreneur who is willing to enter fruit beverage segment in India as it discusses investment vitals like raw materials required, list of machinery, manufacturing process and project financials of the project. The report includes project details of a model project manufacturing four types of fruit juices (Pineapple, Orange, Banana and Guava). The project financial sub section provides details like plant capacity, costs involved in setting up of project, working capital requirements, payback period, projected revenue and profit. It also provides contact details of major players operating in the Indian fruit beverage sector. The fruit beverage industry in India is on its mark for a great run to success. Changing consumer dynamics like rising incomes, shifting preferences towards healthy drinks and changing perceptions will contribute majorly for the industry's next growth phase. Macro-economic factors like spurt in the modern trade, growing urbanization in the nation and burgeoning middle class will further lend a helping hand to the sector. Reasons for buying the report:
